### *Database and Expert Systems Applications A*

Min Tjoa 2012-12-06 Use and development of database and expert systems can be found in all fields of computer science. The aim of this book is to present a large spectrum of already implemented or just being developed database and expert systems. Contributions cover new requirements, concepts for implementations (e.g. languages, models, storage structures), management of meta data, system architectures, and experiences gained by using traditional databases in as many areas of applications as possible (at least in the fields listed). The aim of the book is to inspire a fruitful dialogue between development in practice, users of database and expert systems, and scientists working in the field.

### Project Management in Health and Community

Services Valerie Thiessen 2020-07-16 Project management is recognised as a core competency across health and community services

environments, yet it can be challenging for new project staff and practitioners to balance the needs of stakeholders and ensure the best outcome for everyone involved. This wholly revised edition of *Project Management in Health and Community Services* presents the tools and techniques for effective practice, offering practical problem-solving strategies for managing projects based on real-life scenarios. The expert authors use case studies and examples from the field to illustrate topics such as the project life cycle, project planning, execution and evaluation, risk management, handling change and building effective teams. This edition also features a new chapter on the importance of incorporating evaluation into project design and implementation, and how evaluation can impact on future project design and development. Written by highly experienced authors and underpinned by the latest research, this is an essential resource for anyone studying or working in health and community services.

### Project Management Jack Meredith 2011

Meredith's newest edition of *Project Management* focuses on all facets of the steps needed to successfully manage a project - from planning and resources to budgeting and more. An important goal is to appeal to help those preparing to take the PMBOK certification exams of the Project Management Institute. Revisions for the 8th Edition include a more consistent writing style throughout, content updates in some chapters, additional examples of some concepts to make them easier to grasp, and improved visual elements to make the textbook and online resources easier to understand and navigate.

Management David Boddy 2005 'The language is highly accessible and this makes it particularly suitable for undergraduate and international students at all levels. The combination of extended case material, shorter cases and illustrations of management in practice makes for a varied and stimulating approach. The activities will encourage and enable students to work independently to develop both their

knowledge and skills.' Abby Cathcart, Sunderland Business School, University of Sunderland 'I like the activities that explicitly ask for critical reflection and am sure that my students will benefit from the development of their critical thinking skills. The cases and examples in the book are helpful both because they come from a wide variety of national backgrounds and because companies like Ryanair and Nokia are familiar names!' Ad van Iterson, Organization and Strategy Department, Faculty of Economics and Business Administration, Maastricht University 'All the case studies are both relevant and appropriate: there is a wide spread of international examples and a striking variety of organisations throughout the chapters, which will undoubtedly enhance the students' learning process.' Paschal McNeill, Department of Business Administration, Quinn School of Business, University College Dublin What is 'management', and what activities and behaviour does it entail? How do ideas and theories of management apply to commercial enterprise and other areas of work? How is the environment of management changing, and what are the impacts of recent trends? Management: An Introduction addresses these and many other questions by providing a comprehensive account of the themes and functions of management. Aimed at the first-time student of the subject and written in a highly accessible style, this is an academically rigorous text which brings the topic to life with a wide range of appealing and readily identifiable examples. Among the most valuable features and aids to learning in the book are: Case studies on organisations as diverse as Ryanair, Vodafone/Ericsson and Oxfam, to provide relevant illustrations of theory in practice. Critical Reflections to encourage the application of personal experience and critical thinking to the issues in question. Skills Development Activities to build practical and work-based competences. Key Terms highlighted in the text and defined both at the margin and in a full Glossary. A companion website at [www.pearsoned.co.uk/boddy](http://www.pearsoned.co.uk/boddy) provides tools for revision, such as self-assessment questions and flashcards, and for research, such as weblinks and case study updates. David Boddy is a Research Fellow at the School of Business and

Management, University of Glasgow. He is author of two other books published by Pearson Education: *Managing Information Systems: An Organisational Perspective* (2005), and *Managing Projects* (2002).

*The Writers Directory* 2013

*Community Health Nursing* Stephen Paul Holzemer 2014 Written in an accessible, user-friendly, and practical style, this text provides a focused and highly engaging introduction to community health nursing. It focuses on health care for people in their homes and where they live with an overriding emphasis on care of the client in the community, and the business and politics of community health nursing. This book is accompanied by a robust Companion Website full of online activities to enhance the student learning experiences.
