21st Century Criminology: A Reference Handbook J. Mitchell Miller
2009-08-06 Criminology has experienced tremendous growth over the last few decades, evident, in part, by the widespread popularity and increased enrollment in criminology and criminal justice departments at the undergraduate and graduate levels across the U.S. and internationally. Evolutionary paradigmatic shift has accompanied this surge in definitional, disciplinary and pragmatic terms. Though long identified as a leading sociological specialty area, criminology has emerged as a stand-alone discipline in its own right, one that continues to grow and is clearly here to stay. Criminology, today, remains inherently theoretical but is also far more applied in focus and thus more connected to the academic and practitioner concerns of criminal justice and related professional service fields. Contemporary criminology is also increasingly interdisciplinary and thus features a broad variety of ideological orientations to and perspectives on the causes, effects and responses to crime. 21st Century Criminology: A Reference Handbook provides straightforward and definitive overviews of 100 key topics comprising traditional criminology and its modern outgrowths. The individual chapters have been designed to serve as a "first-look" reference source for most criminological inquires. Both connected to the sociological origins of criminology (i.e., theory and research methods) and the justice systems' response to crime and related social problems, as well as coverage of major crime types, this two-volume set offers a comprehensive overview of the current state of criminology. From student term papers and masters theses to researchers commencing literature reviews, 21st Century Criminology is a ready source from which to quickly access authoritative knowledge on a range of key issues and topics central to contemporary criminology. This two-volume set in the SAGE 21st Century Reference Series is intended to provide

undergraduate majors with an authoritative reference source that will serve their research needs with more detailed information than encyclopedia entries but not so much jargon, detail, or density as a journal article or research handbook chapter. 100 entries or "mini-chapters" highlight the most important topics, issues, questions, and debates any student obtaining a degree in this field ought to have mastered for effectiveness in the 21st century. Curricular-driven, chapters provide students with initial footholds on topics of interest in researching term papers, in preparing for GREs, in consulting to determine directions to take in pursuing a senior thesis, graduate degree, career, etc. Comprehensive in coverage, major sections include The Discipline of Criminology, Correlates of Crime, Theories of Crime & Justice, Measurement & Research, Types of Crime, and Crime & the Justice System. The contributor group is comprised of well-known figures and emerging young scholars who provide authoritative overviews coupled with insightful discussion that will quickly familiarize researchers, students, and general readers alike with fundamental and detailed information for each topic. Uniform chapter structure makes it easy for students to locate key information, with most chapters following a format of Introduction, Theory, Methods, Applications, Comparison, Future Directions, Summary, Bibliography & Suggestions for Further Reading, and Cross References. Availability in print and electronic formats provides students with convenient, easy access wherever they may be.

Developing and Implementing a Public Health and Criminological Approach to Tackling Sexual Abuse Kieran McCartan 2025-08-19 This edited collection draws together and contextualises research on the Epidemiological Criminology (EpiCrim) approaches to sexual abuse carried out by the University of West England (UWE), Bristol. EpiCrim sees crime and offending behaviour, including sexual abuse, as a public health issue and advocates that to prevent first time or repeat offending behaviour we have to work in a bespoke way across a number of populations (individual, interpersonal, community, and societal). The book introduces the area of EpiCrim and how it works to address sexual abuse, before examining the UWE based research on the prevention, treatment and community integration of people impacted by sexual abuse. The book discusses policy, practice, theory and research in this area with the authors reviewing, critiquing, synthesising as well as building upon previous/current research, theory and policy.

The Routledge Handbook on the Influence of Built Environments on

Diverse Childhoods Kate Bishop 2024-07-01 Children and young people are often discussed as if they are homogenous groups. The reality is, of course, very different, with an enormous variation within each of these groups and in any domain of experience pertaining to childhood or adolescence. Driven by personal, sociocultural, geographic, or economic circumstances, many children and young people worldwide are experiencing a totally different reality to those who fit with more mainstream patterns of childhood. This has substantial implications for their sociophysical environmental experience and our understanding of their physical environmental needs. The aim of this book is to draw attention to these alternate realities for a number of these groups of children and young people, highlighting the unique and different considerations associated with their particular circumstances in each instance, and identifying the repercussions for their physical environmental needs. Ultimately, this book creates an evidence-based discussion which can be used by designers, planners and policy makers, and those delivering services and programs to children and young people as a basis to make informed decisions on how to work with the groups of children and young people in our book for better environmental provision.

Families as Complex Systems Ana Teixeira de Melo 2025-06-30 This book presents an innovative framework for conceptualising families as complex systems and for understanding and supporting positive change, adaptation and resilience. The development of this framework was based on a qualitative and abductive research process targeting change and resilience processes in multi-challenged families. The theoretical novelty of this book is mostly expressed in the notion of Love-Force: a relational force emerging from the coupling processes between individuals with potential transformative effects on them, their interactions and environments. This book introduces a new vocabulary for understanding the complexity of families as complex systems and their change and resilience processes. Love-Force is presented as a supreme expression of the complexity of families and human bonds. It elaborates on the complexity of the family bonds, on the relation of Love-Force to change and resilience and its contributions to the conceptualisation of the Potential for Family Change. Raising important theoretical and methodological challenges and questions, it presents a guide for future interdisciplinary research in the domains of complexity and family sciences and advances in practice. As such, it will be of interest to anyone interested in the complexity of human relations and to complexity scientists as much as family theorists, researchers and practitioners.

Daughters of Durga Manjula Datta O'Connor 2022-06-15 In the early 2010s a spate of domestic violence-related murders in the Victorian Indian community compelled psychiatrist Manjula Datta O'Connor to investigate the causes of patriarchal abuse in South Asian families. As a practitioner with many decades experience in the field, Datta O'Connor

questioned whether a better understanding of history and culture could help these communities implement measures to prevent family violence. But the most powerful lessons came from those she met through her practice - survivors of transnational abuse and of sexual and dowry exploitation. These women taught Datta O'Connor about human resilience and strength and the myriad ways women find the inner power to survive. These are the daughters of the goddess Durga, wielding the tools of history to produce meaningful change.

Psychopathology Louis G. Castonguay 2021-08-18 "This authoritative text gives students and practicing psychotherapists a rich understanding of the connections between psychopathology research and clinical practice. Chapters thoroughly describe the etiology, DSM-5 classification, symptoms and clinical features, course, epidemiology, and associated comorbidities of prevalent psychological disorders. What sets this tightly edited volume apart are insightful discussions of how current empirical findings can inform assessment, case formulation, the therapeutic relationship, and intervention strategies (regardless of theoretical orientation). Each chapter is written collaboratively by leading psychopathology and psychotherapy researchers"--

The Social Ecology of Resilience Michael Ungar 2011-10-08 More than two decades after Michael Rutter (1987) published his summary of protective processes associated with resilience, researchers continue to report definitional ambiguity in how to define and operationalize positive development under adversity. The problem has been partially the result of a dominant view of resilience as something individuals have, rather than as a process that families, schools, communities and governments facilitate. Because resilience is related to the presence of social risk factors, there is a need for an ecological interpretation of the construct that acknowledges the importance of people's interactions with their environments. The Social Ecology of Resilience provides evidence for this

ecological understanding of resilience in ways that help to resolve both definition and measurement problems.

Descriptive Psychopathology Michael Alan Taylor 2008-11-13 In order to accurately describe and diagnose psychiatric illness, practitioners require in-depth knowledge of the signs and symptoms of behavioral disorders. *Descriptive Psychopathology* provides a broad review of the psychopathology of psychiatric illness, beyond the limitations of the DSM and ICD criteria. Beginning with a discussion of the background to psychiatric classification, the authors explore the problems and limitations of current diagnostic systems. The following chapters then present the principles of psychiatric examination and diagnosis, described with accompanying patient vignettes and summary tables, and related to different diagnostic concerns. A thought-provoking conclusion proposes a restructuring of psychiatric classification based on the psychopathology literature and its validating data. Written for psychiatry and neurology residents, as well as clinical psychologists, it is invaluable to anyone who accepts the responsibility for the care of patients with behavioral syndromes.
