Laboratory Epistemologies Jenny Boulboulé
2024-10-11 In *Laboratory Epistemologies: A Hands-On Perspective*, Jenny Boulboulé examines the significance of hands-on experiences in contemporary life sciences laboratories. Addressing the relationship between contemplation and manipulation in epistemology, Boulboulé combines participant observations in molecular genetics labs and microbiological cleanrooms with a longue durée study of the history and philosophy of science. She radically rereads Descartes's key epistemological text *Meditations on First Philosophy*, reframing the philosopher as a hands-on knowledge maker. With this reading, Boulboulé subverts the pervasive modern conception of the disembodied knower and puts the hands-on experimenter at the heart of life sciences research. In so doing, she contributes a theoretical model for understanding how life processes on cellular and molecular levels are manually produced in today's techno-scientific spaces. By reassessing the Cartesian legacy and arguing that epistemology should be grounded in the standpoint of a hands-on practitioner, Boulboulé offers the philosophical and historical foundation to understand and study contemporary life sciences research as multisensory embodied practices.

Between Two Worlds John Carriero 2009
Between Two Worlds is an authoritative commentary on--and powerful reinterpretation of--the founding work of modern philosophy, Descartes's *Meditations*. Philosophers have tended to read Descartes's seminal work in an occasional way, examining its treatment of individual topics while ignoring other parts of the text. In contrast, John Carriero provides a sustained, systematic reading of the whole text, giving a detailed account of the positions against which Descartes was reacting, and revealing anew the unity, meaning, and originality of the *Meditations*. Carriero finds in the *Meditations* a nearly continuous argument against Thomistic Aristotelian ways of thinking about cognition,

and shows more clearly than ever before how Descartes bridged the old world of scholasticism and the new one of mechanistic naturalism. Rather than casting Descartes's project primarily in terms of skepticism, knowledge, and certainty, Carriero focuses on fundamental disagreements between Descartes and the scholastics over the nature of understanding, the relation between the senses and the intellect, the nature of the human being, and how and to what extent God is cognized by human beings. Against this background, Carriero shows, Descartes developed his own conceptions of mind, body, and the relation between them, creating a coherent, philosophically rich project in the *Meditations* and setting the agenda for a century of rationalist metaphysics.

Routledge Philosophy Guidebook to Descartes and the Meditations Gary Carl Hatfield 2003
Descartes' Meditations is one of the most widely read philosophical texts and has marked the beginning of what we now consider as modern philosophy. It is the first text that most students of philosophy are introduced to and this book is an introduction to what is undeniably one of the most important texts in the history of philosophy. Gary Hatfield offers an introduction to Descartes' background, a careful reading of the *Meditations* and a methodological investigation of its main themes.

The Cartesian Mind Jorge Secada 2025-09-03
Descartes is widely acknowledged as a central figure in the origins of modernity. The nature of his thought and of the role it played is, however, a matter of considerable dispute among experts. *The Cartesian Mind* is a significant contribution to this debate. It covers the full extent of his work, not only placing it in its historical context but also exploring its reception, legacy, and contemporary significance. Comprising over 40 chapters by an international team of distinguished scholars, the collection is divided into 3 parts: Historical Context Philosophical Themes Reception and Influence. Within these parts, key topics are addressed, including Descartes's life and works, Platonism,

Scholasticism, Stoicism, skepticism, atomism, meditation, method, the self, God, will and freedom, mind and body, biology and medicine, causation, mathematics, the natural sciences, philosophy of science, ethics, and the origins of idealism. Descartes's reception and legacy within science and philosophy from the seventeenth century to our days, including current analytic and continental traditions, as well as within the broader contemporary culture, also receive sustained attention. Descartes's work is central to all areas of philosophy, including epistemology, metaphysics, philosophy of mind, philosophy of science, and ethics. As such *The Cartesian Mind* is essential reading and an indispensable tool for all students and researchers in the discipline.

Philosophic Classics: From Plato to Derrida

Forrest Baird 2023-09-04 *Philosophic Classics: From Plato to Derrida* includes essential writings of the most important philosophers from almost two millennia of Western philosophy. In updating this Seventh Edition, editor Forrest E. Baird has continued to follow the same criteria established by the late-Walter Kaufmann when the *Philosophic Classics* series was first established: (1) to use complete works or, where more appropriate, complete sections of works (2) in clear translations (3) of texts central to each thinker's philosophy or widely accepted as part of the "canon." To make the works more accessible to students, most footnotes treating textual matters (variant readings, etc.) have been omitted and important words from antiquity have been transliterated and put in angle brackets. In addition, each thinker is introduced by a brief essay composed of three sections: (1) biographical (a glimpse of the life), (2) philosophical (a résumé of the philosopher's thought), and (3) bibliographical (suggestions for further reading). A timeline places important philosophers alongside other important thinkers, world leaders, and major global events. Photos and paintings with explanatory captions illuminate the ideas, debates, and places discussed in the text. New to the Seventh Edition: New translations: Plato, *Euthyphro*, *Apology*, *Crito*, and *Phaedo*; Aristotle, *Nichomachean Ethics*; Epicurus, *Letter to*

Meno; *Principal Doctrines*; Boethius, *The Consolation of Philosophy*; Anselm, *Proslogion*; Giovanni Pico Della Mirandola, *Oration on the Dignity of Man*; René Descartes, *Correspondence with Princess Elizabeth*; Gottfried Leibniz, *Monadology*; Jean-Jacques Rousseau, *The Social Contract*; Immanuel Kant, *Prolegomena to Any Future Metaphysics and Groundwork of the Metaphysics of Morals*
Additional material: Porphyry's *Life of Plotinus* (in part); Francis Bacon, *Aphorisms* (selections from *Novum Organum*); Karl Marx, *Theses on Feuerbach*; A.J. Ayer, *Language, Truth, and Logic* (in part) Updated, annotated bibliographies with each bibliography now broken into two sections, one for beginning and another for advanced students.

Baird 2011 "Esteemed for providing the best available translations, *Philosophic Classics: Modern Philosophy*, features complete works or complete sections of the most important works by the major thinkers, as well as shorter samples from transitional thinkers." First published in 1961, Forrest E. Baird's revision of "Philosophic Classics," Pearson Education's long-standing anthology (available in split volumes), continues the tradition of providing generations of students with high quality course material. Using the complete works, or where appropriate, complete sections of works, this anthology allows philosophers to speak directly to students. "For more information on the main combined anthology, or the additional period volumes, please see below: " *Philosophic Classics: From Plato to Derrida*, 6/E "ISBN-10: 0205783864" *Philosophic Classics, Volume I: Ancient Philosophy*, 6/E "ISBN-10: 0205783856" *Philosophic Classics, Volume II: Medieval and Renaissance Philosophy*, 6/E "ISBN-10: 0205783902"

Western Philosophy John G. Cottingham 2021-07-06 The new edition of this celebrated anthology surveys the Western philosophical tradition from its origins in ancient Greece to the work of today's leading philosophers *Western Philosophy: An Anthology* provides an authoritative guided tour through the great tradition of Western philosophical thought. The seminal writings of the great philosophers along with more recent readings of contemporary interest are explored in 144 substantial and

carefully chosen extracts, each preceded by a lucid introduction, guiding readers through the history of a diverse range of key arguments, and explaining how important theories fit into the unfolding story of Western philosophical inquiry. Broad in scope, the anthology covers all the main branches of philosophy: theory of knowledge and metaphysics, logic and language, philosophy of mind, the self and freedom, religion and science, moral philosophy, political theory, aesthetics, and the meaning of life, all in self-contained parts which can be worked on by students and instructors independently. The third edition of the Anthology contains newly incorporated classic texts from thinkers such as Aquinas, Machiavelli, Descartes, William James, and Wittgenstein. Each of the 144 individual extracts is now followed by sample questions focusing on the key philosophical problems raised by the excerpt, and accompanied by detailed further reading suggestions that include up-to-date links to online resources. Also new to this edition is an introductory essay written by John Cottingham, which offers advice to students on how to read and write about a philosophical text. Part of the Blackwell Philosophy Anthologies series, *Western Philosophy: An Anthology, Third Edition* remains an indispensable collection of classic source materials and expert insights for both beginning and advanced university students in a wide range of philosophy courses.
