Winning Without Thinking Nick Mordin 2006-10 Nick Mordin estimates he has spent over 30,000 hours researching racing results over the years. His aim has been to uncover the principles that govern the betting market and racing results themselves. In conducting his research Nick has tested thousands of systems, both his own and those developed by academics, professional gamblers and others around the globe. In *Winning Without Thinking* he shares the fruits of this work. the results of horse-races; basic principles that govern racing results and the betting market; mistakes commonly made by the general betting public and how to exploit them; full details of betting systems used by professional gamblers to make millions; how to predict and profit from new trends; and how to use computers to increase your returns.

How to Play the Horses—And Win Robert Marshall 2019-08-15 While growing up in Jamaica, Robert Marshall spent his days at the racetrack with his father where he learned to play with luck. Unfamiliar with the intricacies of the game, Marshall won by receiving tips from others—until someone showed him the Daily Racing Form. From that point on, Marshall realized that horse betting was a skill, and more than just what he saw on paper. In a guide tailored to anyone who wants to win while playing the horses, Marshall breaks down the betting process while sharing helpful tips and practical advice that leads gamblers through the necessary steps to overcoming the odds and walking away from the track a victor. Marshall provides insight into what to look for in a horse, how to choose a winner, why it is important to gauge the condition of the race, how to read and understand the Daily Racing Form, and much more. Included are his personal stories of successes and failures that will teach anyone how to navigate through the obstacles of betting on horses and come out a winner on the other side. *How to Play the Horses—and Win* is a guide that leads novice gamblers through a simple process that helps increase winnings to become the best handicapper ever.

Mordin on Time Nick Mordin 2003-02 In *Mordin On Time*, Nick Mordin sets out his method for answering the most fundamental question facing punters in any race, namely: which is the fastest horse? He was timing the sections of races with a stop watch, estimating wind strength and direction, adjusting for movements of running rails, using projected times and calculating average times years before the best-selling American books on speed rating were published. This new edition incorporates much new material, including standard times for all Irish racecourses (plus the major French ones). *Mordin On Time* enables the reader to construct their own speed ratings wherever they live.

Sports Analytics Leonard C Maclean 2021-12-22 This book is a collection of applications of analytic techniques to a number of popular sports including baseball, basketball, hockey, Jai Alai, NFL football and horseracing. We focus on both the statistics of the sporting events and betting strategies on the events. The subject is fascinating as there are many twists and subtle complicated decisions. Sports analytics applies mathematical and statistical methods to important questions in the structure and performance of sporting activities using the same basic methods and approaches as data analysts in other disciplines. Sports games and events are a fruitful area for study and to evaluate betting strategies as there is extensive data and mean reversion. With prices changing continuously, risk arbitrage bets can be made. Moreover, little errors, like a penalty to a player or an error in a call by a referee, can change the score of a game and corresponding betting prices. The collection and analysis of in-game data can inform players, coaches and staff on effective decision making during sporting events. Novel features of the book include: an analysis of who were the greatest baseball batters; analyses of the players most important to team success (and they are not necessarily the best players) in basketball, NFL football and hockey; a tutorial on risk arbitrage and its applications to NFL football and NBA basketball; a discussion of many ad hoc decision rules by coaches and players and what was really optimal; in the racing section we discuss breeding, the analysis of various bets like the Rainbow and ordinary Pick 6, a discussion and betting on the most important races and a visit to the Breeders' Cup with Ed Thorp to demonstrate the place and show system in action.
