**Global standard for storage and distribution** British Retail Consortium 2010-09-03 The new, updated Global Standard for Storage and Distribution Issue 2 will replace Storage and Distribution Issue 1 for all audits from March 2011. The Standard provides certification for the section of the supply chain between BRC Standards for the manufacture of food, packaging and consumer products and the end user of these products, the retailer/food service company. Aimed at companies involved in the storage and distribution of goods, the new Standard represents a substantial upgrade to Issue 1 and builds upon experience, with a new lay out, simpler presentation and clearer explanation of requirements. The Standard is designed to ensure best practice in the handling, storage and distribution of products and to promote continuous improvement in operating practices. The updated Standard includes the audit requirements, scheme rules and background to the Standard and provides the basis for an accredited certification of sites storing and/or distributing food, packaging and consumer products. It also enables certification of sites that wholesale products or carry out a range of contracted services.

The Green Encyclopedia Irene M. Franck 1992 Presents information on a variety of environmental concerns and solutions.

**Global Standard for Food Safety - Guideline for Fresh Produce** British Retail Consortium 2013-01-22 This is the latest guidance on the interpretation of the requirements of the BRC Global Standard for Food Safety - Issue 6 for fresh produce packers of fruit, vegetables and nuts. Concentrating on areas of particular issue within the fresh produce industry, this will help companies, auditors and customers understand how to implement the requirement of the Standard. The guideline includes practical guidance and real examples to illustrate the principles of the clauses and compliments the recently published more general interpretation guideline.

It provides guidance for choosing the best system for an organization and how to identify the gaps and integrate resources. Applications are provided in a manner that can be applied to the

standard of choice. The author includes case studies from professionals and subject matter experts.

Private Standards in the United States and European Union Markets for Fruit and Vegetables Cora Dankers 2007-01-01 Over the past 20 years the number of standards and certification programmes for agricultural production has grown rapidly. Producers who want to export are confronted not only by a plethora of import regulations, but also within import countries by different niche markets for which specific requirements have to be fulfilled. This report gives an overview of standards and certification programmes relevant for fruit and vegetable producers and exporters in developing countries with a focus on the markets of the United States of America and the European Union. In addition, it gives an overview of current analytical work on standards and trade, reviews major assistance programmes related to standards and provides recommendations for further research.

**The BRC Global Standard for Food Safety** Ron Kill 2011-08-24 "This book offers companies in the food industry the first comprehensive guide to preparing for the Global Standard Audit." Beverage and Food World, May 2009 BASED ON ISSUE 5 OF THE BRC STANDARD The British Retail Consortium Global Standard for Food Safety was originally conceived to meet an increasing demand for a unified standard to be used by the major retailers in the UK for their suppliers of "own label" food products. The system has proved so successful that it is now used throughout the food industry, and over 7000 food manufacturers worldwide already have the Standard. Companies are often unsure about how to approach attaining certification—often a demanding process, especially at the first attempt. Not only are there over 300 clauses to satisfy, there are also general concerns such as how to correct non-conformities within very specific deadlines. Even when their operations are actually quite satisfactory, many suppliers find themselves poorly prepared for the audit and do not perform as well as they might. This book offers companies in the food industry the first comprehensive guide to preparing for the Global Standard audit. Using over 600 real life examples, it enables manufacturers to ensure that the correct systems are in place to achieve the Standard and present themselves in the best way during the audit process. It also recommends the steps to take following the audit and how to correct non-conformities. The book is an essential resource for suppliers wishing to attain certification for the first time and those already in the scheme seeking to improve their grades. It is also of interest to certification bodies and consultants to the food industry.
