Food Processing Waste Management V. K. Joshi

2011-01-01 "Food Processing Waste Management : Treatment and Utilization Technologies" is a reference-cum-text book written in crisp and scientifically authentic language for teachers, scientists, researchers, students, industry managers, as well as all those who have a stake in food processing wastes management and utilization. It presents the latest information on the problems of wastes generated from various food industries. The contents have been divided into 14 chapters namely; Food Processing Industrial Wastes-Present Scenario, Impact of Food Industrial Waste on Environment, Grain Processing Wastes Management, Waste Utilization - Fruit and Vegetable Processing Industry, Milk and Dairy Wastes Management, Meat Processing Wastes Management, Fish Processing Wastes Management, Spices and Condiments Industrial Wastes Management, Sugar and Jaggery Industrial Wastes Management, Fruit Kernel and Oilseed Processing Wastes Management, Utilization of Waste from Food Fermentation Industry, Food Processing Waste Treatment Technology, Hospitality Industry Wastes Management and Future Wastes Management - Nanotechnology. All the segments of Food Industry have been dealt with separately by specialists with respect to their wastes management technology. Special emphasis has been laid on the potential methods of utilization of the wastes for recovery of useful products and a supplementary means of checking pollution by their profitable utilization and disposal. The profitable utilization of the food industrial wastes would not only fetch extra profits to the industry but would also reduce the pollution load in the environment. The special feature of the book is that it covers different developments made right from the basic technologies generated for wastes management to the recent advancements and future areas of research to be done on the subject. Under undergraduate and

post-graduate degree or diploma programmes of food science, food technology and postharvest Technology, fermentation technology, waste management as a subject is taught in almost all the agricultural universities in India as well as abroad .The book is expected to be very useful to the students of these disciplines. It is hoped that the treatise would be of immense value to all and would certainly open an insight into food waste management technology in the fast growing food processing industry.

**Perspective** Rajat Baisya 2021-04-02 This volume is authored by Rajat K. Baisya, alumnus of the department of Food Technology and Biochemical Engineering and a distinguished scholar, author and management consultant. The foundations of Jadavpur university and its origins as a technological institution imagined in a nationalist mould, established as a counter to the colonial British education and as a part of the movement for independence, are relatively well-known. What is less explored is the journey that the National Council of Education underwent to transform itself into the Jadavpur University. As a premier institution of higher learning in India at the present time, Jadavpur University has a number of stalwart professors to thank for its worldwide reputation. This book covers the biographies of twenty-two such professors of the Faculty of Engineering and Technology. Written from the 'technological perspective', the book attempts to trace a form of history of Jadavpur University through the microhistories of the individuals responsible for its beginnings and subsequent growth.

**Open and Distance Education in Global Environment** Suresh Garg 2006 Distance Education is expanding at a faster rate cutting across national and regional boundaries. With the advent and spread of information and communication technology (ICT), distance education has embarked on a path of collaboration, networking and globalization. Quality and accreditation of distance learning programmes and experiences have become highly significant in the ICT-enabled education system. This edited book is a compilation of selected papers submitted for the International Conference 2005 of International Council for Distance Education (ICDE). The papers are grouped into four major themes

internationalisation: collaboration and networking; ICT-enabled distance education; quality assurance; and distance education for development. Covering these four major themes, the selected papers give an overview of the present scenario of open and distance learning the world over. Contributors of this book bring in their experience and reflect on issues related to networking, resource sharing, collaboration, globalization and discuss challenges and possible solutions. In the ICT-enabled education section, issues covering practice, attitude towards technology and learning in online world are discussed. Quality issues in distance education are discussed in Section three, and how distance learning can influence educational and societal development are discussed in the last section.
