Managing International Business in China Xiaowen Tian 2007-04-19 With the rise of China in the world economy, investors from all over the world are moving to explore business opportunities in this market. Managing international business in a transition economy like China is a daunting challenge. Tian presents a practical guide to major managerial issues faced by foreign investors in the China market including strategic management of Guanxi, entry mode selection, alliance management, negotiation with Chinese partners, human resource management, marketing management, protection of intellectual property rights, and corporate financial management. These issues are analyzed in the light of relevant theoretical models of international business, with reference to current management practices of transnational corporations operating in China. With up-to-date case studies, questions for discussion and recommended readings at the end of each chapter, this book can be used as a textbook for postgraduate programmes in international business or other management disciplines, and as a textbook for executive training programmes.

Optimum currency area. Is a fixed exchange rate regime more suitable than a flexible one? Sofia Roth 2018-06-04 Seminar paper from the year 2011 in the subject Economics - Macro-economics, general, , language: English, abstract: This term paper outlines the theory of Optimum Currency Area (OCA), also known as an Optimal Currency Region (OCR). It also deals with the question under which conditions it is more suitable to have a fixed exchange rate regime or a flexible exchange rates regime in an OCA. The theory of OCA was developed in the early 1960s and deals with mixed, complicated issues of international macroeconomics and "emerged from the debate on the advantages and disadvantages of fixed versus flexible exchange rate regimes". Moreover the theory "attempts to answer the question under which circumstances it is beneficiary for a country or region to constitute a common currency area with other countries or region". This question was analyzed and contributed by the pioneered work of Mundell (1961). Other contributors at the beginning of this theory were McKinnon (1962) and Kenen (1969). Their cognition were based on founding's by Friedman (1953) and Meade (1957).
