Research in Corporate and Shari'ah Governance in the Muslim World
Toseef Azid 2019-05-20

Research in Corporate and Shari'ah Governance in the Muslim World: Theory and Practice aims to address a critical disciplinary gap between Islamic theory and the practice of the corporate sector in the Muslim World. Adopting a critical approach, the book sheds light on the impact of corporate governance on the economies of the Muslim world.

Contracts and Deals in Islamic Finance Hussein Kureshi 2014-12-29 A very accessible and concise guide to Islamic finance *Contracts and Deals in Islamic Finance* provides a clear breakdown of Islamic financial contracts and deal structures for beginners. The embedded requirements within selected Islamic financial contracts, such as risk weightage, capital structures, creations of cash flows, and balance sheets, are explained fully to provide a solid understanding of the backbone of the industry. Aimed primarily at beginners and those with a background in conventional banking, this book guides readers through the major contracts, how

they're applied, and how to discern a contract's legitimacy. Case studies and interviews with bankers and global regulators provide real-life examples of contract application, and the author's own experiences provide deep insight into the everyday issues that arise. Ancillary instructor's materials include PowerPoint slides and lecture notes that facilitate use in the classroom. Literature describing the application of Islamic financial contracts is few and far between, and those providing a basic breakdown of these contracts and questioning their validity are rarer still. This book is the first of its kind, offering a basic approach to understanding Islamic contracts, designed for the true beginner. Understand the current contracts applied in Islamic banking Learn how contracts are applied across different jurisdictions Identify illegitimate contracts and those not in the spirit of Shariah law Examine the current economic realities surrounding Islamic finance By highlighting the underlying themes in Islamic

finance and assessing the current practices, this book gives readers the solid understanding and up-to-date perspective that form a solid foundation upon which successful Islamic finance is practiced. For a solid introduction to the Islamic finance industry, *Contracts and Deals in Islamic Finance* is an accessible, practical guide.

[Financial and Accounting Principles in Islamic Finance](#) Samir Alamad 2019-05-10 This book provides an original account detailing the origins and components of a faith-based accounting system that was founded around 629 CE. By examining the historical development that the accounting systems underwent within the context of faith-based rules and values, the book explains what is meant by the term “faith-based accounting”, together with a discussion of its

characteristics in relation to various product structures and the underlying Islamic finance principles. It provides important theoretical and practical contributions by explaining accounting as a value-based science rather than a value-free object or abstract. This book explores the way in which religious rules act as a directive for accounting and auditing practices in IFIs. Through which the concept of money and digital currency within the theory of money and how it is enacted in a faith-based context, amid differences of opinions among its actors, is examined. This is an important foundation to explain Islamic accounting and includes how this outcome would shape the faith-based view regarding the new phenomenon of digital currency (DC). Also featured is the concept of paper money within the theory of money and how it is enacted in a faith-based legal framework by identifying two core concepts of today’s Fiat money as being a single genus or multi-genera money. This book is not merely an

academic work, nor is it a pure practitioner guide; rather, it is a robust work that combines both. It marries rigorous academic research and theories with practical industry experiences. The book provides a clear and concise guide to accounting in Islamic economics and finance and how Islamic financial institutions could meet the applicable faith-based rules in their accounting practices.

Certificate in Islamic Banking and Takaful AICPA 2020-03-31 The Certificate in Islamic Banking and Takaful covers the nature and development, categories, mechanisms, models, products/services and managerial functions of Islamic financial institutions. CIMA's Islamic finance qualifications structure reflects the evolving requirements in business. Comprising of the Certificates in Islamic finance and the Diploma in Islamic finance. The Islamic Banking and Finance Workbook

Brian Kettell 2011-08-15 The ongoing turbulence in the global financial markets has drawn attention to an alternative system of financial intermediation: Islamic banking and finance. This is now one of the fastest growing sectors within the market place and has, so far, remained on the sidelines of this unrest. Since the inception of Islamic banking thirty years ago

the number and reach of Islamic financial institutions worldwide has risen significantly. Institutions offering Islamic financial services constitute a significant and growing share of the financial system in several countries, and market participants everywhere are joining the race to study and be a part of this emerging financial system. The Islamic Banking and Finance Workbook is a one-of-a-kind workbook on the topic, enabling readers to test their understanding of Islamic banking and finance concepts. Although suitable as a standalone learning tool, the book is designed to test the information covered in the companion book, Introduction to Islamic Finance and Banking, and covers the fundamentals of Sharia'a law, the Islamic contracts interpretations and definitions, Murabaha, Mudaraba, Musharaka, Istisna'a, Salam and Ijara modes of finance, Takaful and much more. Emphasis is placed on mini case studies, multiple choice questions and tests of the basic concepts. It also includes a full answer

key and brief chapter summaries, as well as learning objectives. The Islamic Banking and Finance Workbook is an essential learning tool for students and practitioners who want to test their knowledge of the rapidly growing world of Islamic banking and finance.

Islamic Finance as a Complex System Haider Ali Khan 2020-07-24 There has been a rapid increase in the interest in the study of Islamic finance, resulting in a dramatic rise in financing since the beginning of the century. By the end of 2017 global industry assets had reached \$2.4 trillion and were forecasted to reach \$3.2 trillion by 2020, despite historic challenges to Islam itself at the same time. This collection of chapters provides key theoretical, empirical, and policy insights into Islamic finance from an overall complex financial and economic systems perspective. Within the complex financial and economic systems framework, this book addresses questions such as how to conceptualize Islamic financial institutions in a

nonlinear general equilibrium system, how to promote Islamic Finance in Africa, how “Islamic” is Islamic finance, and how it affects price stability, among other topics. The book provides case studies in Africa and Asia, addresses the subject in a structural financial CGE model, demonstrates the development impact of Islamic finance, and presents an Islamic version of the Iceland Plan for Monetary Reform.

Fundamentals of Islamic Finance and Banking
