In mathematics, a limit is the value that a function (or sequence) approaches as the argument (or index) approaches some value. [1] . Limits of functions are essential to calculus and mathematical analysis, ... Limits describe how a function behaves near a point, instead of at that point. This simple yet powerful idea is the basis of all of calculus. In the previous section, we evaluated limits by looking at graphs or by constructing a table of values. In this section, we establish laws for calculating limits and learn how to apply these laws. Limits can be used even when we know the value when we get there! Nobody said they

are only for difficult functions. We know perfectly well that $10/2 = 5$, but limits can still be used (if we want!) ... What is a Limit? Remember Both parts of calculus are based on limits!
