**The British National Bibliography** Arthur James Wells 2009

*Biology* Colleen Belk 2012-01-03 This edition features the exact same content as the traditional book in a convenient, three-hole-punched, loose-leaf version. Books a la Carte also offer a great value for your students--this format costs 35% less than a new textbook. Colleen Belk and Virginia Borden Maier have helped students demystify biology for nearly twenty years in the classroom and nearly ten years with their book, *Biology: Science for Life with Physiology*. In the new Fourth Edition, they continue to use stories and current issues, such as discussion of cancer to teach cell division, to connect biology to student's lives. Learning Outcomes are new to this edition and integrated within the book to help professors guide students' reading and to help students assess their understanding of biology. A new Chapter 3, "Is It Possible to Supplement Your Way to Better Health? Nutrients and Membrane Transport," offers an engaging storyline and focused coverage on micro- and macro-nutrients, antioxidants, passive and active transport, and exocytosis and endocytosis. This package contains: Books a la Carte for *Biology: Science for Life with Physiology, Fourth Edition*

*Author's Handbook of Styles for Life Science Journals* Michel Atlas

1995-11-08 Let the *Author's Handbook of Styles for Life Science Journals* save you time and trouble by providing a one-stop resource for all your manuscript writing requirements. No more plowing through your journal collection or wandering the library stacks to get those elusive journal pages containing instructions to authors. This unique book contains all the information you need to know: whether the journal will consider your manuscript; the journal's submission address; how to construct the abstract, illustrations, tables, and references; and specific information on copyright, multiple authorship, statistical analyses, and page charges. The *Author's Handbook of Styles for Life Science Journals* gives all this

information for 440 of the most important English-language, life science journals. Titles were selected from the "Journal Rankings by Times Cited" list in the Science Citation Index Journal Citation Report. Because this report is heavily weighted toward the medical sciences, other life science journals are incorporated into the book based on general level of prestige and reputation. In addition, some new titles that promise to be important to their fields, like *Nature Medicine* and *Emerging Infectious Diseases* are also included. Organized by journal title, the handbook's entries are uniformly arranged to allow direct comparison between journals.

Information is presented in an easy-to-use, easy-to-read format with clear and explicitly stated instructions. The *Author's Handbook of Styles for Life Science Journals* gives authors in the life sciences all the information necessary for the correct and complete compilation of a manuscript for submission to their journal of choice.

*Epigenetic Advancements in Cancer* Manoj K. Mishra 2016-05-04 This volume explores the epigenetic alterations and their association with various human cancers. Considering one of human cancer as an example, individual chapters are focused on defining the role of epigenetic regulators and underlying mechanisms in cancer growth and progression. Epigenetic alteration including DNA methylation, histone modification, nucleosome positioning and non-coding RNAs expression are involved in a complex network of regulating expression of oncogenes and tumor suppressor genes and constitute an important event of the multistep process of carcinogenesis. Recent advances in the understanding of the epigenetic regulation and detailed information of these epigenetic changes in various cancers provide new avenues of advancements in diagnostics, prognostics, and therapies of this highly fatal disease.

for Life weaves a compelling storyline throughout each chapter to grab student attention through the exploration of high-interest topics such as genetic testing, global warming, and the Zika virus. The authors return to the storyline again and again, using it as the basis on which they introduce the biological concepts behind each story. In the 6th Edition, new active learning features and author-created resources help instructors implement the storyline approach in their course. The Big Question is a new feature that helps students learn how to use data to determine what science can answer while developing their ability to critically evaluate information. Also available with Mastering Biology or as an easy-to-use, standalone Pearson eText Mastering(tm) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools developed to engage students and emulate the office-hour experience, Mastering personalizes learning and often improves results for each student. New to the 6th edition are author-created Figure Walkthrough videos that guide students to solidify their understanding of the concepts within challenging illustrations as well as Make the Connection activities that help students bridge the gap between each storyline and the science behind it, as well as Ready-to-Go Teaching Modules for select chapters that provide instructors with assignments to use before and after class, as well as in-class activities. Pearson eText allows educators to easily share their own notes with students so they see the connection between their reading and what they learn in class-motivating them to keep reading, and keep learning. Portable access lets students study on the go, even offline. And, reading analytics offer insight into how students use the eText, helping educators tailor their instruction.
