Student Study Guide to Accompany Human Biology

Sylvia S. Mader 2003-08 This best-selling text emphasizes the relationship between humans and other living things. Intended for an introductory course, this text provides students with a firm grasp of how their bodies function and how the human population can become more fully integrated into the biosphere. An Online Learning Center, tied directly

to the text via icons, will direct students to activities or animations that gives a "visual example" of difficult processes as well as "Working Together" boxes to emphasize homeostasis.

Evidence-Based

Evolutionary Medicine John

S. Torday 2018-04-30 A groundbreaking, evidence-based text to the growing field of evolutionary medicine Evidence-Based Evolutionary Medicine offers a

comprehensive review of the burgeoning field of evolutionary medicine and explores vital topics such as evolution, ecology, and aging as they relate to mainstream medicine. The text integrates Darwinian principles and evidence-based medicine in order to offer a clear picture of the underlying principles that reflect how and why organisms have evolved on a cellular level. The authors—noted authorities in their respective fields—address evolutionary medicine from a developmental cell-molecular perspective. They explore the first principles of physiology that explain the generation of existing tissues, organs, and organ systems. The text offers an understanding of the overall biology as a vertically integrated whole, from unicellular to multicellular organisms. In addition, it addresses clinical diagnostic and therapeutic approaches, both traditional and cell-homeostatic. This groundbreaking text: • Offers a much-needed, logical, and

fundamental approach to biology and medicine • Provides a clear explanation of complex physiology and pathophysiology • Integrates topics like evolution, ecology and aging into mainstream medicine, making them more relevant • Contains the first evidence-based text on evolutionary medicine Written for medical and graduate students in biology, physiology, anatomy, endocrinology, reproductive biology, medicine, pathology, systems biology, this vital resource offers a unique text of both biology as an integrated whole with universal properties; and of medicine seeing the individual as a whole, not an inventory of parts and diseases.

Science in an Age of Unreason

John Staddon 2022-06-07

Science is undergoing an identity crisis! A renown psychologist and biologist diagnoses our age of wishful, magical thinking and blasts out a clarion call for a return to reason and the search for objective knowledge and truth. Fans of Matt Ridley and Nicholas Wade will adore this trenchant meditation and call to action. Science is in trouble. Real questions in desperate need of answers—especially those surrounding ethnicity, gender, climate change, and almost anything related to ‘health and safety’—are swiftly buckling to the fiery societal demands of what ought to be rather than what is. These foregone conclusions may be comforting, but each capitulation to modernity’s whims threatens the integrity of scientific inquiry. Can true, fact-based discovery be redeemed? In *Science in an Age of Unreason*, legendary professor of psychology and biology, John Staddon, unveils the identity crisis afflicting today’s scientific community,

and provides an actionable path to recovery. With intellectual depth and literary flair, Staddon answers pressing questions, including: Is science, especially the science of evolution, a religion? Can ethics be derived from science at all? How sound is social science, particularly surrounding today’s most controversial topics? How can passions be separated from facts? Informed by decades of expertise, *Science in an Age of Unreason* is a clarion call to rebirth academia as a beacon of reason and truth in a society demanding its unconditional submission.
