**Selections from the 'Carmina Burana'** 2007-04-26 This is a selection from the 13th century collection of secular Latin poems. Some are serious (eg Crusade poems) but the majority are light, including many love poems. A number of items from the Carmina are well known as text for Carl Orff's 'Scenic Cantata'.

*Collaborative Translation and Multi-Version Texts in Early Modern Europe* Belén Bistué 2016-05-23 Focusing on team translation and the production of multilingual editions, and on the difficulties these

techniques created for Renaissance translation theory, this book offers a study of textual practices that were widespread in medieval and Renaissance Europe but have been excluded from translation and literary history. The author shows how collaborative and multilingual translation practices challenge the theoretical reflections of translators, who persistently call for a translation text that offers a single, univocal version and maintains unity of style. In order to explore this tension, Bistué discusses multi-version texts, in both manuscript and print, from a diverse variety of genres: the Scriptures, astrological and astronomical treatises, herbals, goliardic poems, pamphlets, the Greek and Roman classics, humanist grammars, geography treatises, pedagogical dialogues, proverb collections, and romances. Her analyses pay careful attention to both European vernaculars and classical languages, including Arabic, which played a central role in the intense translation activity carried out in medieval Spain. Comparing actual translation texts and strategies with the forceful theoretical demands for unity that characterize the reflections of early modern translators, the author challenges some of the assumptions frequently made in translation and literary analysis. The book contributes to the understanding of early modern discourses and writing practices, including the emerging theoretical discourse on translation and the writing of narrative fiction--both of which, as Bistué shows, define themselves against the models of collaborative translation and multi-version texts.

The Carmina Burana: Songs from Benediktbeuren Tariq Marshall 2011 ---  
-----The Carmina Burana, or Songs from Benediktbeuern, the monastery where the 13th-century manuscript was discovered in 1803, is a collection of 254 poems penned by a wide variety of hands in Latin and Middle High German over the course of three centuries. With a diversity of themes, ranging from satires on corrupt church leaders, to ballads on love's bittersweetness, to uproarious

drinking songs, to dirges to saints and fallen kings, to the Gamblers' High Mass, to jingoistic panegyrics on the Crusades, to plays about the birth, passion, and resurrection of Christ, the Carmina Burana exposes an unseen facet of the medieval ethos that history has often shrouded in superstition, self-denial, and religious oppression. Translated into English in its entirety for the first time in history, presented as a dual text, and thoroughly annotated, this edition will prove indispensable to scholars, students, and armchair readers alike. Latinists will relish the original Latin and Middle High German in this convenient paperback edition, and students and bibliophiles will enjoy the florid English as their navigator through the sea of opposing source languages. And all will find the in-depth commentary a useful guide through the adventurous landscape of the great Carmina Burana.

The Oxford Guide to Literature in English Translation Peter France 2000 Translation has been a crucial process in world culture over the past two millennia and more. In the English-speaking cultures many of the most important texts are translations, from Homer to Beckett, the Bible to Freud. Although recent years have seen a boom in translation studies, there has been no comprehensive yet convenient guide to this essential element of literature in English. Written by eminent scholars from many countries, the Oxford Guide to Literature in English Translation meets this need and will be essential reading for all students of English and comparative literature. It highlights the place of translation in our culture, encouraging awareness of the issues raised, making the translator more visible. Concentrating on major writers and works, it covers translations out of many languages, from Greek to Korean, from Swahili to Russian. For some works (e.g. Virgil's Aeneid) which have been much translated, the discussion is historical and critical, showing how translation has evolved over the centuries and bringing out the differences between versions. Elsewhere, with less familiar literatures, the Guide examines the extent to which translation has done justice to the range of work available. The Guide is divided into two parts. Part I contains substantial essays on theoretical questions, a pioneering outline of the history of translation into English, and discussions of the problems

raised by specific types of text (e.g. poetry, oral literature). The second, much longer, part consists of entries grouped by language of origin; some are devoted to individual texts (e.g. the Thousand and One Nights) or writers (e.g. Ibsen, Proust), but the majority offer a critical overview of a genre (e.g. Chinese poetry, Spanish Golden Age drama) or of a national literature (e.g. Hungarian, Scottish Gaelic). There is a selective bibliography for each entry and an index of authors and translators.
