## **Clusters for Competitiveness** 2009

Clusters and the New Economics of Competition  
1998

*The New Industrial Revolution* Peter Marsh

2012-07-17 The rapid emergence of China and India as prime locations for low-cost manufacturing has led some analysts to conclude that manufacturers in the "old economies"--the U.S., U.K., Germany, and Japan--are being edged out of a profitable future. But if countries that historically have been at the forefront of events in manufacturing can adapt adroitly, opportunities are by no means over, says the author of this timely book. Peter Marsh explores 250 years in the history of manufacturing, then examines the characteristics of the industrial revolution that is taking place right now. The driving forces that influence what types of goods are made and who makes them are little understood, Marsh observes. He discusses the key changes in what is happening in manufacturing today, including advances in technology, a greater focus on tailor-made goods aimed at specific individuals and industry users, participation of many more countries in world manufacturing, and the growing importance of sustainable forms of production. With broad historical sweep and dozens of engaging examples, Marsh explains these changes and their import both for consumers making purchase choices and for manufacturers assessing how to participate successfully in the new industrial era.

## **Innovation Clusters and Interregional**

**Competition** Johannes Bröcker 2003-06-17

Empirical evidence about cluster building, the emphasis of new growth theory on innovation, the recent interest in economic geography and the high pressure on politicians to establish favourable conditions for attracting dynamic industries have triggered a wave of research during the last decade, trying to understand more deeply why, how and where clusters emerge, and what factors determine their

respective success or failure. In this volume the world's leading experts contribute to our understanding of regional innovation, cluster formation and the factors influencing regional productivity and innovative performance. It provides a timely and comprehensive picture on innovation, location, networks and clusters as important means in an environment of intensifying interregional competition.
