**Le fa, entre croyances et science** Medegnon, Desire 2017-09-26 Que valent les savoirs et savoir-faire endogènes africains? Pourquoi et comment promouvoir aujourd'hui cet héritage, alors même que le modèle scientifique dit occidental apparaît comme le meilleur moyen de connaître et d'appriivoiser le monde? C'est à ces questions que répond ce livre en procédant à un examen du fa. Alors qu'une lecture hâtive le réduit à un art divinatoire plutôt chimérique, le fa se révèle, à l'analyse, comme un ensemble organisé de connaissances et de recherches et donc comme une science en puissance. Inclinent à le penser, très fortement, la vocation intellectuelle qui le définit, la rigueur des opérations logiques qu'il implique et qui renvoient, d'une manière ou d'une autre, au jeu d'une mathématique implicite, l'exigence d'objectivité valorisée par les acteurs du système et portée par une véritable tradition critique, enfin la densité et les fonctions mnémoniques et herméneutiques des mythes sur lesquels il repose. Mais, au-delà de la mise au jour de la consistance ainsi que des limites du fa, c'est à la définition d'une « méthode » d'examen et de validation des savoirs produits en dehors du système scientifique officiel que s'est essayé ce livre. Les questions qu'il pose visent, en effet, au bout du compte, à une refondation de la philosophie des sciences et de l'épistémologie. How really worth are the African endogenous knowledge and know-how? Why and how can we promote this inheritance, while the so-called western scientific model looks like the best means of knowing and mastering the world? This book answers these questions by

examining ifa, a West-African system of knowledge and practices which a narrow knowledge reduces to a fanciful divinatory art, an art then logically "perceived as inconsistent and theoretically useless". Yet, more than a divinatory art, ifa, when we submit it to analysis, appears to be an organized set of knowledge and researches, a science in the making. What makes us really think that way is the intellectual vocation that defines ifa, the rigor of the logical operations that it implies and which recalls in one way or the other the game of implicit mathematics, the objectivity requirement which is valued by the actors of the system and rests on a genuine critical tradition. This opinion is also based on the weight of myths upon which ifa rests and which constitute an important granary where a prominent set of knowledge is packed. Beyond the establishment of the consistency and the limitations of ifa, this book has strived to define a "method" of examination and validation of the knowledge which has emerged out of the official scientific system. In fact, the questions which arise from it are finally intended to give a new foundation to philosophy of sciences and to epistemology.

**Mali : L'état inachevé** Mohamed Ousmane Keita 2022-09-06 Cet ouvrage explore la voie endogène de la construction de la République du Mali. Il fait appel à la phénoménologie du droit pour interroger l'histoire de l'État et du droit maliens des origines dans une perspective génétique détaillée dans les prolégomènes. La première partie est consacrée à l'analyse du développement chaotique du Mali après l'abandon du projet des pères de l'indépendance sous la double pression des contraintes économiques et des déterminants culturels. La seconde partie en tire les conséquences, du point de vue de la théorie du droit constitutionnel. La réflexion s'achève sur une proposition de réforme de l'unité africaine.

**Analyse des aspects psychothérapeutiques de la géomancie dans la zone de Djitoumou**, Cisse moussa 2022-07-04 La géomancie est une pratique très ancienne et très répandue. Elle est habituellement reconnue par sa fonction de voyance. Dans cette perspective, une catégorie de pratiquants s'est donnée pour tâche d'apporter son soutien aux malades en souffrance physique et / ou mentale sollicitant leurs concours. Dans cette étude, nous avons choisi la zone de Djitoumou, pour sa réputation légendaire et populaire en matière de pratiques traditionnelles et d'assistances géomantiques. Cette recherche a pour objectif général d'analyser les raisons profondes pour lesquelles la géomancie des guérisseurs est fortement sollicitée, malgré les pressions des religions et le progrès de la médecine moderne. Parmi les demandeurs de services, on y rencontre toutes les couches sociales avec des problèmes multiples à résoudre.

*La géomancie* Robert Jaulin 1966 La géomancie est un procédé divinatoire pré-islamique ; elle était d'un usage courant avant l'hégire et la tradition fait état d'un prophète - il pourrait s'agir de Mohammed lui-même - dont les révélations se fondaient sur sa pratique. Tout se passe comme si le monothéisme, en ses versions judaïque et arabe, pouvait être défini et précisé à partir d'un renversement du sens introduit dans les formules géomantiques.

**Servants of Allah** Sylviane A. Diouf 1998-11 Servants of Allah presents

a history of African Muslims, following them from West Africa to the Americas. Although many assume that what Muslim faith they brought with them to the Americas was quickly absorbed into the new Christian milieu, as Sylviane A. Diouf demonstrates in this meticulously-researched, ground-breaking volume, Islam flourished during slavery on a large scale. She details how, even while enslaved, many Muslims managed to follow most of the precepts of their religion. Literate, urban, and well-travelled, they drew on their organization, solidarity and the strength of their beliefs to play a major part in the most well-known slave uprisings. But for all their accomplishments and contributions to the history and cultures of the African Diaspora, the Muslims have been largely ignored. Servants of Allah--a Choice 1999 Outstanding Academic Title--illuminates the role of Islam in the lives of both individual practitioners and communities, and shows that though the religion did not survive in the Americas in its orthodox form, its mark can be found in certain religions, traditions, and artistic creations of people of African descent. Sylviane A. Diouf is an award-winning historian specializing in the history of the African Diaspora, African Muslims, the slave trade and slavery. She is the author of *Slavery's Exiles: The Story of the American Maroons* (NYU Press 2013) and *Dreams of Africa in Alabama: The Slave Ship Clotilda and the Story of the Last Africans Brought to America*, and the editor of *Fighting The Slave Trade: West African Strategies*.
