Teaching Ancient Egypt in Museums Jen Thum 2024-02-13 Teaching Ancient Egypt in Museums: Pedagogies in Practice explores what best practices in museum pedagogy look like when working with ancient Egyptian material culture. The contributions within the volume reflect the breadth and collaborative nature of museum learning. They are written by Egyptologists, teachers, curators, museum educators, artists, and community partners working in a variety of institutions around the world—from public, children's, and university museums, to classrooms and the virtual environment—who bring a broad scope of expertise to the conversation and offer inspiration for tackling a diverse range of challenges. Contributors foreground their first-hand experiences, pedagogical justifications, and reflective teaching practices, offering practical examples of ethical and equitable teaching with ancient Egyptian artifacts. Teaching Ancient Egypt in Museums serves as a resource for teaching with Egyptian collections at any museum, and at any level. It will also be of great interest to academics and students who are engaged in the study of museums, ancient Egypt, anthropology, and education.

Ancient Egypt Stephen E. Thompson 2019-11-08 Comprising a unique collection of primary sources, this book critically examines several topics relating to ancient Egypt that are of high interest to readers but about which misconceptions abound. With its pyramids, mummies, and sphinxes, ancient Egypt has fascinated us for centuries. It has been the setting of many films and novels, figuring prominently in popular culture. Much of what the average reader believes about this civilization, however, is mistaken. Through a unique collection of primary source documents, this book critically examines several topics related to ancient Egypt and about which misconceptions abound. Primary sources, many in new translations by the author, are drawn from ancient Egyptian, classical Greek and Roman, Muslim, early Christian, and modern European documents. These sources shed light on popular misconceptions. Such topics include the divinity of the pharaoh, the role of animals in ancient Egyptian religion, the purpose of the Egyptian pyramids, the use of slave labor, the Egyptian hieroglyphic writing system, the role of Cleopatra in the defeat of Marc Antony and the fall of the Roman Republic, and the influence of Egyptian religion on the development of early Christianity. By studying these documents, users will be able to develop their skills interpreting and evaluating primary sources.

Ancient Egypt Transformed Adela Oppenheim 2015-10-12 The Middle Kingdom (ca. 2030-1650 B.C.) was a transformational period in ancient Egypt, during which older artistic conventions, cultural principles, religious beliefs, and political systems were revived and reimagined. Ancient Egypt Transformed presents a comprehensive picture of the art of the Middle Kingdom, arguably the least known of Egypt's three kingdoms and yet one that saw the creation of powerful, compelling works rendered with great subtlety and sensitivity. The book brings together nearly 300 diverse works—including sculpture, relief decoration, stelae, jewelry, coffins, funerary objects, and personal possessions from the world's leading collections of Egyptian art. Essays on architecture, statuary, tomb and temple relief decoration, and stele explore how Middle Kingdom artists adapted forms and iconography of the Old Kingdom, using existing conventions to create strikingly original works. Twelve lavishly illustrated chapters, each with a scholarly essay and entries on related objects, begin with discussions of the distinctive art that arose in the south during the early Middle Kingdom, the artistic

developments that followed the return to Egypt's traditional capital in the north, and the renewed construction of pyramid complexes. Thematic chapters devoted to the pharaoh, royal women, the court, and the vital role of family explore art created for different strata of Egyptian society, while others provide insight into Egypt's expanding relations with foreign lands and the themes of Middle Kingdom literature. The era's religious beliefs and practices, such as the pilgrimage to Abydos, are revealed through magnificent objects created for tombs, chapels, and temples. Finally, the book discusses Middle Kingdom archaeological sites, including excavations undertaken by the Metropolitan Museum over a number of decades. Written by an international team of respected Egyptologists and Middle Kingdom specialists, the text provides recent scholarship and fresh insights, making the book an authoritative resource.

How this Happened: Demystifying the Nile Dereje Befekadu Tessema 2023-02-07 Ethiopians had to wait over a thousand years to be able to use their waters for their own development. Ethiopian emperors and leaders have tried to build a dam on the Nile River as part of their development efforts. Unfortunately, due to varying reasons and circumstances, including external pressure from countries near and far, geo- and hydro-political balance shifts, and internal conflicts, they were not successful in realizing their wishes. Instead of giving up, though, each leader contributed to different extents, by laying the foundation for and addressing challenges faced in making this dream a reality. The masterplan for the dam designed in 1964 has been the seed in waiting ever since, waiting for the right opportunity to arise for construction to start. Following the decade long negotiation and an agreement on the equitable use of the Nile waters by most Nile riparian countries, and the subsequent Cooperative Framework Agreement, the Ethiopian government started the construction of the GERD in 2011. The waiting had finally ended ... It was time for the seed to grow. Twelve years later, the construction program is almost done. The reservoir already holds billions of cubic meters of water, and the country has produced power from the first two turbines as part of the early power generation milestone. The seed has sprouted, and the tree is on track to be the tallest in Africa. In this six-part book, Dereje Befekadu Tessema discusses events that started thousands of years ago, culminating in the construction of the Grand Ethiopian Renaissance Dam (GERD). He also shares a recount of his trip from the sources to the mouth of the Nile River.

An Imam in Paris Rifa'a Al-Tahtawi 2011-12-05 In the 1820s, Rifa`a Rafi` al-Tahtawi, a young Muslim cleric, was a leading member of the first Egyptian educational mission to Paris, where he remained for five years, documenting his observations of European culture. His account, Takhlis al-Ibriz fi Talkhis Bariz, is one of the earliest and most influential records of the Muslim encounter with Enlightenment-era European thought, introducing ideas of modernity to his native land. In addition to its historical and literary value, al-Tahtawi's work offers invaluable insight into early conceptions of Europe and the `Other'. Its observations are as vibrant and palpable today as they were over 150 years ago; informative and often acute, to humorous effect. An irrefutable classic, this new edition of the first English translation is of seminal value. It is introduced and carefully annotated by a scholar fluent in the life, times and milieu of its narrator.

The Nation 1871

Essays on the Philosophy and History of Art Johann Joachim Winckelmann 2005 Johann Joachim Winckelmann (1717-1768), German classical archaeologist and art historian, is considered the founder of neoclassicism and of systematic art history. His masterpiece, Geschichte der Kunst des Altertums (1764) surveys the history of Greek Art and sets

forth his theories on its fundamental aesthetic principles. This work was expanded in a second edition of 1776 and the work made Winckelmann a European celebrity. This classic text gave birth to late eighteenth-century neoclassicism, and its influence on writers and philosophers, such as Lessing, Herder and Goethe, was enormous. The only complete English version of this work is G. Henry Lodge's translation of 1880 which is reprinted here and includes a life of Winckelmann. The majority of other essays by Winckelmann likely to be of interest to English-speaking audiences are included in the first volume reprinted here. Six of these essays were originally translated by Henry Fuseli, the Swiss critic and painter. Curtis Bowman, as well as writing a new introduction that contextualizes Winckelmann's importance for the modern reader, has added two new translations of Winckelmann's art critical essays, neither of which have been fully available to English readers before. This set will be of interest to Western art historians, German studies and aesthetics scholars by providing English-speaking readers with all of Winckelmann's most important writings on art.
