Modelling in Engineering 2020: Applied Mechanics Arkadiusz Mężyk 2021-02-12 This book includes the outcomes of the 59th Symposium "Modelowanie w Mechanice" (Engineering Modelling in Mechanics) held in Ustroń from 22 February to 26 February 2020. The International Conference has an over 58-year-old history and is organized by the Department of Theoretical and Applied Mechanics of Silesian University of Technology under the patronage of the Polish Society of Theoretical and Applied Mechanics, Gliwice Branch. Subjects of the conference are modelling of mechatronic systems, machinery dynamics, control systems, sensitivity analysis and optimization, numerical modelling and experimental methods in mechanics, biomechanics, heat flow analysis, fluid mechanics, etc. The papers are dealing with interdisciplinary problems in which mechanical phenomena are of decisive importance. The potential reader of this book will find their set of papers concentrated on the use of computer-aided design, virtual modelling, numerical simulations, fast prototyping and experimental tests of mechanical systems. It is an area of versatile and interdisciplinary research trends with one of the mainstreams focusing on applied mechanics.

New Trends in Medical and Service Robots

Hannes Bleuler 2015-11-12 Medical and Service Robotics integrate the most recent achievements in mechanics, mechatronics, computer science, haptic and teleoperation devices together with adaptive control algorithms. The book includes topics such as surgery robotics, assist devices, rehabilitation technology, surgical instrumentation and Brain-Machine Interface (BMI) as examples for medical robotics. Autonomous cleaning, tending, logistics, surveying and rescue robots, and elderly and healthcare robots are typical examples of topics from service robotics. This is the Proceedings of the Third International Workshop on Medical and Service Robots, held in Lausanne, Switzerland in 2014. It presents an overview of

current research directions and fields of interest. It is divided into three sections, namely 1) assistive and rehabilitation devices; 2) surgical robotics; and 3) educational and service robotics. Most contributions are strongly anchored on collaborations between technical and medical actors, engineers, surgeons and clinicians. Biomedical robotics and the rapidly growing service automation fields have clearly overtaken the "classical" industrial robotics and automatic control centered activity familiar to the older generation of roboticists.

The Future of Industry Andrea Appolloni

2024-11-25 This book offers a selection of the best papers presented at the annual International Scientific Conference "Digital Transformation in Industry: Trends, Management, Strategies," held by the Institute of Economics of the Ural Branch of the Russian Academy of Sciences (Ekaterinburg, Russia) on October 25-27, 2023. The main focus of the book is on Industry 5.0, a new paradigm for industrial development related to the humanization of technology and the sustainable development of industrial ecosystems. Industry 5.0 is not a technological revolution but a value-based initiative that drives technological transformation by establishing the primacy of human value and creating value for humans. Key topics include the cross-industry potential of Industry 5.0, the humanization of industrial technologies, the transition from Industry 4.0 ecosystems to Industry 5.0, the achievement of sustainability in the process of digital transition, assessing the impact of industrial digital transformation on society and the environment, regional practices for digital transformation, digital transformation strategies of industrial enterprises, HR strategies for the digital transition of industry, among others. Due to the scientific pluralism of the topics covered, the book is valuable to economists, researchers, and managers in industry and finance.

Rob|Arch 2012 Sigrid Brell-Cokcan 2013-12-16

This volume collects about 20 contributions on the topic of robotic construction methods. It is a proceedings volume of the robarch2012

symposium and workshop, which will take place in December 2012 in Vienna. Contributions will explore the current status quo in industry, science and practitioners. The symposium will be held as a biennial event. This book is to be the first of the series, comprising the current status of robotics in architecture, art and design.

Advanced Human-Robot Collaboration in Manufacturing Lihui Wang 2021-06-10 This book presents state-of-the-art research, challenges and solutions in the area of human-robot collaboration (HRC) in manufacturing. It enables readers to better understand the dynamic behaviour of manufacturing processes, and gives more insight into on-demand adaptive control techniques for industrial robots. With increasing complexity and dynamism in today's manufacturing practice, more precise, robust and practical approaches are needed to support real-time shop-floor operations. This book presents a collection of recent developments and innovations in this area, relying on a wide range of research efforts. The book is divided into five parts. The first part presents a broad-based review of the key areas of HRC, establishing a common ground of understanding in key aspects. Subsequent chapters focus on selected areas of HRC subject to intense recent interest. The second part discusses human safety within HRC. The third, fourth and fifth parts provide in-depth views of relevant methodologies and algorithms. Discussing dynamic planning and monitoring, adaptive control and multi-modal decision making, the latter parts facilitate a better understanding of HRC in real situations. The balance between scope and depth, and theory and applications, means this book appeals to a wide readership, including academic researchers, graduate students, practicing engineers, and those within a variety of roles in manufacturing sectors.

Высокие технологии в современной науке и технике В сборнике представлены материалы по следующим направлениям исследований: технологии материалов новых поколений и наноматериалов; оптические технологии; органическая химия и биотехнологии; рациональное использование минеральных и водных ресурсов; проблемы надежности машиностроения и машиностроительные
