Tradition through Modernity

Pertti J. Anttonen 2018-03-14

In their study of social practices deemed traditional, scholars tend to use the concept and idea of tradition as an element of meaning in the practices under investigation. But just whose meaning is it? Is it a meaning generated by those who study tradition or those whose traditions are being studied? In both cases, particular criteria for traditionality are employed, whether these are explicated or not. Individuals and groups will no doubt continue to uphold their traditional practices or refer to their practices as traditional. While

they are in no way obliged to explicate in analytical terms their criteria for traditionality, the same cannot be said for those who make the study of traditions their profession. In scholarly analysis, traditions need to be explained instead of used as explanations for apparent repetitions and replications or symbolic linking in social practice, values, history, and heritage politics. This book takes a closer look at 'tradition' and 'folklore' in order to conceptualize them within discourses on modernity and modernism. The first section discusses 'modern' and 'traditional' as modern concepts and the study of folklore as a modern trajectory. The underlying tenet here is that non-modernity cannot be represented without modern mediation, which therefore makes the representations of non-modernity epistemologically modern. The

second section focuses on the nation-state of Finland and the nationalistic use of folk traditions in the discursive production of Finnish modernity and its Others. The insights are applicable worldwide in discussions on cultural representation.

Religious Pluralism and Civil Society Wade Clark Roof 2007-06-27 Organized into three major topics, the articles in this volume delve into this urgent topic of our day and offer valuable insights in the following areas: I. Broad Perspectives - Providing a solid foundation, this opening section lays the groundwork for clarifying this complex issue. II. Region and Religion - The papers in this section point to the importance of regional history and culture in shaping differing styles of pluralism within America. III. Minority & Immigrant Experiences - Focusing on contemporary immigrant and minority groups in the United States, these articles reflect on the experiences of Muslims, Orthodox Jews, and Latino

religions as well as the role of interfaith leaders in the 2005/2006 immigration reform debate. IV. Institutional Patterns - Examining creative ways that pluralism is flourishing within the United States, these articles provide a framework for future interfaith dialog. Social scientists, religious scholars, policy makers, and the informed public will find this volume of *The ANNALS* to be a valuable resource that distills this complex and sometimes cloudy issue of religious pluralism.

Discourses of Fusion and Crossing Jamie Shinhee Lee 2005

The Study of Africa: Disciplinary and Interdisciplinary encounters Paul Tiyambe Zeleza 2006 This is the first of a two-volume work which takes stock of the study of Africa in the twenty-first century: its status, research agenda and approaches, and place. It is divided into two parts, the first on the academic disciplines and African Studies, the second on interdisciplinary studies.

The Formations of Modernity
Bram Gieben 1993-01-04

Formations of Modernity is a major introductory textbook offering an account of the important historical processes, institutions and ideas that have shaped the development of modern societies. This challenging and innovative book 'maps' the evolution of those distinctive forms of political, economic, social and cultural life which characterize modern societies, from their origins in early modern Europe to the nineteenth century. It examines the roots of modern knowledge and the birth of the social sciences in the Enlightenment, and analyses the impact on the emerging identity of 'the West' of its encounters through exploration, trade, conquest and colonization, with 'other civilizations'. Designed as an introduction to modern societies and modern

sociological analyses, this book is of value to students on a wide variety of social science courses in universities and colleges and also to readers with no prior knowledge of sociology. Selected readings from a broad range of classical writers (Weber, Durkheim, Marx, Freud, Adam Smith, Montesquieu, Hobbes, Locke, Rousseau) and contemporary thinkers (Michael Mann, E.P. Thompson, Edward Said) are integrated in each chapter, together with student questions and exercises.
