Task-Based English Language Teaching in the Digital Age Valentina Morgana 2023-06-15 This book illustrates the developments of task-based language teaching (TBLT) approaches in relation to the evolution of digital technologies. It highlights how technology-mediated TBLT principles can support English as a Foreign Language (EFL) learning and contribute to understanding new classroom dynamics. Drawing from the key theoretical concepts of TBLT, the author discusses the integration of tasks and technologies from a secondary education perspective, which is often under-represented in the TBLT literature. Morgana looks at how the EFL secondary classroom has been recently re-conceptualised as a social place whose boundaries go far behind the traditional school settings. This book provides theoretical approaches and classroom implementation practices by presenting four case studies on the different L2 skills (reading, writing, listening and speaking). The volume is organised into two main sections. The first section focuses on the theoretical approaches to TBLT and highlights the key concepts behind this methodology. This section also looks at the recent development of a technology-mediated TBLT framework and its implementations in various EFL educational contexts. The second section presents four case studies of secondary-school EFL learners in Italy. Each case study focuses on a different language skill, providing examples of classroom practices in both blended and online learning settings. Pedagogical recommendations for teachers are provided at the end of each case study. The book adopts a multimodal approach and aims at providing scholars in applied linguistics and TBLT practitioners with theories and implementation practices to understand the ways technologies are shaping tasks and mediating students' learning processes.

The Bookman 1901

Contemporary Second Language Assessment Jayanti Veronique Banerjee 2016-06-30 Includes chapters on key aspects of second language assessment such as test construct, diagnosis, exam design, and the growing range of public policy, social and ethical issues. Each of the contributors is an expert in their area; some are established names while others are talented newcomers to the field. The chapters present new research or perspectives on traditional concerns such as test quality; fairness and bias; the testing of different language skills; the needs of different groups of examinees, including English language learners who need to take content tests in English; and the use of language assessments for gate-keeping purposes. The volume demonstrates how language assessment is informed by and engages with neighbouring areas of applied linguistics such as technology and language corpora. The book represents the best of current practice in second language assessment and, as a one volume reference, will be invaluable to students and researchers looking for material that extends their understanding of the field.
