Social Engineering Robert W. Gehl 2022-03-08 Manipulative communication—from early twentieth-century propaganda to today’s online con artistry—examined through the lens of social engineering. The United States is awash in manipulated information about everything from election results to the effectiveness of medical treatments. Corporate social media is an especially good channel for manipulative communication, with Facebook a particularly willing vehicle for it. In *Social Engineering*, Robert Gehl and Sean Lawson show that online misinformation has its roots in earlier techniques: mass social engineering of the early twentieth century and interpersonal hacker social engineering of the 1970s, converging today into what they call “masspersonal social engineering.” As Gehl and Lawson trace contemporary manipulative communication back to earlier forms of social engineering, possibilities for amelioration become clearer. The authors show how specific manipulative communication practices are a mixture of information gathering, deception, and truth-indifferent statements, all with the instrumental goal of getting people to take actions the social engineer wants them to. Yet the term “fake news,” they claim, reduces everything to a true/false binary that fails to encompass the complexity of manipulative communication or to map onto many of its practices. They pay special attention to concepts and terms used by hacker social engineers, including the hacker concept of “bullshitting,” which the authors describe as a truth-indifferent mix of deception, accuracy, and sociability. They conclude with recommendations for how society can undermine masspersonal social engineering and move toward healthier democratic deliberation.

Radial Journalism Alexandra Kitty 2023-03-28 This innovative book infuses journalism, psychology, sociology and political science to create a form of empirical and accessible research which allows journalists to

move beyond their traditional roles as chronographers to active experimenters and creators of new systems of literacies. This will allow society to report on complex matters across different groups and go beyond traditional media to disseminate information depending on resources and confines. Radial journalism is an empirical method of journalism which goes beyond our traditional concepts of the profession: from creating currency to public inquiries, libraries, and academic centres, radial journalism functions by using harmonized literacies to map an environment’s positive momentum to create novel and innovative solutions. By focussing on an environment’s positive momentum, radial journalism allows anything to become a medium for the message: from an academic study to a speech to graffiti. This exciting new book demonstrates the power and triumph of empirical thought to show readers how to inform objectively to find new paths and solutions to even the most troublesome of crisis.

The Malkus Artifacts are deadly machines, wielded as weapons of absolute power by an ancient interstellar tyrant and scattered across the Alpha Quadrant when he was overthrown. Thousands of years later, in 2151, they are discovered by Captain Jonathan Archer of the Starship Enterprise, and all Starfleet vessels are warned to be vigilant for these

most lethal devices. . . One hundred years later, Captain James T. Kirk of the USS Enterprise and Commodore Matt Decker of the USS Constellation come across the first artifact on the plague-ravaged colony world of Proxima II. . . One hundred years after that, Commander Benjamin Sisko of space station Deep Space Nine finds himself pitted against the Bajoran terrorist Orta, in a battle for far more than the future of Bajor, when the second artifact falls into dangerous and destructive hands.

Kyoto a Cultural Guide John H. Martin 2012-10-16 Children turned emperor, emperors turned priest, and priests turned poet are just a few of the colorful characters described in *Kyoto: A Cultural Guide*. The fascinating facts, larger-than-life characters and grand events described within offer abundant proof that, more than just a treasure house of shrines and temples, Kyoto is indeed one of the most enticing cities in the world. For example, Benkei, an eight-foot-tall monk with a wildly combative nature, was defeated on the Gojo Bridge by a voting warrior who had received his training in swordsmanship from a tengu goblin. Benkei's defeat is memorialized at Kyoto's Kiyomizu-dera temple in the form of an oversize iron staff and gela created by a blind blacksmith. Oishi entered into a life of debauchery at the Ichiriki tea house in Gion with the sole intention of avenging the disgrace of his former master. After gathering together 46 other samurai, he exacted his revenge. Thus the tale of *The Forty Seven Ronin* was born. A guidebook to 14 walking tours, *Kyoto: A Cultural Guide* is also a kaleidoscopic reference and resource book certain to please long-term residents and first-time travelers.

Anthropological Reformations - Anthropology in the Era of Reformation

Anne Eusterschulte 2015-10-28 The aim of the volume is to engage in an interdisciplinary discussion about the establishment and debates on anthropological concepts and their changes in the age of Reformation: How do anthropological concepts touch theological questions such as the freedom of will or the human likeness to God? In which ways is there a reflection on emotions? How is scientific knowledge received by theologians? How is contemporary thought on the *conditio humana* presented in literature and poetry? The volume combines selected papers of relevant experts with the research work of young graduate or postgraduate scholars. It tries to encourage a transdisciplinary, international discussion focused on exemplary case studies as well as systematic points of view. Thanks to the outstanding commitment of all participants of the conference we are able to present the results of this discussion, a rich and comprehensive spectrum of research work, which will encourage further research.
