The Combat Soldier Anthony King 2013-02-21 How do small groups of combat soldiers maintain their cohesion under fire? This question has long intrigued social scientists, military historians, and philosophers. Based on extensive research and drawing on graphic analysis of close quarter combat from the Somme to Sangin, the book puts forward a novel and challenging answer to this question. Against the common presumption of the virtues of the citizen soldier, this book claims that, in fact, the infantry platoon of the mass twentieth century army typically performed poorly and demonstrated low levels of cohesion in combat. With inadequate time and resources to train their troops for the industrial battlefield, citizen armies typically relied on appeals to masculinity, nationalism and ethnicity to unite their troops and to encourage them to fight. By contrast, cohesion among today's professional soldiers is generated and sustained quite differently. While concepts of masculinity and patriotism are not wholly irrelevant, the combat performance of professional soldiers is based primarily on drills which are inculcated through intense training regimes. Consequently, the infantry platoon has become a highly skilled team capable of collective virtuosity in combat. The increasing importance of training, competence and drills to the professional infantry soldier has not only changed the character of cohesion in the twenty-first century platoon but it has also allowed for a

wider social membership of this group. Soldiers are no longer included or excluded into the platoon on the basis of their skin colour, ethnicity, social background, sexuality or even sex (women are increasingly being included in the infantry) but their professional competence alone: can they do the job? In this way, the book traces a profound transformation in the western way of warfare to shed light on wider processes of transformation in civilian society. This book is a project of the Oxford Programme on the Changing Character of War.

Iraqi Security Forces Anthony H. Cordesman

2005-11-30 Author, radio commentator, and sometime US government agent, Cordesman (Center for Strategic and International Studies) argues that the US must construct Iraqi military, security, and police forces as an essential element of nation-building and stability, and presents a program for doing so. Most of the book is analysis of the planning and execution of the 2003 US invasion of Iraq and the subsequent occupation and resistance to it. Then he looks at The Iraqi View, the evolving nature of the conflict and the risk of sectarian and ethnic conflict, before laying out his own ideas in the final chapter.
