Indigenous Archaeology in India Ajay Pratap 2009 In this book the author presents his findings connected with the archaeology of the Rajmahal Hills (Jharkhand State, north-eastern India), and discusses the wider relevance of his surface archaeology approach to the archaeology of the rest of the tribal areas of India. He also approaches the issue of a gendered study of rock-art and landscape archaeology both of which again fall within the domain of tribal archaeology proper. The author also has a keen interest in the theory of history and archaeology and writes about this subject in several of the chapters. Further sections engage in theoretical debates regarding the relationship between history and archaeology. The study concludes that it may be possible to delineate a separate domain for the archaeology of the tribal areas - called 'subaltern archaeology'. The present work breaks further new ground in historical and archaeological research in terms of the fieldwork undertaken in the Rajmahal Hills and elsewhere in India: the novel idea being that the tribal population of India does have a long-term past - an issue thus far relatively rarely investigated.

Handbook of Archaeological Methods Herbert D. G. Maschner 2005 The Handbook of Archaeological Methods comprises 37 articles by leading archaeologists on the key methods used by archaeologists in the field, in analysis, in theory building, and in managing cultural resources. The book is destined to become the key reference work for archaeologists and their advanced students on contemporary archaeological methods.

The Sisters of Nazareth Convent Ken Dark 2020-09-16 This book transforms archaeological knowledge of Nazareth by publishing over 80 years of archaeological work at the Sisters of Nazareth convent, including a detailed re-investigation in the early twenty-first century under the author's direction. Although one of the world's most famous places and of key importance to understanding early Christianity, Nazareth has attracted little archaeological attention. Following a chance discovery in the 1880s, the site was initially explored by the nuns of the convent themselves - one of the earliest examples of a major programme of excavations initiated and directed by women - and then for decades by Henri Senès, whose excavations (like those of the nuns) have remained almost entirely unpublished. Their work revealed a complex sequence, elucidated and dated by twenty-first century study, beginning with a partly rock-cut Early Roman-period domestic building, followed by Roman-period quarrying and burial, a well-preserved cave-church, and major surface-level Byzantine and Crusader churches. The interpretation and broader

implications of each phase of activity are discussed in the context of recent studies of Roman-period, Byzantine, and later archaeology and contemporary archaeological theory, and their relationship to written accounts of Nazareth is also assessed. The Sisters of Nazareth Convent provides a crucial archaeological study for those wishing to understand the archaeology of Nazareth and its place in early Christianity and beyond.

Archaeological Chemistry A Mark Pollard 2020-08-28 The use of chemistry in archaeology can help archaeologists answer questions about the nature and origin of the many organic and inorganic finds recovered through excavation, providing valuable information about the social history of humankind. This textbook tackles the fundamental issues in chemical studies of archaeological materials. Examining the most widely used analytical techniques in archaeology, the third edition of this comprehensive textbook features a new chapter on proteomics, capturing significant developments in protein recognition for dating and characterisation. The textbook has been updated to encompass the latest developments in the field. The textbook explores several archaeological investigations in which chemistry has been employed in tracing the origins of or in studying artefacts, and includes chapters on obsidian, ceramics, glass, metals and resins. It is an essential companion to students in archaeological science and chemistry, as well as to archaeologists, and those involved in conserving human artefacts.

Collins Dictionary of Archaeology Paul G. Bahn 1993 In the preface to this new dictionary of archaeology, Dr. Paul Bahn describes his approach to compiling this work as " ... an attempt to drag the concept of the

archaeological dictionary kicking and screaming into the 1990s." And he has done so without losing any of the traditional power of a good dictionary. Endeavoring to pay particular attention to theoretical and technical terms not usually included in similar dictionaries, Dr. Bahn was aided by a contributors' panel of 16 regional experts. The resulting dictionary of nearly 3,000 entries offers definitions of the archaeological world's most recent terms and theories and covers techniques, sites, and time-honored nomenclature as well. Biographical entries on archaeologists of the past further enhance the scope of the dictionary, giving the reader a sense of the historical development of the discipline. Readers will also benefit from the abundant cross-references that interconnect related entries and from the line drawings that accompany many of the entries. Forty-seven pages of maps and a list of titles for further reading arranged by topic complete this new research tool and field guide that will capably serve the broad spectrum of the archaeologically interested public.

Mediterranean Urbanization 800-600 BC Robin Osborne 2005-10-27 Urban life as we know it in the Mediterranean began in the early Iron Age: settlements of great size and internal diversity appear in the archaeological record. This collection of essays offers for the first time a systematic discussion of the beginnings of urbanization across the Mediterranean, from Cyprus through Greece and Italy to France and Spain. Leading scholars in the field look critically at what is meant by urbanization, and analyse the social processes that lead to the development of social complexity and the growth of towns.
