

Counselling Skills And Social Work Practice

Choices Bob Shebib 2003 This reader-friendly practice text emphasizes intelligent decision-making in the use of interviewing and counseling skills and provides strategies for professionals in social work and counseling. Based on a four-phase model of counseling, each chapter in *Choices* explores key concepts with theory, case studies, annotated practice examples, conversations, and responses to frequently asked questions. The text lends students and professionals the ability to use or forego particular skills based on the unique needs of individuals and situations. *Choices* promotes a "strengths approach" to clients by stressing the importance of counselor self-awareness and cultural competence.

Introduction to Social Work and Social Welfare Charles Zastrow 1993

Counselling Skills in Social Work Elizabeth Marie Thomas 2001

The Practice of Social Work Charles Zastrow 1992 The focus of this thoroughly revised and updated edition is on the theoretical and practical knowledge that students need to do the tasks of a beginner-level social worker. It is designed for student-in-practice courses, and those preparing for, or already in, field placement.

An Introduction to Social Work Practice in Canada Shankar A. Yelaja 1985

Web-Based Education in the Human Services Richard Schoech 2014-02-25 A much-needed look at innovative and effective methods for creating virtual learning environments for human services Web-Based

Education in the Human Services reflects the vitality and diversity of Web-based courses currently delivered within human services. Unlike previous texts that have combined technologies such as Interactive Television (ITV) and two-way audio where Web involvement was minimal, this unique book focuses on Web-based models, tools, and techniques used in courses where the majority of the content is delivered online. The book's contributors emphasize the social aspects of learning, examining topical areas not usually associated with Web-based education as they remind us of the need to move beyond the similarities between WBE and face-to-face (FTF) approaches. *Web-Based Education in the Human Services* documents a course delivery method coming of age in its desire to create virtual learning environments that incorporate a variety of techniques and strategies. These environments use concepts and tools beyond what packages such as WebCT currently offer, highlighting the power of designing a complete Web-based curriculum, rather than viewing each course separately. Many of the most successful approaches presented in this invaluable book don't involve sophisticated tools or programming, but the creative design of interactive scenarios, emotional content, and feedback mechanisms that reinforce the instructor's role as the crucial ingredient for success. *Web-Based Education in the Human Services* examines: adult learning theories teaching practice skills through Web-based technology how to bridge the gap between theory and practice faculty perceptions of the effectiveness of Web-based instruction compared to face-to-face instruction the accessibility of Web-based education the significance of emotion in learning Web-based delivery of a graduate professional training program the creation, delivery, and evaluation of a pilot course using Blackboard 6 the development of a Web-based undergraduate child welfare course the use of Web-based video clips for counselor skills training the design, development, pilot, and revision of a Web-based social work practice

course an online format for agency-based field instruction the design of a Web-based graduate program in counseling psychology and much more! Web-Based Education in the Human Services is an invaluable resource for social work and human services educators, including education, nursing, and psychology, Web-course developers, and college and university administrators.

Skills for Social Work Practice Andy Mantell 2013-09-25 Social work skills are essential to good practice and more important than ever following changes to the social work curriculum. Students must be able to demonstrate knowledge of core skills within policy, law as well as demonstrating empathy and good communication. This fully-revised student guide, previously published as Social Work Skills with Adults, will help to cement these skills and includes chapters on intervention, empowerment and advocacy, skills for collaborative working, self-presentation and much more. This book will equip social work students with the skills to meet the new and perennial challenges to achieving empowering practice with carers and people who use services. There are chapters on working with families, communities and individuals and how social policy affects all of these groups. Case studies and reflective exercises are used throughout to explore these issues and help link theory to practice.

Aspects of Social Work and Palliative Care Jonathan Parker 2005 This text provides a wide range of central issues in palliative care social work practice and brings together a number of authors with expertise in their particular areas of practice.

The Practice of Social Work Charles Zastrow 1985

Using Counselling Skills in Social Work Sally Riggall 2012-05-18 This practical book enables students to develop key counselling skills that can help to enhance their practice and help to place the service-user at the centre of the decision making process. Relationship building will be a key area of the text and relevant counselling skills for achieving this in social work settings such as empathic responding will be illustrated in detail together with examples of dialogue and analysis of interventions. The role and importance of self-awareness will be discussed together

with various exercises to develop the readers' own knowledge of themselves.

Counselling Skills for Social Work Lisa Miller 2005-12-15 Focusing on eight principle therapeutic models of counselling skills, this text illustrates how the underlying theories can be applied to professional social work practice.

Counselling Skills in Social Work Practice Janet Seden 2005-02-16 ·In what ways is counselling relevant to contemporary social work? ·How do counselling skills integrate with social work roles and responsibilities? This book examines these skills and their applicability, drawing from social work and counselling theories and methods using clear, practical examples. Skills are discussed with reference to social work knowledge and values illustrating how, when used competently, contextually and sensitively they can appropriately underpin good social work practice. Questions and activities for self development are linked to the practices discussed. This new edition of Counselling Skills in Social Work Practice has been thoroughly revised to reflect the National Occupational Standards for social work which identify the importance of communication skills and a developmental understanding of people in their social contexts. The chapters are linked to the six key roles for social work practice. This book builds on the strengths of the first edition, as well as addressing the challenges of practice in relevant legislative and policy contexts. The book includes: ·Evidence of how the competencies which underpin counselling practice are directly transferable to effective social work practice ·Practical advice on communication skills ·Examples of how to build effective working relationships; a whole chapter is now devoted to the specific skills required for working within inter-agency and multi-disciplinary teams This book is key reading on the subject of ethical and effective social

work for those teaching, studying or practising in the field.

Counselling Skills for Nurses Verena Tschudin 1982

Counselling and Social Work Judith Brearley 1995 Social work is perennially in the public eye, and interest in counselling has never been greater. But these activities are changing rapidly in response to new needs and resource limitations, and their complexity is not easy to grasp even by those involved. This book looks at how the specific context of social work shapes the nature of counselling in terms of both opportunities and constraints. How can social workers integrate the counselling dimension of the job with other roles expected of them? What training, supervision and support do they need? How do they collaborate with other professions? Above all, how do they effectively deal with people's private troubles, subjective feelings and disrupted relationships (the traditional concern of counselling), whilst simultaneously fulfilling statutory requirements and involving themselves in the contentious politics of social provision? A disturbing situation is revealed, in which such role conflicts, coupled with media pressure and policy changes, are undermining the professional competence and confidence of social workers, thus depriving the most needy people of help. A fresh understanding of insights from counselling is seen as providing a partial answer to this serious state of affairs.

Counselling Skills for Social Workers Hilda Loughran 2018-11-20 Counselling skills are very powerful. Really listening and providing compassionate empathy without judging is a core part of social work practice with service users. This book provides a theoretically informed understanding of the core skills required to provide counselling interventions that work. It provides detailed discussion of three core skills which are identified as: talking and responding, listening and observing and thinking. Over 11 chapters these core skills are described in terms of what they mean, how they can be learned and developed, how they can be used and misused and, most importantly, how specific skills can be employed in a coherent and evidence-informed counselling approach. Loughran also looks in detail at the skills required to deliver interventions consistent with three approaches: Motivational Interviewing, Solution-Focused Work and Group work. Illustrative case examples and exercises offer further opportunities for reflection and exploration of self-awareness as well as for practising and enhancing skills development, thus making the book required reading for all social work students, professionals looking to develop their counselling skills and those working in the helping professions more generally. Terms such as social worker, therapist and counsellor will be included as they inform counselling skills in social work.
