*International Relations from the Global South*

Arlene B. Tickner 2020-05-21 This exciting new textbook challenges the implicit notions inherent in most existing International Relations (IR) scholarship and instead presents the subject as seen from different vantage points in the global South. Divided into four sections, (1) the IR discipline, (2) key concepts and categories, (3) global issues and (4) IR futures, it examines the ways in which world politics have been addressed by traditional core approaches and explores the limitations of these treatments for understanding both Southern and Northern experiences of the "international." The book encourages readers to consider how key ideas have been developed in the discipline, and

through systematic interventions by contributors from around the globe, aims at both transforming and enriching the dominant terms of scholarly debate. This empowering, critical and reflexive tool for thinking about the diversity of experiences of international relations and for placing them front and center in the classroom will help professors and students in both the global North and the global South envision the world differently. In addition to general, introductory IR courses at both the undergraduate and graduate levels it will appeal to courses on sociology and historiography of knowledge, globalization, neoliberalism, security, the state, imperialism and international political economy.

*Strategic Culture(s) in Latin America* Félix E. Martín 2023-11-17 Strategic Culture(s) in Latin America elucidates why many state actors in the Global South exhibit a remarkable degree of policy continuity in their external behavior despite structural incentives for change. This book contends that the theoretical notion of strategic culture is instructive to explain such a puzzle. It extends the application of strategic culture beyond the policy of nuclear deterrence among great powers into other equally strategic areas of policy, such as diplomacy, political economy, regional international institutions, legal norms, politico-military institutions, and different security agendas beyond war and peace, for example, the illicit drug trade and peacekeeping missions. The overall contribution of this book is three-fold: first, it rescues, updates, and expands the original conceptual and theoretical dimensions of strategic culture. Second, it extrapolates further theoretical implications of the concept through its

application to five policy domains in Latin America beyond the original application of the strategic culture perspective to nuclear weapons strategy among great powers in the 1970s. Third, it draws together the theoretical and policy implications of the strategic cultures in Latin America and identifies possible applications for other peripheral, non-great power policy areas and issues in the Global South. This book will be of interest to academics, graduate and undergraduate students, policy analysts, and practitioners of Latin American Studies, International Relations Theory, and Security Studies.

*Routledge Handbook on Global China*

Maximilian Mayer 2024-10-22 This innovative Routledge Handbook sheds light on the complex and transformative nature of Global China, prompting a re-evaluation of existing theories on global and regional dynamics. It encourages theoretical innovation, methodological reflection and analytical transformation, providing new

avenues for critical engagement with China's global interactions. The chapters propose three key commitments for the study of Global China: Advocating for diverse viewpoints and non-binary frameworks, employing nuanced analysis to understand Beijing's transnational relations and utilizing alternative methodological approaches to explore different trajectories for China in international affairs. The Handbook also identifies and avoids epistemic traps that hinder the understanding of Global China, such as othering and strategic narcissism. It suggests five analytical frameworks related to relationality, global capitalist processes, language and discourse power, planetary-scale modernization and experimentalism to guide future research. By adopting these frameworks, researchers can gain a deeper understanding of the multifaceted factors shaping Global China within the broader global context of cooperation, competition and crisis. Introduction, Chapter 21, and Epilogue of this book is freely available as a

**Decentering IR** Zeynep Gulsah Capan 2015  
The thesis aims to underline the Eurocentrism of the field of international relations and the way in which the conceptualizations and writings of history contribute to the reproduction of specific narratives of international relations. The thesis argues that the 'decentering' of the field should not only focus on questioning the narratives produced in the center but also focus on the reproduction of Eurocentrism in the 'periphery'. The thesis through the example of the 'Cold War' discusses the way in which the 'Cold War' has been written and the presuppositions about international relations that has been produced and reproduced in the center and in the periphery.

**Understandings of Russian Foreign Policy**  
Ted Hopf 1999 Scholars from Asia, Europe, and

North America working with the support of the Finnish Institute of International Affairs combine their efforts to bring us new insights into how Russia has conducted its foreign affairs since the fall of Communism. Drawing on both archival sources and interviews, they cover such major issues as Russia's decision to use military force in Chechnya, its reactions to NATO expansion, and its emergent relations with Japan and East Asia. The contributors are Eunsook Chung, Henrikki Heikka, Ted Hopf, Andrea Lopez, Hiroshi Kimura, Sergei Medvedev, and Christer Pursiainen.

**Centerstage** Leon Carl Brown 1990 The 20 essays in this volume are based on public lectures at Princeton on the broad sweep of American diplomatic history since World War II. The book does not limit itself to U.S.-Soviet relations, but includes essays on America's role in the postwar international economy as well as U.S. relations with Third World regions. Some of the essays deal with individuals such as Kennan,

Dulles, and Kissinger, and some with concepts and functions. ISBN 0-8419-1265-3: \$49.50; ISBN 0-8419-1270-X (pbk.): \$24.95.

Routledge Handbook of Interpretive Political Science Mark Bevir 2015-07-03 Interpretive political science focuses on the meanings that shape actions and institutions, and the ways in which they do so. This Handbook explores the implications of interpretive theory for the study of politics. It provides the first definitive survey of the field edited by two of its pioneers. Written by leading scholars from a range of disciplinary backgrounds, the Handbook's 32 chapters are split into five parts which explore: the contrast between interpretive theory and mainstream political science; the main forms of interpretive theory and the theoretical concepts associated with interpretive political science; the methods used by interpretive political scientists; the insights provided by interpretive political science on empirical topics; the implications of interpretive political science for professional

practices such as policy analysis, planning, accountancy, and public health. With an emphasis on the applications of interpretive political science to a range of topics and disciplines, this Handbook is an invaluable resource for students, scholars, and practitioners in the areas of international relations, comparative politics, political sociology, political psychology, and public administration.

*Close Encounters of Empire* Gilbert Michael Joseph 1998 New concerns with the intersections of culture and power, historical agency, and the complexity of social and political life are producing new questions about the United States' involvement with Latin America. Turning away from political-economic models that see only domination and resistance, exploiters and victims, the contributors to this pathbreaking collection suggest alternate ways of understanding the role that U.S. actors and agencies have played in the region during the

postcolonial period. Exploring a variety of nineteenth- and twentieth-century encounters in Latin America, these theoretically engaged essays by distinguished U.S. and Latin American historians and anthropologists illuminate a wide range of subjects. From the Rockefeller Foundation's public health initiatives in Central America to the visual regimes of film, art, and advertisements; these essays grapple with new ways of conceptualizing public and private spheres of empire. As such, *Close Encounters of Empire* initiates a dialogue between postcolonial studies and the long-standing scholarship on colonialism and imperialism in the Americas as it rethinks the cultural dimensions of nationalism and development.

*International Relations* Richard A. Higgott 1991  
*Decentering IR* Zeynep Gülşah Çapan 2015 The thesis aims to underline the Eurocentrism of the field of international relations and the way in which the conceptualizations and writings of history contribute to the reproduction of specific

narratives of international relations. The thesis argues that the 'decentering' of the field should not only focus on questioning the narratives produced in the center but also focus on the reproduction of Eurocentrism in the 'periphery'. The thesis through the example of the 'Cold War' discusses the way in which the 'Cold War' has been written and the presuppositions about international relations that has been produced and reproduced in the center and in the periphery.

**Strategic Narratives** Alister Miskimmon  
2014-02-18 Communication is central to how we understand international affairs. Political leaders, diplomats, and citizens recognize that communication shapes global politics. This has only been amplified in a new media environment characterized by Internet access to information, social media, and the transformation of who can communicate and how. Soft power, public diplomacy 2.0, network power – scholars and policymakers are concerned with understanding

what is happening. This book is the first to develop a systematic framework to understand how political actors seek to shape order through narrative projection in this new environment. To explain the changing world order – the rise of the BRICS, the dilemmas of climate change, poverty and terrorism, the intractability of conflict – the authors explore how actors form and project narratives and how third parties interpret and interact with these narratives. The concept of strategic narrative draws together the most salient of international relations concepts, including the links between power and ideas; international and domestic; and state and non-state actors. The book is anchored around four themes: order, actors, uncertainty, and contestation. Through these, Strategic Narratives shows both the possibilities and the limits of communication and power, and makes an important contribution to theorizing and studying empirically contemporary international relations. **Decentering Global Challenges in International Relations** Debora Valentina Malito 2025-08-21 This book examines contemporary global challenges from a decentering perspective, advancing an interdisciplinary conversation. International studies scholarship has become increasingly more interdisciplinary and multifocal, especially as the escalation of systemic ecological and economic crises, as well as social, and political challenges in the 21st century have required comprehensive ways of thinking and taking stock of existing ontological and epistemic limitations. A decentering approach is crucial to account for how interdependent relations across states and societies, regions and the globe, shape modernity and its global manifestations are, in an era of growing and persistent crises. The book explains why traditional hegemonic approaches to global challenges are problematic, and conceptualises what a

decentering approach to global challenges entails: a deconstruction of traditional and sedimented epistemic underpinnings (implying a rethinking of agency, time, geographies, norms, topics, and loci of public attention) but also an appreciation of the mutually constructed nature of the international. This book will appeal to students and scholars of international relations (IR) and international studies who are interested in decentering, as well as those working for civil society organisations (CSOs), NGOs, and think tanks.

**Occupying Political Science** E. Welty 2012-12-28 Occupying Political Science is a collection of critical essays by New York based scholars, researchers, and activists, which takes an unconventional look at the Occupy Wall Street movement through concepts found in the field of political science. Both normative and descriptive in its approach, Occupying Political Science seeks to understand not only the origins, logic, and prospects of the OWS movement, but

also its effect on political institutions, activism, and the very way we analyze power. It does so by asking questions such as: How does OWS make us rethink the discipline of political science, and how might the political science discipline offer ways to understand and illuminate aspects of OWS? How does social location influence OWS, our efforts to understand it, and the social science that we do? Through addressing topics including social movements and non-violent resistance, surveillance and means of social control, electoral arrangements, new social media and technology, and global connections, the authors offer a unique approach that takes seriously the implications of their physical, social and disciplinary location, in New York, both in relation to Occupy Wall Street, and in their role as scholars in political science.

**The External Action of the European Union**  
Sieglinde Gstöhl 2021-03-26 This groundbreaking new textbook offers extensive

coverage of EU External Action studies, from its major concepts to the key theories in the field. Over the past decades, the European Union has progressively developed into a significant global actor in an increasing number of policy fields. This long-awaited volume looks into different ways of conceptualizing the EU as a global actor, the processes and impact of EU external action, explanations offered by IR and integration theories, the discursive, normative, practice and gender 'turns', and the 'decentering agenda' for EU external action. The book offers a reader-friendly guidance on these various ways in which to study the EU as a global actor: each chapter introduces one concept, approach or theory and illustrates its application by a case study of EU external action. In drawing the different perspectives together, the book underscores that 'EU External Action Studies' is becoming an academic speciality in its own right. Written by leading experts, the volume will make essential reading for students, scholars and practitioners

of EU external action. EU External Action Studies nowadays attract attention from scholars and students in International Relations (IR), Foreign Policy Analysis and (interdisciplinary) EU Studies, as well as from practitioners.

Decentering International Relations Doctor Meghana Nayak 2013-04-04 *Decentering International Relations* seeks to actively confront, resist, and rewrite International Relations (IR), a heavily politicized field that is deeply centered in the North/West and privileges certain perspectives, pedagogies, and practices. Is it possible to break the chain of signifiers that always leads IR studies back to the US and its European allies? Through engagement with a variety of theories (ranging beyond the usual 'mainstream' versus 'critical/alternative' binary), and conversations with scholars, activists, and students, the authors invite the reader to participate in an accessible yet provocative experiment to decentre the North/West when we learn, study

and do IR. In particular, they examine how the pressing issues of 'human rights', 'globalization', 'peace and security', and 'indigeneity' are simultaneously normative inventions meant to sustain particular power structures and sites for insurgent and subversive attempts to live IR at the margins. Selbin and Nayak have written a remarkable and provocative re-envisioning of a globally important subject.
