**MEBIC 2021** Kabir Hassan 2021-12-14 This book is the proceeding of the Maritime, Economics, and Business International Conference (MEBIC 2021) that was successfully held on 24-25 September 2021 using an online platform. The conference was mainly organized by the Faculty of Economics Universitas Maritim Raja Ali Haji (FE UMRAH). This conference aims to provide a platform for academics and practitioners around the world to share ideas and knowledge, as well as promoting research in Blue Economy through paper presentation. The theme of MEBIC 2021 was “Marine-Sociopreneurship: Real Action for Blue Economy”. The papers are classified into 6 subthemes, namely Micro, Small, and Medium Enterprises; Blue Economy Supporting Ecosystems; Financial Institution for Blue Economy; Adaptive MICE (Meeting, Incentive, Convention, and Exhibition) Business; Islamic Financing Models for Micro, Small, and Medium Enterprises; and Utilization of Technology in Blue Economy. The proceeding consists of 17 high-quality papers that were selected. Aside from the high quality technical paper presentations, the technical program also featured a keynote speaker and six invited speakers. The keynote speaker was Dr. Sandiaga Salahuddin Uno (Minister of Tourism and Creative Economy, Republic of Indonesia). The invited speakers were Prof. Gunter Pauli from Zero Emissions Research & Initiatives (ZERI), Belgium; Prof. M. Kabir Hassan from University of New Orleans, USA; Prof. Henri Jean-Marie Dou from University of Aix-Marseille, France; Dr. Zhiwei Zhang from First Institute of Oceanography, China; Elvia R. Shauki, Ph.D. from University of South Australia, Australia; and Dr. M. Mahbubi Ali from International Institute of Advanced Islamic Studies, Malaysia. Finally, we would like to express the greatest thanks to all colleagues in the steering and organizing committee for their cooperation in administering and arranging the conference as well as reviewers for their academic works and commitment to reviewing papers.

You will continue to access your digital ebook products whilst you have your Bookshelf installed. For introductory courses in Information Systems or Management Information Systems. Connect essential MIS concepts to everyday life Essentials of MIS is an in-depth look at how today's businesses use information technologies and systems to achieve their corporate objectives. Current real-world business cases illustrate how companies have identified, and ultimately solved, key business challenges using information systems and technologies. Through the use of Essentials of MIS, students will be able to participate in, and even lead, management discussions of information systems for a firm. The 13th Edition consists of 12 chapters with hands-on projects that cover the most essential topics in MIS. In addition to the core text, this edition includes a Video Case Package consisting of 28 video case studies and 10 instructional videos to illustrate business uses of information systems, explain new technologies, and explore concepts. The knowledge and information in this book will be most valuable to students — regardless of major — throughout their business careers.

**Information Systems for Industrial**

**Engineering** MARK JOHN LADO 2026-01-19 A

Concepts-to-Design Approach Information Systems for Industrial Engineering is a structured and practice-oriented textbook designed to help Industrial Engineering

students, educators, and practitioners understand how information systems support modern organizational operations, decision-making, and process improvement—especially within the Philippine industrial context. Unlike books that focus only on technology, this text presents information systems as socio-technical systems that integrate people, processes, data, and technology. It emphasizes systems thinking and structured analysis, enabling learners to examine organizational problems methodically and design effective information-based solutions. The book follows a concepts-to-design progression, guiding readers from foundational theories to applied system modeling and project development. Each chapter links information systems principles directly to Industrial Engineering functions such as operations management, production planning, logistics, quality management, and productivity analysis.

**What's Inside the Book?** Part I - Foundations of Information Systems Introduces core concepts of information systems, including the distinction between IS and IT, system attributes, data-information-knowledge relationships, organizational system types (TPS, MIS, DSS), and systems frameworks relevant to Industrial Engineering practice. Part II - Systems Life Cycle and Methodologies Explains the Systems Development Life Cycle (SDLC), feasibility analysis, requirements determination, logical versus physical design, and major system development methodologies. Philippine-based manufacturing, SME, and LGU scenarios illustrate real-world application. Part III - Structured Analysis for Industrial Engineers Provides detailed coverage of structured analysis philosophy and tools, including context diagrams, Data Flow Diagrams (DFDs), data dictionaries, process specifications, decision tables, and decision trees. Emphasis is placed on process clarity, documentation discipline, and information flow analysis. Part IV - Applied Project and Integration Guides students through project proposal development, system modeling, presentation, and evaluation. This section strengthens analytical, documentation, and communication skills essential for academic projects and professional practice.

**Key Features**

**Business Intelligence and Big Data** Celina Olszak 2020-11-17 The twenty-first century is a time of intensifying competition and progressive digitization. Individual employees, managers, and entire organizations are under increasing pressure to succeed. The questions facing us today are: What does success mean? Is success a matter of chance and luck or perhaps is success a category that can be planned and properly supported? **Business Intelligence and Big Data: Drivers of Organizational Success** examines how the success of an organization largely depends

on the ability to anticipate and quickly respond to challenges from the market, customers, and other stakeholders. Success is also associated with the potential to process and analyze a variety of information and the means to use modern information and communication technologies (ICTs). Success also requires creative behaviors and organizational cleverness from an organization. The book discusses business intelligence (BI) and Big Data (BD) issues in the context of modern management paradigms and organizational success. It presents a theoretically and empirically grounded investigation into BI and BD application in organizations and examines such issues as: Analysis and interpretation of the essence of BI and BD Decision support Potential areas of BI and BD utilization in organizations Factors determining success with using BI and BD The role of BI and BD in value creation for organizations Identifying barriers and constraints related to BI and BD design and implementation The book presents arguments and evidence confirming that BI and BD may be a trigger for making more effective decisions, improving business processes and business performance, and creating new business. The book proposes a comprehensive framework on how to design and use BI and BD to provide organizational success.

### **Managing Digital Enterprise** Jun Xu

2014-10-10 This book describes the setup of digital enterprises and how to manage them, focusing primarily on the important knowledge and essential understanding of digital enterprise management required by managers and decision makers in organizations. It covers ten essential knowledge areas of this field: • Foundation of Digital Enterprise • Technology Foundation and Talent Management for Digital Enterprise • Digital Enterprise Strategy Planning and Implementation • B2C Digital Enterprise: E-tailing • B2C Digital Enterprise: E-Services • B2B Digital Enterprise and Supply Chain • Digital Platforms • Digital Marketing and Advertising • Digital Payment Systems • Mobile Enterprise Overall, this text provides the reader with the basics to understand the rapid development of digitization, facilitated by the dramatic advancements in digital technologies, extensively connected networks, and wider

adoption of computing devices (especially mobile devices), as more and more organizations are realizing the strategic importance of digitization (e.g., sustainable growth of the organization, competitive advantage development and enhancement) and are embarking on digital enterprise.

### *Business Essentials* Ronald J. Ebert 1998

Appropriate for Introduction to Business. The revision of Essentials continues building on the key ideas of price and length. Instructors will now have time to cover all the necessary topics and also use the various support materials. The new, briefer second edition continues to provide the "essentials" of business, but also includes more updated, current examples and references that help the student better apply his knowledge to real companies. Each chapter contains tables, photographs, and figures carefully chosen to illustrate, in a visually appealing way, the points and messages of the chapter. Important topics such as those presented in the following examples reinforce the "essentials" approach. Chapters 1 and 2 present business concepts to students and in Chapters 3, 4, & 5 the legal, ethical and global issues are introduced. Chapter 6, 7 & 8 explore the management side and Chapters 9 & 10 further discuss developing the human resource skills necessary to good employee relations. Chapter 12 expertly covers accounting and information systems. Chapters 13, 14 & 15 combine the marketing aspects of producing goods and services. Chapters 16 & 17 focus on the financial aspects of the banking, security, and investment community.

*Multichannel Marketing* Bernd W. Wirtz 2024-09-27 Increasing customer demands and innovations in digital sales require targeted management and flexible organisation of multiple sales channels. Multi-channel marketing can be used to achieve outstanding competitive advantages. This book provides a comprehensive and systematic overview of the fundamentals and management of multi-channel marketing. The book understands multi-channel marketing as an integrative marketing system with special consideration of digital technologies. "Multi-Channel-Marketing is with increasing frequency a key success factor for companies in competition for customers. Bernd Wirtz' textbook provides a clearly patterned, incorporated and theoretically funded overview for this purpose. The author excellently succeeded in illustrating in a descriptive way the considerable complexity and breadth of

applicability and contemporaneously establishing a high practical relevance.” Dr. Rainer Hillebrand, Member of the Supervisory Board Otto Group (2019-), Member of the Executive Board of the Otto Group for Strategy, E-Commerce, Business Intelligence (1999-2019) “Wirtz examines the whole path down from theoretical basic knowledge of Multi-Channel-Marketing right up to the practical realization. This book is a needed approach which is at the same time a reference book for specific issues. The Wirtz’ is essential for everyone who is concerned with this highly topical subject in his studies or in practice already.” Dr. Arno Mahlert, Chief Executive Officer Tchibo Holding AG (2004-2009), Member of the Board of Directors Peek&Cloppenburg KG and maxingvest AG
