I've opened VS Code's settings.json file many times, and each time I forgot where it was. If I go to File → Preferences → Settings, I get the graphical settings interface (screenshot). I want to open Are you sure you want to create JSON and not rather a JS object? Also, what parts of the object are supposed to be variables? How is the first part connected to the second part? If you really want to ... If you are reading the data from the Internet instead, the same techniques can generally be used with the response you get from your HTTP API (it will be a file-like object); however, it is heavily ... JSON objects on the contrary usually contain arbitrary keys, such as: { "some_key": "some value", "other_key": "some other value" } Happily, you can create a list of items, which works pretty much as ... JSON is a format that encodes objects in a

string. Serialization means to convert an object into that string, and deserialization is its inverse operation (convert string -> object). When transmitting data or ... I have a DTO class which I Serialize Json.Serialize(MyClass) How can I exclude a public property of it? (It has to be public, as I use it in my code somewhere else) Here the message contains single quotation mark, which is same as the quotation used in JSON. What I do is fill up a string from user inputs such as message. So, I need to escape those kind of special ... JSON (JavaScript Object Notation) is a lightweight format that is used for data interchanging. It is based on a subset of JavaScript language (the way objects are built in JavaScript). As stated in the MDN, ... How can I display JSON in an easy-to-read (for human readers) format? I'm looking primarily for indentation and whitespace,

with perhaps even colors / font-styles / etc. I am using jquery, JSON, and AJAX for a comment system. I am curious, is there a size limit on what you can send through/store with JSON? Like if a user types a large amount and I send it through ...
