Green Policies and Augmented Reality in InsurTech Sonal Trivedi 2026-02-23 Green Policies and Augmented Reality in InsurTech: Catalysts for Sustainability and Innovation offers a timely and in-depth exploration of the convergence between environmental sustainability and advanced technologies within the insurance sector.

Intelligent Information Technologies Vijayan Sugumaran 2008 "This collection compiles research to drive further evolution and innovation of these next-generation technologies and their applications, of which the scientific, technological, and commercial communities have only begun to scratch the surface. It is an essential reference acquisition for any library seeking to cover the leading edge of technological innovations"--Provided by publisher.

Navigating the Technological Tide: The Evolution and Challenges of Business Model Innovation Bahaaeddin Alareeni 2024-07-31 In an era defined by technological breakthroughs such as AI, blockchain, and IoT, this book offers a fresh and practical approach to Business Model Innovation (BMI). It delves into how technological advancements drive new business models and enhance operational efficiency, providing actionable insights and real-world examples for business leaders, strategists, operations managers, entrepreneurs, and students in business and technology disciplines. Encouraging diverse research methods, including theoretical, empirical, and multimethod studies, it welcomes manuscripts with clear managerial or policy implications. Aimed at students, scholars, researchers, professionals, executives, government agencies, and policymakers, this book equips readers with tools to succeed in today's dynamic business environment and supports multidisciplinary research to advance innovation management practices.

Virtual and Augmented Reality: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources 2018-03-02 Virtual and augmented reality is the next frontier of technological innovation. As technology exponentially evolves, so do the ways in which humans interact and depend upon it. *Virtual and Augmented Reality: Concepts, Methodologies, Tools, and Applications* is a comprehensive reference source for the latest scholarly material on the trends, techniques, and uses of virtual and augmented reality in various fields, and examines the benefits and challenges of these developments. Highlighting a range of pertinent topics, such as human-computer interaction, digital self-identity, and virtual reconstruction, this multi-volume book is ideally designed for researchers, academics, professionals, theorists, students, and practitioners interested in emerging technology applications across the digital plane.

Understanding Augmented Reality Alan B. Craig 2013-04-26 *Understanding Augmented Reality* addresses the elements that are required to create augmented reality experiences. The technology that supports augmented reality will come and go, evolve and change. The underlying principles for creating exciting, useful augmented reality experiences are timeless. Augmented reality designed from a purely technological perspective will lead to an AR experience that is novel and fun for one-time consumption - but is no more than a toy. Imagine a filmmaking book that discussed cameras and special effects software, but ignored cinematography and storytelling! In order to create compelling augmented reality experiences that stand the test of time and cause the participant in the AR experience to focus on the content of the experience - rather than the technology - one must consider how to maximally exploit the affordances of the medium. *Understanding Augmented Reality* addresses core conceptual issues regarding the medium of augmented reality as well as the technology required to support compelling

augmented reality. By addressing AR as a medium at the conceptual level in addition to the technological level, the reader will learn to conceive of AR applications that are not limited by today's technology. At the same time, ample examples are provided that show what is possible with current technology. - Explore the different techniques, technologies and approaches used in developing AR applications - Learn from the author's deep experience in virtual reality and augmented reality applications to succeed right off the bat, and avoid many of the traps that catch new developers and users of augmented reality experiences - Some AR examples can be experienced from within the book using downloadable software

Understanding Augmented and Virtual Reality

Elena Sterling 2024-03-14 Welcome to the immersive universe of Virtual Reality (VR) and Augmented Reality (AR) in 'Immersive Horizons.' Join us on an exciting exploration of these cutting-edge technologies and their real-world applications that promise to revolutionize how we interact with digital content and our surroundings. In 'Understanding Augmented and Virtual Reality,' we delve into the diverse realms where VR and AR are making waves, from enhancing healthcare and education to transforming entertainment and retail experiences. But as we navigate this exhilarating frontier, we also confront the ethical challenges that come with such powerful innovation. Discover how VR and AR raise important questions about privacy, data security, and responsible use. Gain valuable insights into practical solutions for ensuring ethical development and deployment of these immersive technologies. Whether you're a tech enthusiast, educator, healthcare professional, or business leader, this book offers essential guidance on how to harness the potential of VR and AR responsibly. Embark on a journey of discovery and responsibility with 'Understanding Augmented and Virtual Reality,' and unlock the transformative power of VR and AR to shape a brighter future for us all

Green Finance and Energy Transition Nadia Mansour 2025-02-07 Economic models must evolve to avoid irreversible consequences for our planet in the face of climate change. The question is: How can we provide a growing population with access to affordable, viable energy while preserving our environment? Green finance is a pivotal concept that guides financial actions and operations toward fostering the energy transition and combating global warming. Finance, a key player in resource allocation, now incorporates an environmental dimension alongside the pursuit of economic profitability, setting it apart from 'traditional' finance. This book presents methods to provide a framework for financial transactions, support sustainable development, combat global warming, and enhance the transparency of financial product providers.

Gamification for Tourism Feifei Xu 2021-05-10 This book examines the cutting-edge concept of gamification in tourism. It provides a theoretical foundation for tourism gamification and discusses the concepts of gaming and gamification and their application in the tourism and hospitality industry. The chapters offer valuable insights by showcasing examples of best practice from different countries and addressing key issues of game mechanism and game design principles. They focus on areas such as game design elements, game player types and their motivation, location-based games, augmented reality and virtual reality games. The volume will be useful for students and researchers in tourism marketing, digital tourism, smart tourism and tourism futures. It also serves as a helpful tool for tourism industry practitioners looking to increase customer engagement, enhance loyalty and raise brand awareness.

Harnessing Social Media Commercial Potential Mo Elnadi 2018-09-25 Master's Thesis from the year 2010 in the subject Communications - Public Relations, Advertising, Marketing, Social Media, grade: 72.96, The University of Surrey (Business School), course: MBA P/T, language: English, abstract: There is a need for academic research that determines the factors that influence purchasing decisions or trigger word-of-mouth (WOM) endorsements amongst consumers on social media (SM) channels; with the aim of identifying critical components of an effective digital communication strategy. This research focuses on exploring these factors through studying consumer engagement motives behind connecting with brands via SM during purchasing decision lifecycle phases. The

researcher was able to discover misalignments between engagement motives of consumers and the current corporate approach in exploiting SM opportunities. The quantitative empirical research captures the opinions of 335 UK respondents. This acts as the primary data to accompany the full literature review of journals, academic studies, and web resources acting as secondary research material. The main findings reveal that a corporate needs to treat SM platforms as two-way communication channels. Trust and relationships are built over time between a corporate and the target audience through valuable content and identifying the behaviour of top influencers on the right channels. Factors like gender, age group, level of experience, use of wireless devices and different personality types all directly affect consumer-to-consumer and consumer-to-brand engagement on SM channels. To fully exploit the commercial aspects of SM, effective SM engagement strategy is needed to build conversations and fulfils the ranges of needs of different consumers. Research shows consumers are interested in sharing tips relating to their stage in the cycle. Furthermore, consumers indicated that marketing messages can be perceived as an interruption to the natural consumer-to-consumer communication flow. The research also distinguishes between propensities to engage with a brand, and purchasing or WOM advocacy that might not be directly related. Consequently, many engagement barriers are created as a result of this misalignment between corporate assumptions and actual consumer engagement motivations that unnecessarily lead to loss of opportunities. If identified and studied carefully, corporates could adapt their digital communication strategies to fully harness SM potential, and thereby monetise a brand fanbase. The researcher has developed a number of strategic frameworks that could help marketers understand the dynamics of this complex ecosystem in order to align their goals with real-life consumer expectations.

Technology Application in Tourism in Asia

Azizul Hassan 2022-03-02 This book very specifically focuses on technology application in tourism in Asia. The book contains twenty-seven chapters in four sections (i.e., theories, innovations, practices, and future research

directions), based on the intriguing qualities and importance of technology applications in the Asian tourism business. This book, a blend of comprehensive and extensive efforts by the contributors and editor, is designed to extensively cover technology applications in tourism in Asia, including distinct topics such as mobile computing, new product designs, innovative technology usages in tourism promotion, technology-driven sustainable tourism development, location-based apps, mobility, accessibility, the post crisis situation of COVID-19, etc. This book is a significant contribution towards the very limited knowledge of technology applications in tourism, with selected examples of Asian countries. The importance of technology in Asian tourism is rapidly increasing, and has led to a rise in luxury, allowing citizens to enjoy leisure travel over both long and short distances. The rise of low-cost airlines and the region's growing, affluent middle class have changed the tourism environment dramatically. More tourists are booking their holidays online as a result of technological advancements. Online travel is the most important and well-established aspect of Asia's Internet economy. Considering the ongoing trend of technology applications in the tourism industry in Asia, more research attempts like this book need to be made aiming towards exploring diverse aspects. As tourism is an expanding area, this book can serve as a reading companion for tourism students, policy planners and industry professionals. This book is expected to be appreciated by expatriate researchers and researchers having a keen interest in the Asian tourism industry.
