**Utopianism for a Dying Planet** Gregory Claeys 2022-09-06 How the utopian tradition offers answers to today's environmental crises In the face of Earth's environmental breakdown, it is clear that technological innovation alone won't save our planet. A more radical approach is required, one that involves profound changes in individual and collective behavior. Utopianism for a Dying Planet examines the ways the expansive history of utopian thought, from its origins in ancient Sparta and ideas of the Golden Age through to today's thinkers, can offer moral and imaginative guidance in the face of catastrophe. The utopian tradition, which has been critical of conspicuous consumption and luxurious indulgence, might light a path to a society that emphasizes equality, sociability, and sustainability. Gregory Claeys unfolds his argument through a wide-ranging consideration of utopian literature, social theory, and intentional communities. He defends a realist definition of utopia, focusing on ideas of sociability and belonging as central to utopian narratives. He surveys the development of these themes during the eighteenth and nineteenth centuries before examining twentieth- and twenty-first-century debates about alternatives to consumerism. Claeys contends that the current global warming limit of 1.5C (2.7F) will result in cataclysm if there is no further reduction in the cap. In response, he offers a radical Green New Deal program, which combines ideas from the theory of sociability with proposals to withdraw from fossil fuels and cease reliance on unsustainable commodities. An urgent and comprehensive search for antidotes to our planet's destruction, Utopianism for a Dying Planet asks for a revival of utopian ideas, not as an escape from reality, but as a powerful means of changing it.

Brave New World Aldous Huxley 1999 Huxley's story shows a futuristic World State where all emotion, love, art, and human individuality have been replaced by social stability. An ominous warning to the world's population, this literary classic is a must-read.

**Literature in the Language Classroom** Joanne Collie 1987-12-17 A variety of imaginative techniques for integrating literature work with language learning.

**Brave New World Revisited** Aldous Huxley 1948

Fiction, 1876-1983: Authors R.R. Bowker Company. Department of Bibliography 1983

**Man, the New Humanism** Roger Lincoln Shinn 1968

**Brave New World** Aldous Huxley 1932

**Brave New Worlds** Bryan Appleyard 1999 This text takes the liberal humanist position against the advance of scientific ethics (or lack of them), in particular those of genetics. As the achievements of science threaten to engulf this century leaving us morally and philosophically floundering in their wake (what are we going to do about Dolly?), Appleyard engages with the issues in a debate which can only get hotter and more desperate.

**The Intellectuals and the Masses** John Carey 2012-12-20 Professor John Carey shows how early twentieth-century intellectuals imagined the 'masses' as semi-human swarms, drugged by popular newspapers and cinema, and ripe for extermination. Exposing the revulsion from common humanity in George Bernard Shaw, Ezra Pound, D. H. Lawrence, E. M. Forster, Virginia Woolf, H. G. Wells, Aldous Huxley, W. B. Yeats and other canonized writers, he relates this to the cult of the Nietzschean Superman, which found its ultimate exponent in Hitler. Carey's assault on the founders of modern culture caused consternation throughout the artistic and academic establishments when it was first published in 1992.

**Brave New World** Aldous Huxley 1965

*Citizens Or Consumers?* Wayne Andrew Antony 1999 Social policy is about citizens choosing the kind of society they want to live in. The mid-20th century Keynesian welfare state can be seen as a citizenship package which included acceptance of intervention by the state to maintain economic growth and social stability. This meant the inclusion of many previously excluded groups in the social policy process and the institutionalization of a collective responsibility for individual welfare.

But, with the ascendancy of neo-liberalism, the politics of citizenship is being replaced by a notion of citizens as consumers, whose medium of social interaction and source of economic and social security is the capitalist market. This book is concerned with social welfare problems and the need for citizen participation in addressing those problems. While all of the authors are critical of the current neo-liberal orthodoxy, none advocates a return to the status quo ante of the post-Second World War welfare state.

**Beyond Civilization** Harry Redner 2013-01-31 For Harry Redner, the phrase "beyond civilization" refers to the new and unprecedented condition the world is now entering—specifically, the condition commonly known as globalization. Redner approaches globalization from the perspective of history and seeks to interpret it in relation to previous key stages of human development. His account begins with the Axial Age (700–300 BC) and proceeds through Modernity (after AD 1500) to the present global condition. What is globalization doing to civilization? In answering this question, Redner studies the role played by capitalism, the state, science and technology. He aims to show that they have had a catalytic impact on civilization through their reductive effect on society, culture, and individualism. However, Redner is not content to diagnose the ills of civilization; he also suggests how they might be ameliorated by cultural conservation. Above all, it is to the problem of decline in the higher forms of literacy that he addresses himself, for it is on the culture of the book that previous civilizations were founded. This study will be of interest to sociologists, historians, and social and political theorists. Its style makes it accessible also to general readers, interested in civilization past, present, and future.

**Feminist Utopias in a Postmodern Era** Alkeline van Lenning 1997

There is a respectable feminist tradition in utopian thought. Dreams and fantasies about gender-equal, women-friendly or female-dominated worlds have been formulated abundantly. However, utopian thinking has also met with severe criticism. By definition, utopias were said to be too idealistic, and of little use in the process of societal change. More recently, it has been stressed that the concept of utopia has been superseded by postmodern awareness, in which general explanations of gender inequality (and, along with them, general utopian views) are disqualified to the benefit of more local and more specific theories. In this book, the reader will find not one general, broadly defined utopia, but instead, a wide array of more or less specific, feminist utopias. Utopias are viewed as preliminary and imaginary goals from which present situations can be revalued and from which strategies for change can be developed. As such, utopias have not lost their significance.
