Global Citizenship in Foreign Language Education Christiane Lütge 2022-11-01 In light of increasing globalization, this collection makes the case for global citizenship education as a way forward for transforming foreign language learning and teaching to better address current and future global challenges in times of unprecedented change. The volume maps a multi-dimensional approach within foreign language pedagogy to take up the challenge of "educating the global citizen". Drawing on sociocultural, pedagogical, cosmopolitan, digital and civic-minded perspectives, the book explores the challenges in constructing epistemological frameworks in increasingly global environments, the need for developing context-sensitive educational practices, the potential of linking up with work from related disciplines, and the impact of these considerations on different educational settings. The collection reflects an international range of voices, attuned to global and local nuances, to offer a holistic compilation of conceptual innovations to showcase the relevance of global citizenship issues in foreign language education and encourage future research. This book will be of interest to scholars in intercultural education, foreign language education, and language teaching, as well as policymakers and foreign language teachers. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution 4.0 license.

A Pragmatic Approach to Fluency and Disfluency in Learner Language

Maximiliane Frobenius 2022-11-15 This monograph presents analyses of filled and unfilled pauses, cut-offs, repair, discourse markers and other phenomena often referred to as disfluencies in the context of advanced language learners' PowerPoint presentations. It adopts a multimodal perspective to demonstrate the functions of these elements in interaction. Paired with gaze shifts, pointing gestures and posture shifts, they act as facilitators of joint visual orientation, mutual understanding, and accountable actions. Therefore, this volume suggests the name *cofluency* to reflect their potential functionality. Cofluencies are essential elements of multimodal chunks and multimodal patterns, and these are building blocks of a multimodal turn-taking mechanism for presentations. These concepts are illustrated and discussed based on excerpts from naturally occurring classroom data.

Working Towards a Proficiency Scale of Business English Writing: A Mixed-Methods Approach Li Wang 2021-09-29

This book presents an empirical study to develop and validate a proficiency scale of business English writing in the Chinese tertiary context. Through a mixture of intuitive, quantitative and qualitative methods, the book demonstrates how a pool of descriptors are collectively formulated, statistically calibrated and meticulously validated for the establishment of a proficiency scale of business English writing. The writing scale differs in significant ways from the existing language scales, most of which were constructed in English as L1 or L2 contexts and applied to English for General Purposes (EGP) domains. This book also provides important insights into the construct of business English writing as well as the methods for English for Specific Purposes (ESP) proficiency scale development and validation. It is of particular interest to those who work in the area of ESP teaching and assessment.

Mediation as Negotiation of Meanings, Plurilingualism and Language Education Bessie Dendrinis 2024-06-04

Bringing together the voices of a diverse group of scholars and language professionals, this edited collection, concerned with the cultivation of plurilingualism in multilingual educational settings, builds on the theory and practice of linguistic and cultural mediation both as curricular content and social practice. The chapters view mediation as an important aspect of communication which involves dynamic, purposeful interactivity, implicating social agents in the negotiation and construction of socially situated meanings across different languages and within the same language. Theoretically informed chapters present views on mediation as well as contributors' research and project outcomes in educational interventions. They also describe how mediation has been incorporated in educational practices and how it materialises in social contexts. Ultimately, this book makes the case for why mediation constitutes a key competence to be developed for active global and local citizenry in today's societies where there is an increased rate of knowledge acquisition and exchange. Presenting research from classrooms and other multilingual environments, this book offers concrete suggestions for the development of language users/learners' ability to mediate within and across languages. It will appeal to scholars, researchers and postgraduate students in the fields of language and education, education policy and politics, bilingualism and plurilingualism more generally. Curriculum designers may also find the volume of use.
