## **Strategy Paper Proceedings of the 5th International Conference on**

**AI Research** Renata Paola Dameri The International Conference on AI Research (ICAIR) is becoming a key forum for academics and students, whether social scientists, natural scientists or philosophers come together to explore the future of society in the context of AI. Many aspects of AI are now the subject of peer reviewed academic research, including the increasing use of Chatbots and GenAI in academe and in society at large. The conference was initially launched in 2019 as the European Conference on Artificial Intelligence and Robotics. After a success inaugural event in Oxford the conference fell victim to Covid and the following three years where held online. Time was taken in 2023 to refocus this

fast developing area of research and the name of the conference was changed this year to the International Conference on Artificial Intelligence. The Proceedings of the 2025 edition of the conference include academic research papers, PhD research papers, Masters Research papers and work-in-progress papers, all of which have been presented and discussed at the ICAIR 2025 conference. The proceedings are of an academic level appropriate to a professional research audience, including graduates, postgraduations, doctoral and post-doctoral researchers. All papers have been double-blind peer reviewed by members of the Review Committee.

## **Addressing Urban and Spatial Challenges Through Gamification**

Liu, Rui  
2026-01-29 Cities increasingly turn to game-inspired strategies to engage residents and solve complex spatial and

urban issues. By incorporating elements like points, interactive maps, challenges, and simulations, planners can make civic participation more accessible and motivating for diverse communities. These tools help visualize problems, test potential solutions, and encourage collaborative decision-making, transforming technical planning processes into more engaging and inclusive experiences. As a result, gamification emerges as a powerful approach for enhanced public involvement and smarter, more sustainable urban development.

Addressing Urban and Spatial Challenges Through Gamification examines the role of gamification as an emerging design and planning strategy within the context of human habitats. It addresses how game-based frameworks inform the development of built environments, offering structured, interactive, and participatory approaches to urban and spatial challenges. This book covers topics such as digital games, sustainable

development, and civic engagement, and is a useful resource for urban developers, business owners, sociologists, academicians, researchers, and scientists.

### **Strategic Innovative Marketing and Tourism**

Androniki Kavoura 2026-04-11

This open access book presents the latest findings of researchers from around the globe who presented their work at the 12th International Conference of Strategic Innovative Marketing and Tourism (ICSIMAT) in 2025. It provides an up-to-date information and discusses current trends, issues, and debates, both theoretical and practical research, on strategic innovative marketing and tourism and applications from social media and emerging technologies in Artificial Intelligence and the Internet of Everything. Topics covered in the chapters include social media in marketing and tourism hospitality, culture, strategic tools, and techniques employed and implemented by some of the top research

laboratories in the world to the industry. This book brings together work from both academia and industry and continues the successful impact of the previous years' conference on the academic discussion of the topics.

### **Improving Quality in American Higher Education**

Richard Arum 2016-05-02 An ambitious, comprehensive reimagining of 21st century higher education *Improving Quality in American Higher Education* outlines the fundamental concepts and competencies society demands from today's college graduates, and provides a vision of the future for students, faculty, and administrators. Based on a national, multidisciplinary effort to define and measure learning outcomes—the Measuring College Learning project—this book identifies 'essential concepts and competencies' for six disciplines. These essential concepts and competencies represent efforts towards articulating a consensus among faculty in biology, business,

communication, economics, history, and sociology—disciplines that account for nearly 40 percent of undergraduate majors in the United States. Contributions from thought leaders in higher education, including Ira Katznelson, George Kuh, and Carol Geary Schneider, offer expert perspectives and persuasive arguments for the need for greater clarity, intentionality, and quality in U.S. higher education. College faculty are our best resource for improving the quality of undergraduate education. This book offers a path forward based on faculty perspectives nationwide: Clarify program structure and aims Articulate high-quality learning goals Rigorously measure student progress Prioritize higher order competencies and disciplinarily grounded conceptual understandings A culmination of over two years of efforts by faculty and association leaders from six disciplines, this book distills the national conversation into a delineated set of fundamental

ideas and practices, and advocates for the development and use of rigorous assessment tools that are valued by faculty, students, and society.

Improving Quality in American Higher Education brings faculty voices to the fore of the conversation and offers an insightful look at the state of higher education, and a realistic strategy for better serving our students.

### **The connection of management concepts to the Capsim simulation**

### **SIMULATION & GAMING THROUGH TIMES AND ACROSS DISCIPLINES**

Marcin Wardaszko 2019-08-30  
The ISAGA 50th Anniversary Conference proceedings is a collection of 76 accepted submissions. The proposed papers and posters are very diversified and have backgrounds in many areas, yet they come together in the simulation and gaming. We had 12 tracks for papers, a poster submission track, workshops track, and thematic sessions proposals track. The 50th anniversary track will allow us to look back at our heritage. The core tracks with the biggest number of submissions are the simulation and gaming track and game science theory track. For the first time, we also had tracks for gaming technology, AR/VR, e-sport science and gaming cultures, we have received many interesting and quality submissions, which will add new perspective and diversity to our field. ISAGA wants to stay relevant and up-to-date with the current problems; thus the tracks for S&G for logistics and smart infrastructure, gaming for

individual efficacy and performance and gaming for sustainable development goals. We have also received ten poster submissions with very interesting topics.

**The Capsim Capstone Simulation: A Student's Perspective** Alex Sitomer

2010-09-01 The Capsim Capstone business simulation is used in both undergraduate and graduate-level classes in hundreds of universities. This book provides more detailed recommendations and guidance than is found in the instruction book that comes with the simulation package. *Technology and Science for the Ships of the Future* Enrico Rizzuto 2022-09-15 The oceans are a key resource for transportation, energy and material extraction, and food production, representing one of the most important environments on the planet. Technological developments enabling us to exploit marine resources in a sustainable way are therefore of the greatest importance. This book presents the proceedings of the NAV

2022 conference, held in Genoa and La Spezia, Italy, from 15 to 17 June 2022. The conference is held every 3 years, attracting specialists in marine technology from all over the world. NAV 2022 was the 20th edition of the conference, and covered a full spectrum of maritime technology themes, all related to the exploitation of sea resources. The book contains 87 scientific papers, covering subjects ranging from comfort on board; to conceptual and practical ship design; deep sea mining and marine robotics; protection of the environment; renewable marine energy; design and engineering of offshore vessels; digitalization and cyber security; unmanned vehicles; yacht and pleasure craft design, and inland-waterway vessels. Providing a comprehensive coverage of the latest scientific and technical maritime issues, the book will be of interest to all those involved in this vital global industry.

2022-07-08 Computer simulations, serious digital games, and gamification add fun and engagement to business courses, while also improving students' learning outcomes. Computer Simulations and Gaming provides business educators with the theoretical background, selection foundations, and implementation advice they need to successfully select and implement computer simulations, serious digital games, and/or gamification elements.

### **Group and Team Work**

Ricardo Flores 2024-01-18 By setting out a step-by-step guide on the implementation of a theoretically robust team work-centric approach to education, Group and Team Work explains valuable team work theory and practical dynamics. It details specific approaches educators can take to effectively play different roles, such as that of the facilitator, instructor and coach, thus depicting a varied and detailed picture of team work in higher education.
