Hands-On Science: Forensics

Brian Pressley 2009-02 Our

newest addition to the acclaimed Hands-On Science series turns your students into criminal investigators. Like the

characters in popular TV

shows, they'll conduct

experiments to determine

exactly who did what—and

how. Working from crime

scenarios, your students will

use chemical, biological,

photographic, and other means

to study the evidence and draw

logical conclusions. Sample

topics from the 20 activities

include: Blood Pattern Analysis

Glass Fracture Patterns

Photographing a Crime Scene

Searching Through Garbage

Microscopic Fibers Summary:

Missing Person --Your Teacher!

Each activity serves as a

complete introductory program

to forensic science, a

replacement unit, or an

enrichment experience. Each

activity also includes teacher

notes, materials lists, and

assessments. Hands-On

Science Forensics addresses

National Science Education

Standards. In a new review,

the National Science Teacher

Association (NSTA)says:

"Hands-On Science: Forensics

offers teachers a wealth of

activities that are aligned with

NSES content

standards...Hands-On Science:

Forensics provides teachers

with a total package for

that are relevant and

The manual starts with an original crime scene narrative setting up the crime students are to solve. This narrative is picked up in each of the forensic science lab activities, tying each forensic discipline together to show the integrated workings of a real crime lab. After the completion of all of the exercises, the student will be able to solve the homicide based on forensic evidence.
