Five-Minute Classic Lateral Thinking Puzzles 1998 Part of a range of pocket-sized puzzle books for adults. This book contains a collection of the finest lateral thinking puzzles ever invented - true classics of the genre that have perplexed and delighted people for generations. But here, with a new twist that is guaranteed to cause confusion, consternation, frustration and (ultimately) delight, these classic puzzles are buried in short stories that take no

more than five minutes to read. How long it will take to answer the questions posed at the end of each story, depends on whether you work it out for yourself, or resort to deciphering the mirror-writing solution provided after each story.

everyone does from time to time--there are additional clues to push you along. Keep trying and you will reach that glorious "aha!" moment when everything becomes crystal clear. In no time at all you'll have sharpened your wits...and become an accomplished lateral thinker.

Classic Lateral Thinking Puzzles Edward J. Harshman 2003 A man writes the same number, and nothing else, on 20 sheets of paper. Why? To figure this out--and hundreds of other mind-bending lateral puzzles, too--you'll have to really

fire up your brain and imagination. At first, it may not seem as if there's enough information to come up with a solution. But look more closely; there's always more than meets the eye. Check your assumptions, ask good questions, retune your mind, separate the facts from the red herrings, and the answers will come.

Mind-bending Classic Logic Puzzles Jenny Lynch 1994 Crammed with a wide range of colourful, inventive and perplexing puzzles, this neat little book will engage even the least logical of minds. (From back cover).

Cunning Lateral Thinking Puzzles Paul Sloane 2006 Paul Sloane and Des MacHale--the wily puzzle masters who have written several lateral thinking collections--are back with more tear-your-hair-out challenges. And once again, the purpose of their devious conundrums is to force solvers to think outside of the box. Instead of jumping to obvious conclusions, players have to ask lots of questions, use their imagination, piece together the subtlest clues, and come at

the problem from a variety of perspectives. Here's how to do it: one person, who knows the solution, takes questions. The answers help narrow down the possible explanations--and the more logic, creativity, and sheer determination that go into the queries, the better the chance of success!
