Contemporary Issues in Special Educational Needs: Considering the Whole

Child David Armstrong

2012-05-16 This thought-provoking and accessible book provides an overview of key issues in the education of children with Special Educational Needs and Disabilities. Written by highly experienced practitioners and educationalists, the book explores a range of approaches for working with this diverse group of learners and invites you to consider your possible responses. The book begins with an historical overview of Special Educational Needs and Disabilities and a critical guide to current policy. The contributors then expertly

explore and summarise many of the fascinating topics which arise in practice and scholarly research in this area, including: Ethical and practical implications of labelling children and young people with forms of special educational needs or disability The role of special schools, particularly in light of enduring debates about inclusion/exclusion What increased student participation, student voice and other facets of a democratic classroom mean for students with Special Educational Needs and Disabilities The contributions psychology can make to developing and enriching educational practice Understanding 'behaviour' in relation to children and young people with Special Educational Needs and Disabilities Case studies are used to illustrate these discussions and the book includes suggested protocols

for good practice throughout. Throughout the book the reader is asked to reflect on the issues presented and come to their own decisions about what represents good practice in their setting. The journey concludes with a look at a possible 'ideal' school or educational setting for children with Special Educational Needs and Disabilities. *Contemporary Issues in Special Educational Needs* is an invaluable guide for trainee and qualified teachers, learning support staff, SENCO's, local authority officers, educational consultants and educational psychologists. "This book presents a stimulating and up-to-date overview of the context of education in SEN and suggests how educators can address special needs most effectively by keeping in mind an image of the development of the whole child." Tony Cline, Educational Psychology Group, University College London, UK. "This book provides readers with a fresh, often incisive approach to many perennial issues in education." Dr Victor

Martinelli, University of Malta, Malta. "This book provides a welcome overview and commentary on current complex issues and problems affecting all those with an interest in children and young people with special educational needs. This book is an excellent compilation of relevant contemporary pieces thoughtfully woven together by highly skilled, well-placed editors." Jane Leadbetter, University of Birmingham, UK. *Indian Journal of Disability and Rehabilitation* 1990

Current Issues and Trends in Special Education

Festus E. Obiakor 2010-02-05 The field of special education constantly changes as a result of legislation, instructional formats and the research investigations. Addressing the issues and trends in special education, this title covers research, technology, and teacher preparation. *Special Education in Contemporary Society* Richard M. Gargiulo 2016-12-02 2015 Recipient of the Textbook Excellence Award from the

Text and Academic Authors Association (TAA) The Sixth Edition of Richard Gargiulo's well-respected Special Education in Contemporary Society: An Introduction to Exceptionality offers a comprehensive, engaging, and easy-to-read introduction to special education. Grounded in research and updated to reflect the most current thinking and standards of the field, the book provides students with the skills and knowledge to become successful teachers. Richard Gargiulo and new co-author Emily Bouck encourage a deep awareness and understanding of the human side of special education. Their book provides students a rare look into the lives of exceptional students and their families, as well as the teachers that work with exceptional persons throughout their lives. The new edition maintains the broad context and research focus for which the book is known, while expanding on current trends and contemporary issues to better serve both pre-service and in-service teachers of

exceptional individuals. The text is organized into two distinct parts to offer students a truly comprehensive and humane understanding of exceptionality. In Part I, readers are provided strong foundational perspective on broad topics that affect all individuals with an exceptionality. In Part II, the authors engage students with thorough examinations of individual exceptionalities, and discuss historical, personal, and educational details of each exceptionality as it affects a person across the lifespan. Catalog Issue for ... University of Oklahoma 1913 Contemporary Issues in Physical Education Ken Hardman 2011 The book provides an insight into the current situation of PE in schools across Europe as a forerunner to addressing PE-related existing and emerging issues in various contexts. Contemporary Issues in Special Education Ashlea Rineer-Hershey 2019-04-18 Featuring chapters written by a diverse collection of educators within

the discipline, Contemporary Issues in Special Education presents readers with insight regarding topics within the field of special education that are often deemed controversial in nature. The text encourages future educators to think critically regarding various challenges and opportunities they are likely to encounter during their educational careers. Over the course of nine distinct sections, students are exposed to chapters that discuss sensory friendly classrooms, positive behavior intervention and support, dangerous behaviors and crisis management, least restrictive environment, the relationship between special education and socioeconomic status, and the connection between English language learners and special education assignment. Readers learn about service and support animals in the school setting, assistive technology, transition services, mental health screenings in schools, disciplinary procedures for special education students, advice for engaging family

members in an inclusive school community, and more. Designed to help future educators prepare to serve as highly effective and competent teachers, Contemporary Issues in Special Education is ideal for graduate-level courses and programs in special education instruction. Ashlea L. Rineer-Hershey is an associate professor in the Special Education Department at Slippery Rock University, where she coordinates the department's doctoral program and teaches courses at the undergraduate, graduate, and doctoral levels. She has a bachelor's degree in elementary and special education from Millersville University, a master's degree in special education from Eastern Mennonite University, and a Ph.D. from Robert Morris University in instructional management and leadership in education. Ashlea has also worked as a special education teacher and an educational consultant conducting trainings for teachers, administrators, and paraprofessionals on topics

like inclusive practices, co-teaching, behavior, autism, and other topics throughout public schools in western

Pennsylvania. Toni Mild is an assistant professor in the Special Education Department at Slippery Rock University. She earned her Ed.D. with specialization in educational leadership and management from Capella University. Dr. Mild is a former middle school Title 1 math teacher, emotional support teacher, learning support teacher, and special education supervisor.

Enduring Issues in Special Education Christopher J.

Lemons 2026-06-08 The new and fully revised second edition of *Enduring Issues in Special Education* is aimed at any course in the undergraduate or graduate special education curriculum that is wholly or partly devoted to a critical examination of current issues in special education. As we approach a decade since the original edition was published, the second edition includes an analysis of newly developed and historical issues written by leading experts in the field of education. The book's objective, in addition to informing readers about the issues, is to ask readers to consider critical questions related to each issue. The book organizes 30 chapters into seven sections using the same

structuring principles as the first edition—what, why, who (students and professionals), where, and how (now and in the future). Like the first edition, each chapter includes the authors' personal perspectives, suggested resources, and discussion questions. A core addition is a section on the future of special education research, practice, preparation, and policy.

Current Issues and Trends in Special Education. Festus E. Obiakor 2010-01-25 The field of special education constantly changes as a result of legislation, instructional formats and research investigations. Addressing the issues and trends in Special Education, this title covers identification, assessment and instruction. It also covers research, technology, and teacher preparation.

Fundamentals of Special Education Margaret G. Werts 2007 Fundamentals of Special Education: What Every Teacher Needs to Know gathers into one source the critical information needed to understand students

with disabilities. Written to be concise yet complete, it is an essential resource for educators because it provides the basic parameters of each disability area and defines the issues that impact current interventions and practices. This new edition addresses the latest laws in special education (such as the reauthorization of IDEA and NCLB), includes a new chapter on autism spectrum disorders, and contains additional information on collaboration with families and other service professionals.

Contemporary Issues In Special Educational Needs: Considering The Whole Child Armstrong, David 2012-05-01

"This book presents a stimulating and up-to-date overview of the context of education in SEN and suggests how educators can address special needs most effectively by keeping in mind an image of the development of the whole child. The editors have assembled an impressive range of thought-provoking contributions to the ongoing

debate on the actual, the possible and the ideal responses that our education system makes or could make to the needs of its most vulnerable students." Tony Cline, Educational Psychology Group, University College London, UK. "This book provides readers with a fresh, often incisive approach to many perennial issues in education. These include but are not limited to socio-political agendas in inclusion, labelling, learners' self esteem and the delicate balance between different specialists within school systems that must be achieved in the best interest of the child with or without special educational needs and disabilities. Although written for a UK readership, the editors have ensured that the content of most chapters transcends national and systems boundaries with a healthy balance between psychological / educational theory and its real world application in contexts that may not be instantly responsive to the child's changing needs."

Dr Victor Martinelli, University of Malta, Malta. "This book provides a welcome overview and commentary on current complex issues and problems affecting all those with an interest in children and young people with special educational needs. Ranging, as it does, from matters surrounding individuals such as labelling, therapeutic work and self-esteem to wider political, historical and socio-cultural influences, it provides the reader with a challenging, informed and critical set of perspectives. Its strength is the manner in which it tackles complex issues, providing thought-provoking views for those well versed in the world of special educational needs but also ensuring clear, comprehensive background information for novice readers of this topic. This book is an excellent compilation of relevant contemporary pieces thoughtfully woven together by highly skilled, well-placed editors." Jane Leadbetter, University of Birmingham, UK. This thought-provoking and

accessible book provides an overview of key issues in the education of children with Special Educational Needs and Disabilities. Written by highly experienced practitioners and educationalists, the book explores a range of approaches for working with this diverse group of learners and invites you to consider your possible responses. The book begins with an historical overview of Special Educational Needs and Disabilities and a critical guide to current policy. Contemporary Issues in Special Educational Needs is an invaluable guide for trainee and qualified teachers, learning support staff, SENCO's, local authority officers, educational consultants and educational psychologists.

Critical Issues in Special Education Audrey McCray

Sorrells 2004 This book represents the contributions of prominent researchers, teacher educators, policy makers, teachers, and parents on current and emerging issues facing the field of special education, and their critical thinking on how to ensure that students with disabilities receive free appropriate education in the least restrictive environment. The authors present divergent perspectives on the issues and concerns, including: (a) the emergence of more constructivistic instruction approaches that focus increasingly on higher order thinking; (b) new organization structures for administering schools; (c) standards-based reform and the use of high stakes testing for evaluating students; (d) the changing population and the increasingly diverse demographics of the students served in the public schools; (e) the onset of the information age and the increasingly visible role of technology in the schools and the workplace; (f) concerns

about student discipline and violence in schools; (g) the continuing shortage of qualified and certified special education teachers, and (h) trends in higher education focused on the reform of teacher education such as changing standards for knowledge and skills, preparing teachers for changing roles as mentors, and changes in the teacher education process that may have precipitated or influenced issues in the field. For special education providers such as parents and teachers and for anyone interested in the field of special education.
