Studies in contrastive linguistics and error analysis Dietrich Nehls 1979

Errors in Language Learning and Use Carl James 2013-12-02 Errors in Language Learning and Use is an up-to-date introduction and guide to the study of errors in language, and is also a critical survey of previous work. Error Analysis occupies a central position within Applied Linguistics, and seeks to clarify questions such as 'Does correctness matter?', 'Is it more important to speak fluently and write imaginatively or to communicate one's message?' Carl James provides a scholarly and well-illustrated theoretical and historical background to the field of Error Analysis. The reader is led from definitions of error and related concepts, to categorization of types of linguistic deviance, discussion of error gravities, the utility of teacher correction and towards writing learner profiles. Throughout, the text is guided by considerable practical experience in language education in a range of classroom contexts worldwide.

**Contrastive Analysis vs. Error Analysis in Respect of their Treatment of the Avoidance Phenomenon** Elena Gluth 2020-04-06 Seminar paper from the year 2003 in the subject English Language and Literature Studies - Linguistics, grade: 1,5, Free University of Berlin (Institut für Englische Philologie), language: English, abstract: This research paper compares

contrastive analysis with the error analysis approach in respect of their treatment of avoidance behaviour. It considers several researches on avoidance behaviour and shows that contrastive analysis predicts the avoidance phenomenon in most cases and, therefore, gives a complete description of the areas of difficulty for learners of a second language. There exist two different approaches for the identification of possible learning problems in the second language acquisition: contrastive analysis and error analysis. A number of proponents of an error analysis approach claim that contrastive analysis cannot serve as an adequate tool for identifying the areas of difficulty for learners of a second language. But on the other hand, it has been noticed that error analysis is not able to explain the avoidance phenomenon, since error analysis registers only the errors done by learners of a second language. Avoidance behaviour represents a communicative strategy of a learner of a second language by which the learner prefers using a simpler form instead of the target linguistic element for the reason of difficulty on the part of the target feature. Consequently, avoidance behaviour serves as a manifestation of learning problems, and its results should be definitely considered when compiling language syllabi and tests.

Contrastive Analysis and Error Analysis in Respect of Their Treatment of the Avoidance Phenomenon Elena Gluth 2008-03 Seminar paper from the year 2003 in the subject English Language and Literature Studies - Linguistics, grade: 1,5, Free University of Berlin, 22 entries in the bibliography, language: English, abstract: Introduction There exist two different approaches for the identification of possible learning problems in the second language acquisition: contrastive analysis and error analysis. A number of proponents of an error analysis approach claim that contrastive analysis cannot serve as an adequate tool for identifying the areas of difficulty for learners of a second language. But on the other hand, it has been noticed that error analysis is not able to explain the avoidance phenomenon, since error analysis

registers only the errors done by learners of a second language (Schachter 1974). Avoidance behaviour represents a communicative strategy of a learner of a second language by which the learner prefers using a simpler form instead of the target linguistic element for the reason of difficulty on the part of the target feature. Consequently, avoidance behaviour serves as a manifestation of learning problems, and its results should be definitely considered when compiling language syllabi and tests (Laufer and Eliasson 1993). And since error analysis does not consider and is not able to explain the avoidance phenomenon, it cannot be observed as an adequate approach for assisting teachers of a second language with learning materials. In this paper, we set a goal to compare contrastive analysis with the error analysis approach in respect of their treatment of avoidance behaviour. We will consider several researches on avoidance behaviour and will show that contrastive analysis does predict the avoidance phenomenon in most cases and, therefore, gives a complete description of the areas of difficulty for learners of a second language. We suppose that we can come across the cases in which the avoidance phenomenon would not manifest itself although it has been predicted by Contrastive Analysis Carl James 1980 What is contrastive analysis? - The psychological basic of contrastive analysis - The linguistic components of contrastive analysis - Microlinguistic contrastive analysis - Macrolinguistic and contrastive analysis - Pedagogical exploitation of contrastive analysis - Some issues of contention. Contrastive Linguistics and the Language Teacher Jacek Fisiak 1981 **Error Analysis** Jack C. Richards 2015-12-14 The eleven essays in this book cover a wide range of topics from the role of 'interlanguage' and the influence of external factors on the process of language learning, to the development of syntax and the methodology of error analysis. Collectively they provide a valuable perspective on the learning process, which both enriches our theoretical understanding of the processes underlying second language acquisition and suggests ways in which teaching practice may best exploit a learner's skills.
