B.H. Blackwell B.H. Blackwell Ltd 1928

Research in Education 1974

The United States Catalog Supplement, January 1918-June 1921 Eleanor E. Hawkins 1921

Race to Save the Planet 1995 Wolf 1994-08 This concise introduction to environmental science (a shorter alternative to Miller's Living in the Environment) uses basic and easily understandable scientific laws, principles, and concepts to help students understand environmental and resource problems and the possible solutions to these problems. It includes many full-color illustrations and photographs and a writing style that is clear, personal, and lively. Extensive reviewing by hundreds of experts and Miller's careful research covering more than 20,000 sources ensure the text's accuracy and currency. During the early 1970s, Miller's texts helped shape and define the environmental science course. Today, they are best sellers used by thousands of students across the country. This new edition is a major revision--the most extensive since the first edition was published. Each chapter is thoroughly revised and some detail has been added. The book's 460 illustrations are designed to present complex ideas in understandable ways and to relate learning to the real world.
