Teaching and Learning English Grammar

MaryAnn Christison 2015-03-02 An important contribution to the emerging body of research-based knowledge about English grammar, this volume presents empirical studies along with syntheses and overviews of previous and ongoing work on the teaching and learning of grammar for learners of English as a second/foreign language. It explores a variety of approaches, including form-focused instruction, content and language integration, corpus-based lexicogrammatical approaches, and social perspectives on grammar instruction. Nine chapter authors are Priority Research Grant or Doctoral Dissertation Grant awardees from The International Research Foundation for English Language Education (TIRF), and four overview chapters are written by well-known experts in English language education. Each research chapter addresses issues that motivated the research, the context of the research, data collection and analysis, findings and discussion, and implications for practice, policy, and future

research. The TIRF-sponsored research was made possible by a generous gift from Betty Azar. This book honors her contributions to the field and recognizes her generosity in collaborating with TIRF to support research on English grammar. Teaching and Learning English Grammar is the second volume in the Global Research on Teaching and Learning English Series, co-published by Routledge and TIRF.

The Cambridge Handbook of English Corpus Linguistics Douglas Biber 2015-06-25 The Cambridge Handbook of English Corpus Linguistics (CHECL) surveys the breadth of corpus-based linguistic research on English, including chapters on collocations, phraseology,

grammatical variation, historical change, and the description of registers and dialects. The most innovative aspects of the CHECL are its emphasis on critical discussion, its explicit evaluation of the state of the art in each sub-discipline, and the inclusion of empirical case studies. While each chapter includes a broad survey of previous research, the primary focus is on a detailed description of the most important corpus-based studies in this area, with discussion of what those studies found, and why they are important. Each chapter also includes a critical discussion of the corpus-based methods employed for research in this area, as well as an explicit summary of new findings and discoveries.
