Calendar for February The two unnumbered
pages contain a calendar for February. Feasts of
the Purification (2 February), the Chair of St.
Peter (22 February), and St. Matthew Apostle
(24 February) in red. The few other feasts are
mostly standard, in brown text ink: Brigid virgin

(1 February); Blaise, Bishop and Martyr (3
February); Agatha, v and m (5 February),
Scholastica (10 February), Gallus confessor (21
February), and Alexander confessor (27
February). The last is not among the saint
Alexanders listed in the Catholic Encyclopedia.
Alexander of Antioch (feast day 26 February)
was a bishop. St. Gall, eponymous abbot of St.
Gallen, Switzerland, is usually celebrated on 16
October, but Addo gives the date as 20
February. Calendars usually accompanied Books
of Hours and Breviaries. The incomplete nature
of this calendar suggests a bookshop generic
product, designed to be added to by the
purchaser, depending on his locality and/or
religious order.

Easy R Elizabeth Gohmert 2020-01-02 Do you want to learn R? This book is built on the premise that anyone with a bit of free time and a healthy curiosity can learn to use R in their studies or at work. The authors focus on using R to do useful things like writing reports, creating data and graphs, accessing datasets collected by others, preparing data, and conducting simple data analysis. In this book you'll learn how to: install R and RStudio®, and set up an RStudio® project and folders; write an essay with graphs based on simple real-world data using R Markdown; create variables from everyday numeric information and visualize data through five types of charts—bar plot, histogram, pie chart, scatter plot, and time series line plot—to identify patterns in the data; write and run R programs, and prepare your data following the tidyverse approach; import external datasets

into R, install R data packages, and carry out initial data validity checks; conduct exploratory data analysis through three exercises involving data on voting outcomes, natural resource consumption, and gross domestic product (GDP) via data visualization, correlation coefficient, and simple regression; and write a research paper on the impact of GDP per capita on life expectancy using R Markdown. Student-friendly language and examples (such as binge-watched shows on Netflix, and the top 5 songs on Spotify), cumulative learning, and practice exercises make this a must-have guide for a variety of courses where data are used and reports need to be written. Code and datasets used to carry out the examples in the book are available on an accompanying website.

Around the World in Fifty Sites! Susan Battersby 2019-03-15 Many people create a bucket list of things to do before they die. But how many of these are chosen by other people, in particular by the British public? In 2002, the BBC aired a programme entitled "Fifty places to see before you die" - a list of cities, natural wonders and ancient sites, chosen as the best places to see from around the world. This hour long programme changed my life! I met my husband, Richard, on holiday in Venezuela in 2000, and like everybody else, we would trawl through the travel brochures looking for inspiration for our holidays. After watching this television programme, I made the decision that we would make every effort to visit all the fifty sites listed. It took us twelve years to complete our journey, and this is my story, based on your chosen itinerary.
