Financial Statements Thomas Ittelson 2009 Amazon readers love this five-star title: "Buy this book first." "Perfect for budding entrepreneurs!" "Makes a complicated subject seem like child's play." "A masterpiece for non-financial managers." "The best book available on the subject." Now the best-selling book of its kind has gotten even better. This revised and expanded second edition of Ittelson's master work will give you that firm grasp of "the numbers" necessary for business success. With more than 100,000 copies in print, *Financial Statements* is a perfect introduction to financial accounting for non-financial managers, stock-market investors, undergraduate business and MBA students, lawyers, lenders, entrepreneurs, and more. Most introductory finance and accounting books fail either because they are written "by accountants for accountants" or the authors "dumb down" the concepts until they are virtually useless. *Financial Statements* deftly shows that all this accounting and financial-reporting stuff is not rocket science and that you can understand it! Ittelson empowers non-financial managers by clearly and simply demonstrating how the balance sheet, income statement and cash flow statement work together to offer a "snapshot" of any company's financial health. Every term is defined in simple,

understandable language. Every concept is explained with a basic, straightforward transaction example. And with the book's uniquely visual approach, you'll be able to see exactly how each transaction affects the three key financial statement of the enterprise. Two new major sections with nine new chapters were added to this revised second edition of *Financial Statements*, simply the clearest and most comprehensive introduction to financial reporting available. Thomas R. Ittelson, is a scientist, businessman, author, and teacher with many years of hands-on experience in business development and marking for technical companies. As a consultant to entrepreneurs, Ittelson has written business plans and prepared financial projections that have helped raise more than \$500 million in start-up equity capital. *Financial Statements* was born from the author's efforts to teach client entrepreneurs how to design and use financial statements in their start-up businesses.

[Summary of Thomas Ittelson's Financial Statements](#) Everest Media 2022-02-24T17:10:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 The first principle is that there is a business entity separate from its owners; this entity is referred to as a company. The second principle is that all transactions must be recorded, regardless of importance, in the books. #2 The accountant's job is to translate the business's financial data into a form that is suitable for management and investors. The process of doing this is called accounting. #3 The generally accepted accounting principles, or GAAP, are the set of rules and guidelines that govern how companies prepare their financial statements.

Financial Statements, Third Edition Thomas Ittelson 2020 This book teaches readers how to use specialized accounting vocabulary and makes accessible the structure and purpose of the three major numeric statements that describe a company's financial condition.

A Visual Guide to Financial Statements Thomas R. Ittelson 2019-04 Not Rocket Science! A company's financial statements simply document the movement of cash and goods and services into and out of the enterprise. That is all financial statements are about. It is no more complicated. Everything else is details. Don't sweat the details. This 48-page, full color picture book provides an overview understanding of financial statements with no gobbledygook and confusing jargon. All necessary numeric structure is explained and all essential vocabulary is defined. No prior accounting knowledge required. Understanding financial reporting does not have to be difficult. You have learned all the math required to master financial statements by the end of the fourth grade--mostly addition and subtraction. However, you will need to learn and use specialized accounting vocabulary, which can be confusing. You will also need to understand the structure and appreciate the purpose of the three major numeric statements that describe a company's financial condition. Each paints a different, essential picture--the "three-legged stool" of company reporting. The Income Statement shows the manufacturing (or service offerings) and selling actions of the company that result in profit or loss during a period of time (called the "period"). The Income Statement gives a very important perspective on the company's performance -- its profitability. The Cash Flow Statement details the movements of cash into and out of the company for the period. You need money to make money. Running out of cash is bad. Duh. The Balance Sheet records at the end of a period, what the company owns and what it owes, including the owners' stake called shareholders' equity. Financial statements are simply summaries and structured presentations of the various events (business transactions) that affect a company's financial performance. Business transactions are

anything that transfers money to or from the company, or transfers goods and services. Transactions can also record future financial obligations that the company may assume, or also rights that the company is granted from others. If you can follow a recipe or apply for a loan, you can learn accounting. The basics are not difficult. This book will not train you to be an accountant but it should give you the confidence to be able to look at a set of financial statements and make sense of them. *How to Steal from Nonprofit Organizations* Thomas Ittelson 2020-04 This short book will guide readers through the fundamentals of nonprofit accounting, financial statements and financial reporting ? and all in a quick 30 pages!
