How to Thrive as a Teacher Leader

John G. Gabriel 2005-01-15 Challenging times demand dynamic leadership. Schools rely on teachers to assume a variety of leadership roles, both formal and informal, including department chair, peer coach, faculty representative, and Web page curator. With little or no leadership training, however, many teachers are unprepared to take advantage of such opportunities. In *How to Thrive as a Teacher Leader*, John G. Gabriel explores the responsibilities and rewards of teacher leadership, offering practical, positive advice on * identifying leadership qualities and building a team, * enhancing communication and earning respect, * overcoming obstacles and implementing change, * energizing colleagues and strengthening morale, and * improving student and teacher achievement. From setting goals to mediating conflicts, from mentoring colleagues to motivating students, Gabriel provides clear strategies—grounded in experience and illustrated by examples—for becoming an effective teacher leader. A generous resource section, including sample letters, surveys, and checklists, enables readers to quickly put these techniques into practice. Whether you aspire to a leadership position or are in a position to inspire future leaders, this insightful and informative book will help you lead the way to success.

Effective Supervision Robert J. Marzano
2011-05-09 In *Effective Supervision*, Robert J. Marzano, Tony Frontier, and David Livingston show school and district-level administrators how to set the priorities and support the practices that will help all teachers become expert teachers. Their five-part framework is based on what research tells us about how expertise develops. When these five conditions are attended to in a systematic way, teachers do improve their skills: * A well-articulated knowledge base for teaching * Opportunities for teachers to practice specific strategies or behaviors and to receive feedback * Opportunities for teachers to observe and discuss expertise * Clear criteria for success and help constructing professional growth and development plans * Recognition of the different stages of development progressing toward expertise. The focus is on developing a collegial atmosphere in which teachers can freely share effective practices with each other, observe one another's classrooms, and receive focused feedback on their teaching strategies. The constructive dynamics of this approach always keep in sight the aim of enhancing students' well-being and achievement. As the authors note, "The ultimate criterion for expert performance in the classroom is student achievement. Anything else misses the point."
Building Effective Learning Communities Susan Sullivan 2006 Establish collaborative learning communities that foster high academic standards! Today's school leaders face a difficult reality: the pressure to meet national standards often eclipses the pursuit of additional academic goals. This groundbreaking text seeks to remedy this conflict by enabling practicing and prospective school leaders to build collaborative, constructive environments that not only help schools achieve national standards, but also help the school community realize high academic standards. Sullivan and Glanz put forth a conceptual framework centered on modeling reflective practice. This framework and the authors' suggested strategies and techniques

provide school leaders with: Approaches that can be employed at all educational levels
Materials that educate leaders about themselves
Tactics for building a reflective learning community
Suggestions for promoting individual and group development
Discover the techniques that foster collaborative learning communities in which all members of the school community advance high academic standards.

Finding Your Leadership Style Jeffrey Glanz 2002-12-15 What makes a good educational leader? How can you be one? Is a job candidate an effective leader who can work with students and staff in your school or district? According to author Jeffrey Glanz, each of us has natural leadership abilities. Although no single leadership style is better than another, matching a person's style with an assignment leads to success for the person, his colleagues, and the organization. The key is to identify and actualize each person's natural leadership style. Full descriptions of the seven types of leaders-- Dynamic Aggressives, Dynamic Assertives, Dynamic Supportives, Adaptive Aggressives, Adaptive Assertives, Adaptive Supportives, and Creative Assertives--afford valuable insight into your own behaviors and the strengths of those around you. Glanz uses vivid, authentic scenarios to illustrate the qualities of each leadership type, and identifies seven virtues that are critical for all leaders and yet are often overlooked in educational leadership programs. An invaluable aid to teachers, supervisors, and district leaders, this book provides questionnaires and focus questions to help you analyze leadership potential in yourself and in colleagues. The author also shows you how to go about the crucial process of matching leadership qualities with specific jobs in the educational system, from teacher to superintendent. Understanding the natural leadership qualities and virtues helps you to create an educational environment that is characterized by excellence.
