I for Impact: Blending Islamic Finance and Impact Investing for the Global Goals United Nations Development Programme Istanbul International Center for Private Sector in Development (UNDP IICPSD) 2017-05-15 The 2030 Agenda for Sustainable Development offers a masterplan to create a better world for the people and the planet. It's scale and ambition, however, requires new development partnerships supported by adequate financial and technical resources. As a response, development practitioners started to explore alternative and complementary innovative instruments to finance the SDGs -one of which is the prospects for increased cooperation and coordination between Islamic finance and impact investing. To date, however, the academic and development literature has lacked a systematic exploration of this promising collaboration between Islamic finance and impact investing. This present study attempts to fill this gap by developing the first knowledge product to increase awareness on this collaboration. I for Impact attempts to raise awareness on the compatibility between Islamic finance and impact investing. It reviews recent developments and key factors for growth, pinpoints similarities between the two sectors, and makes policy recommendations for development actors to create the conditions for the two sectors to benefit from each other.

European Financial Systems in the Global Economy Beate Reszat 2005-04 European Financial Systems in the Global Economy provides an overview of sources of finance, types of financial intermediation and financial systems in Europe and their relative importance in the world economy. It describes market mechanisms and prices and gives a broad introduction to the relevant regional financial and monetary issues (including those countries that will join the EU in the future) and makes an ideal primer for those new to the world of finance.

Climate Change 2022 - Mitigation of Climate Change

Intergovernmental Panel on Climate Change (IPCC) 2023-08-17 This Working Group III contribution to the IPCC Sixth Assessment Report provides a comprehensive and transparent assessment of the literature on climate change mitigation. The report assesses progress in climate change mitigation options for reducing emissions and enhancing sinks. With greenhouse gas emissions at the highest levels in human history, this report provides options to achieve net zero, as pledged by many countries. The report highlights for the first time the social and demand-side aspects of climate mitigation, and assesses the literature on human behaviour, lifestyle, and culture, and its implications for mitigation action. It brings a wide range of disciplines, notably from the social sciences, within the scope of the assessment. IPCC reports are a trusted source for decision makers, policymakers, and stakeholders at all levels (international, regional, national, local) and in all branches (government, businesses, NGOs). Available as Open Access on Cambridge Core.

Global Financial Stability Report 2012

Hong Kong's Global Financial Centre and China's Development

Yan-leung Cheung 2016-12-08 This book provides an overview of Hong Kong's role as an international financial centre, focusing especially on how Hong Kong has contributed significantly, and continues to contribute significantly, to China's economic development. It considers the importance of Hong Kong's stock market in raising finance for Chinese companies, explores the potential of Hong Kong as an offshore financial centre, and discusses recent regulatory reforms. It concludes by assessing the prospects for Hong Kong's continuing success as a global financial centre, and puts forward recommendations for policies which would help secure continuing success.

Global Strategic Management Philippe Lasserre 2022-11-03

Seamlessly blending academic rigour and practicality, this textbook

provides an introduction to global business strategy. Assuming a born global perspective, Global Strategic Management is supported by ample pedagogical features, including numerous case studies and examples featuring both established multinationals and unknown SMEs from across the globe. The book takes an applied approach to global business strategy, emphasising functional parts of international business (managing marketing, operations, HR and finance). The text has been widely updated to incorporate the impacts of the Covid-19 pandemic, such as work from anywhere and deglobalization. New to this fifth edition is increased material on sustainability and corporate social responsibility, including discussion of climate change, NGOs and sustainable development goals. Subjects such as the impact of technology, cryptocurrency and global strategy in the digital space are discussed in more detail, while the conflict in Ukraine is also considered.

The Political Economy of International Finance in an Age of Inequality

Gerald A. Epstein 2018 The essays in this book describe and analyze the current contours of the international financial system, covering both developed and developing countries, and focusing on the ways in which the current international financial system structures, and is affected by, profound inequalities in the international system. This keen analysis of key topics in international finance takes a heterodox perspective, with focus on the role of inequalities in power in shaping the structure and outcomes in the international sphere.

International Finance Discussion Papers 2008

SAFA Guidelines 2014 The Sustainability Assessment of Food and Agriculture Systems (SAFA) Guidelines were developed for assessing the impact of food and agriculture operations on the environment and people. The guiding vision of SAFA is that food and agriculture systems worldwide are characterized by all four dimensions of sustainability: good governance, environmental integrity, economic resilience and social well-being.

The Perils of International Regime Complexity in Shadow Banking

Lucia Quaglia 2022-05-26 Despite the role of shadow banking in the building up of the 2008 international financial crisis, the massive size of

this sector, its cross-border nature, and the risks it entails for financial stability, the post-crisis regulation of shadow banking has remained rather feeble. Why? The Perils of International Regime Complexity in Shadow Banking identifies a 'game of shadows', which unfolded recursively concerning the definition, monitoring, and regulation of shadow banking internationally. Thus, states, regulators, and private actors tended to cast light away from various parts of the shadow banking system - shadow banking was (re)financed over time, its measurement was narrowed down, lessening the (perceived) need for regulation. The playing out of such a game was facilitated by the international architecture for shadow banking governance, which is a 'regime complex' characterized by the presence of multiple institutions and elemental regimes governing a set of related issues. Indeed, shadow banking is a quintessential case for demonstrating the perils of international regime complexity, which magnifies problems that are endemic in governing global finance - namely, interstate competition, disagreement between technocratic bodies, and the power of the financial industry - while splintering solutions, due to the fragmentation of regulatory authority. Empirically, this book examines various elemental regimes concerning different aspects of shadow banking, namely: international standards for defining, measuring, and monitoring global shadow banking; international standards for shadow banking entities, including money market funds, hedge funds, and investment funds; international standards for shadow banking activities, such as securitization, securities lending, and repos; international standards for bank capital exposures to shadow banking.

Globalization and Economy: Globalizing finance and the new economy

Paul Warren James 2007 'Globalization and Economy' is the second set which looks at economics broadly conceived, including global markets, global finance, global economic institutions and global labour.

International Finance Hal S. Scott 2007 This casebook is an authoritative introduction to international finance, transactions, policy, and regulations. The continuing expansion of U.S. capital market regulation is a major topic, as is the implementation of international accounting standards. The book is divided into five parts. Part One deals with the international aspects of major domestic markets; Part Two with infrastructure for financial markets; Part Three with instruments and offshore markets; Part Four with emerging markets; and Part Five with the fighting of terrorism. While the approach of this book is rooted in government policy and regulation, the book introduces students to basic financial concepts and transactions. The conception of the field is original and complements existing texts written for finance or economics courses.

International Politics and Society 2008

International Finance and Development Jose Antonio Ocampo 2007

International Finance and Development offers a comprehensive survey of the major financing issues influencing economic development since the historic Monterrey Consensus of the International Conference on Financing for Development in 2002. As most recent international private capital flows have been unlikely to significantly enhance new productive investments in the developing countries, it is necessary to design appropriate mechanisms to ensure they contribute to development. However, recent trends in official development financing offer some grounds for optimism, although much more needs to be done. External debt problems of many developing countries, especially the least developed countries, seem likely to continue to constrain their prospects for development. The final part on systemic issues highlights new concerns and the modest progress in ensuring that the international monetary and financial system better serves economic growth and development throughout the world, especially in the developing countries.

Capital Claims: Power and Global Finance Benjamin Braun

2022-12-23 *Capital Claims: Power and Global Finance* analyses how global financialized capitalism operates and reproduces itself, exploring the remarkable ability of the financial sector to maintain its dominance through even the most severe economic crises. The book defines international financialization as a process by which the number and value, the tradability, and the enforceability of cross-border financial claims increase and are successfully defended against competing social or political agendas. By focusing on financial claims, the volume develops a conceptual toolkit for the study of the political economy of global finance and the inequalities it sustains. The book brings together leading researchers whose work is geared towards opening the black box of cross-border finance. The authors suggest shifting the analytical focus from capital flows to capital claims – credit–debt relations between identifiable actors, embedded in social and political institutions, and infused with power and hierarchy. They show how financial actors wield leverage power, infrastructural power, and enforcement power, both vis-à-vis other private actors and vis-à-vis the state. This book will be of

great interest to students, teachers, and researchers of international political economy, critical political economy, and international relations, as well as those in the fields of finance, capitalism studies, activism, policymaking, and advocacy. Emerging Economies and the Global Financial System Bruno Bonizzi 2021-05-04 This book provides a comprehensive overview of the financial integration of emerging economies through an in-depth analysis of the international monetary system, how it impacts capital flows and exchange rates, and its implications for policy making. The financial integration of emerging economies has been a remarkable development of the past two decades. The growth of cross-border transactions and asset ownership, not least through the accumulation of foreign exchange reserves, has put many of these countries in a more prominent, if still peripheral, position within the global financial system. This has not been a smooth process, as integration has been marked by cyclical waves of capital flows, with financial and currency instability often accompanying the acute phases of these cycles. While conventional economic theory traditionally sees financial integration as a positive development, Post-Keynesian economists, working in the tradition of Keynes, Minsky and Kalecki, have long taken a more sceptical viewpoint. By centring the analysis of financial dynamics on concepts as liquidity, uncertainty, balance-sheet structures and institutions, Post-Keynesian theory highlights the intrinsic character of shocks imposed by financial integration upon emerging economies, and their implications for economic growth and distribution. This book demonstrates that these analyses can be fruitfully used to gain a better understanding of financial (in)stability and economic development in emerging economies as they integrate into the global financial system. This work provides key reading for students and scholars of economics, political economy and finance that are interested in the financial integration of emerging economies, and how the heterodox tradition of Post-Keynesian economics contributes to its analysis.

Symposium 2008

The Macroeconomic Management of Foreign Aid Mr. Peter Isard 2006-04-21 Since the adoption of the Millennium Development Goals (MDGs) in 2000, the challenge of reducing poverty around the world has been more prominent on the agenda of the international community. Relatively slow progress toward meeting the MDGs by the 2015 target date has added to the urgency of this effort. Two influential reports - The United Nations Millennium Project Report (the "Sachs Report") and the Commission for Africa Report (the "Blair Report") envisage substantial increases in aid flows to poor countries, especially to countries in sub-Saharan Africa. The International community sees increases in aid, along with improvements in recipient policies and freer global trade, as necessary for global prosperity and poverty reduction.
