Sports Nutrition Needs for Child and Adolescent Athletes Chad M. Kerkisick 2016-04-27 As the number of child and adolescent athletes continues to increase each year, more children are being exposed to greater training volumes and increasing physical demands—making the need for nutritional and recovery guidance increasingly important. While massive amounts of empirical research are published each year on responses and adaptations to exercise and nutrition, a relative lack of this data is focused on children and adolescents. Filling this need, Sports Nutrition Needs for Child and Adolescent Athletes explores the optimal sports nutrition needs for the child and adolescent athlete in three, detailed sections. The first section—Nutritional Foundation—supplies a comprehensive look at topics that relate to nearly every athlete. It focuses on the need for optimal nutrition in youth athlete populations, highlighting energy, body composition, hydration, and both macro- and micro-nutrient requirements. The second section—Special Considerations in Child and Adolescent Athletes—focuses on topics that are more specific. This section includes coverage of the impact of common recreational drugs on exercise performance, steroid use in youth and associated dangers, key elements of working with diabetic and other clinically relevant populations, as well as discussions that relate to overweight and weight-conscious athletes, respectively. The final section—A Hands-On Approach—reviews nutritional programs for both child and adolescent athletes. It uses an easy-to-understand approach to discuss and apply situations that can challenge athletes, their parents, and coaches by making sure young athletes are well fueled and recovered for all sporting situations. For the purposes of the research presented in this book, a child athlete is defined as an athlete between the ages of 7 and 12 years while an adolescent athlete is defined as an athlete 13–17 years of age.

Nutrition Counseling and Education Skills for Dietetics Professionals Betsy Holli 2012-12-17 The text covers communications, counseling, interviewing, motivating clients, delivering oral presentations and using media in presentations. Communication is basic to the relationship that the Registered Dietitian (RD) professional has with their clients. The Academy of Nutrition and Dietetics recognizes the importance of

communication skills for practitioners to promote health, disease prevention and treatment. Providing people with information on what to eat is not enough, the RD must also promote and facilitate behavior changes to more healthful food choices. The text incorporates the Nutrition Care Process (NCP) and model, including four steps of nutrition assessment, nutrition diagnosis using PES statement (Problem, Etiology and Signs/Symptoms), nutrition intervention, and nutrition monitoring and evaluation. The PES statements are the most critical in that the Academy of Nutrition and Dietetics has been stressing this as an essential component of their standards and requirements. The text uses activities, case studies, self assessment questions, web references and graphics to engage the student and drive the content home.

Nutrition Across Life Stages Bernstein 2017-03-17 Written for undergraduate students enrolled in Life Cycle Nutrition course, Nutrition Across Life Stages presents material in a clear, approachable fashion, making this text ideal for majors and non-majors alike. The text applies focus on the application of nutritional concepts rather than the nutritional science underlying, and discusses nutrition at a particular life stage followed by an exploration of its implications for health and disease at that stage of life. The authors tie in numerous learning features, such as case studies, Learning Checks, and News You Can Use boxes, to help clarify key points in each chapter.
