[Qualitative Research](#) David Silverman 2025-11-05 A new edition of *Qualitative Research* reflects its importance in the field, demonstrated by the 11000 citations of previous iterations. This sixth edition offers a newly updated introduction to cutting edge issues, written by leading

scholars in our field. Chapters from the fifth edition have been revised and updated by their distinguished authors. In addition, reflecting the changing face of qualitative research in a digital age, five new chapters have been added: Narrative ethnography [Gubrium, Holstein and Marvasti] Document analysis [Lewis and Atkinson] Analysing online data [Giles] Using AI in qualitative analysis [Schmieder] Ways of working with Visual and Online Data [Danby]. This new edition addresses what is missing from the methodology sections of many published journal articles, As Richard Fitzgerald has pointed out: 'The actual work of doing research is often sanitized or hidden in 'method reports'. This collection aims to supply what Fitzgerald calls the 'missing what' of research. It also offers a very different take on the nature of qualitative research [QR] from that found in many other articles and textbooks. We argue that: QR is a theoretically driven enterprise QR complements quantitative research in particular by entering into the 'black box' of how social phenomena [including interviews and focus groups] are constituted in real time QR is as much about social practices as about experience QR is, or should be, a credible, rigorous enterprise. As an edited book, this is ideal for final year students, as well as people beginning masters and doctoral programmes. The most comprehensive qualitative research book available, it is the perfect all-in-one companion for any student embarking on a qualitative research course or project. It introduces students to the big picture of qualitative research, teaching both the 'why' and the 'how to' of getting started, selecting a method and conducting research and data analysis. It is written by world experts of the highest calibre who are upfront about their analytic positions, but distilled into an accessible language and format for beginning researchers who will soon be tackling their own research study, whether at an undergraduate or postgraduate level. The particular added value of *Qualitative Research* is that it gives you an entrée into qualitative

methods from leading experts in the field who address the needs of students who need to brush up their research skills prior to their own research projects.

Re-imagining African Christologies Victor I. Ezigbo 2010-02-08 "Who do you say that I am" (Mark 8:29) is the question of Christology. By asking this question, Jesus invites his followers to interpret him from within their own contexts-history, experience, and social location. Therefore, all responses to Jesus's invitation are contextual. But for too long, many theologians particularly in the West have continued to see Christology as a universal endeavor that is devoid of any contextual influences. This understanding of Christology undermines Jesus's expectations from us to

imagine and appropriate him from within our own contexts. In *Re-imagining African Christologies*, Victor I. Ezigbo presents a constructive exposition of the unique ways that many African theologians and lay Christians from various church denominations have interpreted and appropriated Jesus Christ in their own contexts. He also articulates the constructive contributions that these African Christologies can make to the development of Christological discourse in non-African Christian communities.

Youth Identities, Localities, and Visual Material Culture Kristen Ali Eglinton 2012-10-06 This invaluable addition to Springer's Explorations of Educational Purpose series is a revelatory ethnographic account of the visual material culture of contemporary youths in North America. The author's detailed study follows apparently dissimilar groups (black and Latino/a in a New York City after-school club, and white and Indigenous in a small Canadian community) as they inflect their nascent identities with a sophisticated sense of visual material culture in today's globalized world. It provides detailed proof of how much ethnography can add to what we know about young people's development, in addition to its potential as a model to explore new and significant avenues in pedagogy. Supported by a wealth of ethnographic evidence, the analysis tracks its subjects' responses to strikingly diverse material ranging from autobiographical accounts by rap artists to the built environment. It shows how young people from the world's cultural epicenter, just like their counterparts in the sub-Arctic, construct racial, geographic and gender identities in ways that are subtly responsive to what they see around them, blending localized characteristics with more widely shared visual references that are now universally accessible through the Web.

The work makes a persuasive case that youthful engagement with visual material culture is a relational and productive activity that is simultaneously local and global, at once constrained and enhanced by geography, and possesses a potent and life-affirming authenticity. Densely interwoven with young people's perspectives, the author's account sets out an innovative and interdisciplinary conceptual framework affording fresh insights into how today's youth assimilate what they perceive to be significant.
