*The Concept of Self in Education, Family, and Sports* Anne P. Prescott 2006 The issue of self-concept is central to the studies and practices of education and psychology. The varying degrees of self-esteem that exist between individuals can offer insight into the varying degrees of health and efficiency that exist for individuals in the worlds of education, family and sport. The research presented in this book are the latest explorations of how self-concept translates into and has an effect on these far reaching and unavoidable aspects of life.

*Systematic Review of the Effects of Interventions for People Bereaved by Suicide* Catriona McDaid 2008 A systematic review was undertaken with the primary aim of evaluating the effects of interventions aimed at persons bereaved by suicide. A secondary aim was to provide a descriptive overview of interventions for persons bereaved by suicide that have been reported in the literature. The evidence we have identified and appraised is not robust enough to provide clear implications for practice though some tentative conclusions are made about the effectiveness of a psychiatric nurse led CBT family intervention, psychologist-led group therapy intervention for children and a combined health professional and volunteer led group therapy intervention for adults. There is a pressing need for methodologically sound RCTs to confirm whether such interventions are helpful and, if so, for whom.

**Corporate Integrity and Accountability** George G. Brenkert 2004-07-08 The ethical and legal scandals at Enron, WorldCom, Tyco and many other businesses in the United States, Europe and Asia have shaken people's confidence in business. Corporate Integrity and Accountability seeks to address questions of corporate integrity as they arise for financial reporting, executive compensation, globalization, and business ethics itself. In so doing it asks the following questions: What is the current meaning of corporate integrity? How should we go about analyzing and responding to unethical and corrupt behavior both at home and abroad? What measures can be undertaken by corporations within their own walls to address these problems? What groups and perspectives need to be taken into account with regard to CEO compensation? These are a few of the many topics that the chapters in this book discuss under the heading of corporate integrity and accountability. The chapters are the product of leading business ethicists--both academic and practitioner--in the U.S. and Europe, resulting in the application of different methodologies, sources, and forms of argument. This gives the reader a sense not only of the complexity of some of the ethical issues business faces, but also the richness of the various resources that are available to address these issues. Corporate Integrity and Accountability is ideally suited as a text for courses in the following: business ethics, corporate social responsibility, current ethical issues in business, and corporate citizenship.
