**Sarah Dessen** Wendy J. Glenn 2005 A criticism of the writing of Sarah Dessen, a writer whose fiction for adolescents features strong female protagonists and the relationships they develop, and how those relationships help to determine who one is and what one becomes. Dessen's novels explore the complexity of human relationships between and among characters, undermines gender expectations, develops the themes of self-perception and identity, creates eccentric and memorable secondary characters, and uses humor to help readers bear the angst of teenage life.

Reading is dying in our schools. Educators are familiar with many of the factors that have contributed to the decline, poverty, second-language issues, and the ever-expanding choices of electronic entertainment. In this provocative book *Readicide: How Schools are Killing Reading and What You Can Do About It*, author and teacher Kelly Gallagher suggests it is time to recognize a new and significant contributor to the death of reading: our schools. *Readicide*, Gallagher argues that American schools are actively (though unwittingly) furthering the decline of reading. Specifically, he contends that the standard instructional practices used in most schools are killing reading by: Valuing standardized testing over the development of lifelong readers Mandating breadth over depth in instruction Requiring students to read difficult texts without proper instructional support and insisting students focus on academic texts Ignoring the

importance of developing recreational reading Losing sight of authentic instruction in the looming shadow of political pressures *Readicide* provides teachers, literacy coaches, and administrators with specific steps to reverse the downward spiral in reading; steps that will help prevent the loss of another generation of readers.
