Comprehensive Handbook of Social Work and Social Welfare, Social Policy and Policy Practice Karen M. Sowers 2008-03-07 V. 1.

The profession of social work -- v. 2. Human behavior in the social environment -- v. 3. Social work practice -- v. 4. Social policy and policy practice.

Social Policy in Aotearoa New Zealand Christine Cheyne 2008 Social Policy in Aotearoa New Zealand explains and analyses the development of contemporary social policy in Aotearoa New Zealand. It helps students to understand the conflicting values and perspectives in policy-making and implementation, and to relate the theories of social policy with the practices they will encounter in the field.

Global Europe, Social Europe Anthony Giddens 2006-11-13 'Global Europe, Social Europe' makes an essential contribution to the debate now opening up over the future of Europe in the wake of the demise of the Constitution.

The Myth of Work-Life Balance Richenda Gambles 2006-04-24 Many regard the ways in which paid work can be combined or 'balanced' with other parts of life as an individual concern and a small, rather self-indulgent problem in today's world. Some feel that worrying about a lack of time or energy for family relationships or friendships is a luxury or secondary issue when compared with economic growth or development. In the business world and among many Governments around the world, the importance of paid work and the primacy of economic competitiveness, whatever the personal costs, is almost accepted wisdom. Profits and short term efficiency gains are often placed before social issues of care or human dignity. But what about the impact this has on men and women's well being, or the long-term sustainability of people, families, society or even the economy? Drawing from interviews

and group meetings in seven diverse countries - India, Japan, the Netherlands, Norway, South Africa, the UK and USA - this book explores the multiple difficulties in combining paid work with other parts of life and the frustrations people experience in diverse settings. There is a myth that 'work-life balance' can be achieved through quick fixes rather than challenging the place of paid work in people's lives and the way work actually gets done. As well as exploring contemporary problems, this book attempts to seed hope and new ways of thinking about one of the key challenges of our time.

Restructuring Family Policies Maureen Baker 2006 Recent years have seen significant changes in the social policies of many liberal welfare-states; this is especially true of social programs for families with children. Increasingly, governments are making family policy trade-offs, reducing support for some families but improving it for others. Why are such trade-offs occurring, and how do governments differ in their approach to family social policy? This study addresses these questions by examining the political, demographic, and socio-economic factors influencing the restructuring of family-related programs in OECD countries. Adopting a feminist political economy approach, Maureen Baker shows that while some governments encourage their citizens to see children as 'future resources,' and promote strong support for reproductive health programs, child welfare services, women's refuges, subsidized childcare, and pay equity, others make these claims while simultaneously reducing family incomes through the deregulation of labour markets and restrictions on income support. Ultimately, Baker demonstrates that nation states with the best outcomes for families offer a variety of social supports, which are increasingly important as global markets reduce economic security for some families while improving the

financial situation of others. This study also explores strategies employed by states to incorporate or resist international pressures, and the reasons why some states tenaciously defend their family policy traditions while others restructure according to international guidelines. Drawing from nation-based research, cross-national studies, and international data bases, *Restructuring Family Policies* successfully integrates mainstream academic debates about restructuring welfare states with feminist research findings and current policy concerns.

The Cultural Diversity of European Unity Wilhelmus Antonius Arts 2003 This book investigates and compares the values and dynamics of value changes in important life domains of the Europeans from an economic, political, social, and religious-moral point of view and explores the relationships between value orientations and societies' structural characteristics.

Perceptions of Living Conditions in an Enlarged Europe Jens Alber 2004 This report contains summary findings from a series of comparative studies on the quality of life and living conditions in the 13 acceding and candidate countries and the 15 Member States. The base data comes from the Eurobarometer survey carried out in Spring 2002. The sections cover: income and material resources; social integration and exclusion; employment and social relations; measuring life satisfaction; policy challenges.

Why We Need a New Welfare State Gøsta Esping-Andersen

2002-08-22 Leading scholars in the field examine the highly topical issue of the future of the welfare state in Europe. They argue that welfare states need to adjust, and examine which kind of welfare architecture will further Europe's stated goal of maximum social inclusion and justice. The volume concentrates on four principal social policy domains; the aged and transition to retirement; the welfare issues related to profound changes in working life; the new risks and needs that arise in households

and, especially, in child families; and the challenges of creating gender equality. The volume aims to promote a better understanding of the key welfare issues that will have to be faced in the coming decades. It also warns against the all-too-frequent recourse to patent policy solutions that have all too often characterized contemporary debate. It intends to move the policy debate from its often frustrating vague and generic level towards greater specificity and nuance.

This book explains why countries have adopted different policies for working parents through a comparative historical study of four nations: France, the Netherlands, Sweden, and the United States.

Dutch Welfare Reform in an Expanding Europe Abram de Swaan 2004
The sustainability and architecture of today's European welfare states and social security systems are under pressure. In addition to general trends such as individualization, ageing, and migration, the very process of European integration and globalization drives welfare states to reform. In this collection of essays five leading foreign welfare state experts reflect on the nature of the Dutch welfare state in a changing Europe. Comparative commentary from abroad provides policy wisdom as well as illuminating asides about national debates. These reflections from experts of neighboring countries (Germany, France, the United Kingdom, and Belgium) and the United States focus on various aspects of the Dutch welfare state, such as social security, labor market policy, health care, and immigration, and carry the intellectual discussion of a pressing political issue across borders. In this way the book contributes to the political debate on the future of the welfare state in the European context. It offers an interesting and provoking mosaic of the Dutch welfare state during the past two decades. At the same time, it reveals the important questions and dilemmas the Netherlands will have to cope with in the years to come. The observations and insights enrich the debate about the future of social policy in the Netherlands and in the European Union as a whole.
