**Otolaryngology** Thomas R. Van De Water 2011-01-01 Here is a complete resource for all the basic science and clinical knowledge related to otolaryngology, from relevant molecular biology to physiology to clinical practice. It offers excellent coverage of all key topics with one goal in mind—to provide a solid foundation for the understanding and practice of this diverse specialty. Both comprehensive and succinct, this book is an ideal review text and study tool for residents preparing for their board exams. Organized into six organ-specific sections, the book provides such key clinical information as: basic principles of allergic diseases, the oncology of head and neck tumors, the biology and testing of olfactory dysfunction, neurological disorders of the larynx, sleep apnea management, working with hearing aids and cochlear implants, and much more. Each chapter features a Chapter Outline, numerous tables, and Self-Test Questions with their answers to ensure thorough comprehension. You will also find more than 350 illustrations demonstrating important concepts. This book is an invaluable resource for residents taking their boards and a useful refresher for practicing otolaryngologists at all levels. It is the one reference you will turn to again and again.

**Introduction to Psychoneuroimmunology** Jorge H. Daruna 1984-01-28 Health is maintained by the coordinated operation of all the biological systems that make up the individual. The Introduction to Psychoneuroimmunology, Second Edition, presents an overview of what has been discovered by scientists regarding how bodily systems respond to environmental challenges and intercommunicate to sustain health. The book touches on the main findings from the current literature without being overly technical and complex. The result is a comprehensive overview of psychoneuroimmunology, which avoids oversimplification, but does not overwhelm the reader. - Single authored for consistency of breadth and depth, with no redundancy of coverage between chapters - Covers endocrine-immune modulation, neuro-immune modulation, and the enhancing or inhibiting processes of one or more systems on the others - Expanded use of figures, tables, and text boxes
