**Connecting Teens with Technology at the Library** Kelly Nicole Czarnecki 2021-05-29 Connecting Teens with Technology at the Library presents a balanced view of the often complex relationship between teenagers and their technology. This book will help support fellow teen-serving staff nationwide in program creation and collection development on this relevant topic. Throughout the chapters, the authors take a lens of inclusivity to address the needs of many teens-not just those that are avid users. While programming is central to most books about teens and technology in the library, this read goes beyond a mere listing of program ideas or reviews but offers practical advice for linking these technology programs with real-world applications such as future careers and community partnerships. The authors provide options of low-tech and high-tech as well as how to engage youth during the pandemic and beyond. The book also explores areas of connecting teens with technology beyond programming and into areas of mentoring and community building; the foundational blocks of the library. Whether readers are just starting out in libraries or are a seasoned library worker, this book has tips to engage every reader in welcoming teens to the technology resources of the library. With Connecting Teens with Technology at the Library, Czarnecki and Harris have created an essential manual for working with teens through and with technology. From matching your program with the library's mission, to developing your professional and teen collections with technology centered materials, to sample programs that your teens will love, this book has everything you need to create an impactful technology program that works in and out of the library.

**Race and Monstrosity in Dungeons & Dragons** Christopher LeCluyse 2026-04-28 This work examines how ideas of race in Dungeons & Dragons are rooted in more than 2,000 years of history, from ancient Greek depictions of "monstrous races" through early modern Europe. It

shows how co-creator Gary Gygax formalized fantasy creatures using frameworks based on scientific taxonomy and nineteenth-century racial theory. These influences continue to shape how race functions in the game, especially in the depiction of orcs and drow--two groups identified by publisher Wizards of the Coast as particularly problematic. The book provides a historical overview, case studies in racial representation of orcs and drow, and interviews with players of color that provide insight into the experience of race during play. A concluding chapter notes progress and limitations in recent revisions to the game's treatment of race. Even as terms shift from "race" to "species," the author argues, the foundational logic of classification remains embedded in the fantasy genre.

**Old Russian Birchbark Letters** Simeon Dekker 2018-02-19 This study is devoted to a corpus of Old Russian letters, written on pieces of birchbark. These unique texts from Novgorod and surroundings give us an exceptional impression of everyday life in medieval Russian society. In this study, the birchbark letters are addressed from a pragmatic angle. Linguistic parameters are identified that shed light on the degree to which literacy had gained ground in communicative processes. It is demonstrated that the birchbark letters occupy an intermediate position between orality and literacy. On the one hand, oral habits of communication persisted, as reflected in how the birchbark letters are phrased; on the other hand, literate modes of expression emerged, as seen in the development of normative conventions and literate formulae.

**Legal Imaginaries of Crisis and Fear** Martin Belov 2025-11-18 This book explores the epistemological, semiotic, semantic, and heuristic dimensions of the dark emotions in constitutional and international law. We are living in times of crisis and emergency where negative emotions and dark feelings are abundant. As these have come to form the intellectual and socio-legal context for the performance of constitutional and international law, this book explores their place - especially the politics of fear, but also anger, hate, despair, and crisis - in our current constitutional polycrisis. Focusing on this 'dark constitutionalism', the book draws together an international and interdisciplinary range of scholars to consider the place of emotive semiotics in collective meaning making, the constitutional politics of emotions, and emotional approaches to global challenges in a time of crisis, emergency, and transition. The book thereby develops a compelling analysis of the use of negative emotions in the shaping of contemporary constitutional imaginaries, and with it a novel account of the rise of dark constitutionalism. This book will appeal to researchers and scholars working in the areas of legal theory, legal philosophy, constitutional law, international law, and socio-legal studies. Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC BY-NC-ND) 4.0 license.
