Handbook of Research in International Marketing Subhash C. Jain 2011 The global expansion of business has generated a tremendous interest among scholars, but there remains a strong need for theoretical insights into conducting marketing operations abroad. This thoroughly revised edition addresses this lack in the extant literature. The book consists of insights from leading scholars in international marketing, working not only to advance the theoretical underpinnings of today's most important international marketing issues, but also to provide insights for how the field of scholarship and practice of international marketing might develop in the future. The authors, top scholars from around the world, provide useful theoretical insights designed to stimulate contemplation and discussion, and to provide guidelines for future research on international marketing. The volume includes coverage of topics in four main areas: Part I looks at global branding while Part II examines issues of marketing strategy on a world stage. Part III offers chapters on cultural issues and the book closes with a more detailed look at marketing at the bottom of the pyramid in Part IV. Scholars and students in marketing and international business will find much of value in this comprehensive volume.

International Marketing Daniel W. Baack 2013 International Marketing presents an innovative, integrated approach to the course, in which marketing concepts are explored in depth within the international context. The authors identify five key factors that impact any international marketing venture-culture, language, political/legal systems, economic systems, and technological/operational differences- and discuss them in relation to the core marketing concepts of markets, products, pricing, distribution (place), and promotion. Uniquely, the book provides discussions of sustainability and "bottom of the pyramid" concepts within each chapter, and is richly illustrated with examples from both multinational companies as well as smaller local concerns. Setting the path for the future direction of this course, the authors provide instructors and students with the first truly international marketing textbook.

Now with over 100 new academic articles and their findings integrated into this 16th edition! Providing a well-rounded perspective of international markets that encompasses history, geography, language, and religion as well as economics, International Marketing helps students to see the cultural and environmental uniqueness of any nation or region. The 16th edition reflects all the important events and innovations to affect global business

within recent years, while including several new and updated learning tools and teaching resources.

Professional Selling Mohamed B. Mansour 2018-06-14 Professional Selling: Types, Approaches and Management is an essential guide that covers the role of professional selling as part of an organization's integrated marketing system. It presents, in detail, the various types of professional selling functions as well as the process of presenting a product to a customer and closing a sale. It describes how a professional salesperson should follow up after a sale in order to maintain customer satisfaction and develop a long-term relationship. This professional reference goes global, too, by discussing sales and negotiation activities in different cultures. The book does more than discuss the steps of selling; it also includes comprehensive information about what it takes to manage key accounts as well as salespeople, especially recruitment, training, compensation, and evaluation. It features exercises, cases, and role-playing to achieve its objectives. Salespeople and managers alike will benefit from the knowledge and guidance provided in Professional Selling: Types, Approaches and Management.

Marketing in Culturally Distant Countries Giovanna Magnani 2022-06-28 The aim of this book is to offer up-to-date insights into the challenges for international firms represented by managing their marketing mix in "distant" countries, especially considering the role played by cultural distance. Building on the famous McCarthy's "4Ps," and on the concept of "cultural distance," the book outlines some key challenges and opportunities for firms that manage international marketing policies about "product," "price," "place," and "promotion" in culturally distant markets. At the same time, the book looks at extant conceptualizations and approaches considering the evolving environmental forces, which are contributing to further challenges for firms that are confronted with

changing economic and social scenarios. Indeed, markets and societies are increasingly affected by multiculturalism, and new patterns in consumers' behaviors have emerged due to the proliferation of digital technologies and, more recently, due to several market disruptions such as the COVID-19 pandemic. How do firms manage culturally distant and increasingly evolving cultural environments is a relevant topic worthy of discussion from both a theoretical perspective and a practice-based approach, through the analysis of real-world case studies. Researchers of cross-cultural marketing and practitioners intending to get acquainted with the latest research on the topic would particularly benefit from this book.
