Human Factors of a Global Society Tadeusz Marek 2014-06-02 During the last 60 years the discipline of human factors (HF) has evolved alongside progress in engineering, technology, and business. Contemporary HF is clearly shifting towards addressing the human-centered design paradigm for much larger and complex societal systems, the effectiveness of which is affected by recent advances in engineering, science, and education. *Human Factors of a Global Society: A System of Systems Perspective* explores the future challenges and potential contributions of the human factors discipline in the Conceptual Age of human creativity and social responsibility. Written by a team of experts and pioneers, this book examines the human aspects related to contemporary societal developments in science, engineering, and higher education in the context of unprecedented progress in those areas. It also discusses new paradigms for higher education, including education delivery, and administration from a systems of systems perspective. It then examines the future challenges and potential contributions of the human factors discipline. While there are other books that focus on systems engineering or on a specific area of human factors, this book unifies these different perspectives into a holistic point of view. It gives you an understanding of human factors as it relates to the global enterprise system and its newly emerging characteristics such as quality, system complexity, evolving management system and its role in social and behavioral changes. By exploring the human aspects related to actual societal developments in science, the book opens a new horizon for the HF community.

Gestión de la competitividad del sector hotelero de Boyacá mediante un modelo tridimensional Pedro Ignacio Moya Espinosa 2023-05-04 La gestión es una habilidad que permite pensar gerencialmente, es una especie de actitud conectada con el logro de resultados óptimos frente a un proyecto, idea, iniciativa o negocio. Los resultados son el reflejo de las acciones del gerente, los cuales implican eficiencia y eficacia en el uso de los recursos (económicos, financieros, técnicos, tecnológicos, entre otros), que junto con el talento humano contribuyen a su obtención. El pensamiento gerencial se orienta hacia la calidad, atención e intención en cada actividad realizada para garantizar el cumplimiento de los propósitos personales, institucionales y sociales. El libro *Gestión de la competitividad del sector hotelero de Boyacá mediante un modelo tridimensional* ofrece el resultado de una investigación que, además de sus propios hallazgos, se nutre de tres procesos investigativos intrínsecamente relacionados, con los cuales se plantea una propuesta única para que a través de la gestión de las organizaciones, las empresas objeto de estudio, es decir, los hoteles de Boyacá, se preparen para asumir los retos del mundo cambiante con enormes desafíos como la globalización, los mercados emergentes y la condiciones de salud pública (Covid-19), entre muchos otros fenómenos que han dado un giro a la forma de comprender, actuar, mantenerse y crecer en momentos de turbulencias. Este libro se desarrolló mediante una investigación descriptiva que retoma resultados de la investigación macro de tipo causal, con un diseño mixto, cuyo enfoque cualitativo lo integró un grupo focal con actores sociales del departamento de Boyacá, que incluyó un taller de competitividad y el estudio de la perspectiva temporal, información procesada en el software Nvivo. El enfoque cuantitativo se apoyó en un muestreo por cuotas aplicado a dos poblaciones, una conformada por cincuenta y cinco (55) gerentes de los hoteles afiliados a Cotelco Capítulo Boyacá y otro a trescientos ochenta y cuatro (384) huéspedes de tales hoteles; la información permitió el análisis univariado y multivariado de datos, un análisis factorial, de componentes principales y juzgamiento de hipótesis, mediante el modelo de Ecuaciones Estructurales de Mínimos Cuadrados Parciales (EEMCP). Por consiguiente, este libro se encarga de mostrar uno de los varios resultados derivados de la investigación, por tanto, no enfatiza con detalle en los datos cuantitativos ni en cualitativos, más bien se centra en uno de sus resultados, representado en el modelo tridimensional y el índice sintético. El modelo propuesto resulta, además, de la autorreflexión, de la inducción y de la deducción como aporte para fomentar y fortalecer el sector hotelero de Boyacá. El modelo tridimensional propuesto es inédito, diseñado para robustecer con efectos al sector hotelero, por ello reúne variables internas, externas y

de integración; su principal intención es optimizar internamente la organización. Se trata de una primera fase de un proceso de investigación conformado por más etapas que ya se están visualizando. El modelo presenta un programa en Excel de libre acceso y de gran utilidad para que estratégicamente se determine el comportamiento interno, externo y la integración. A partir de esa herramienta, la organización podría prepararse para generar condiciones favorables asumiendo los desafíos y dimensiones del devenir de manera anticipada garantizando un mejor panorama tanto para la organización como en el sector hotelero.

Muhamad Nafik Hadi Ryandono 2021-05-31 Kajian Bank Islam atau di Indonesia lebih dikenal sebagai Bank Syariah yang menggunakan pendekatan prinsip-prinsip Syariah dan pendekatan praktis relatif sulit ditemukan khususnya dalam bentuk buku referensi. Padahal referensi dengan dua pendekatan kajian tersebut banyak dibutuhkan oleh para akademisi dan praktisi agar pemahaman dan praktek Perbankan Islam semakin kaffah dari waktu ke waktu.
