Cell-Penetrating Peptides Makoto Oba

2022-11-30 Cell-Penetrating Peptides The

definitive reference on the rational design of cell-penetrating peptides enables readers to develop tailor-made peptides for their specific needs. In recent years, cell-penetrating peptides (CPPs) have become valuable tools for the cellular delivery of proteins, nucleic acids, and drugs. These small peptide sequences can be artificially designed and synthesized with custom-made characteristics to mediate the efficient and non-toxic transport of biomolecules, drugs, or nanoparticles into the cell. *Cell-Penetrating Peptides: Design, Development, and Applications* provides an up-to-date account of the development and use of CPPs for delivering membrane-impermeable bioactive molecules into cells. Bringing together contributions from leading researchers from around the world, this comprehensive volume describes the

characteristics and mechanisms of CPPs as well as their application in both medicine, biotechnology and agriculture. Covers rational design and development of cell-penetrating peptides for use in cellular delivery of small molecule drugs, proteins, nucleic acids, and nanoparticles Presents the chemical and biological characteristics of CPP action in vitro and in vivo Describes the structure and design principles of both synthetic and naturally occurring CPPs Discusses key medical applications of CPPs such as oral delivery, intranasal delivery, and clinical trials Cell-Penetrating Peptides: Design, Development, and Applications is an essential resource for biochemists, medicinal chemists, molecular biologists, biotechnologists, and researchers studying CPPs in both academia and industry. **Linseed** Sapna Langyan 2024-08-22 Linseed: A Multipurpose-Multisector Crop of Industrial Significance provides a general overview of linseed as a multipurpose-multisector crop for

obtaining a number of valuable products. The book's sections present the use of linseed as food products and discuss a number of important topics, including genetic engineering and breeding advances, pre-harvest processing methods, advanced extraction and quality assessment, metabolic engineering, bioactivity, new food product development, chemistry, and functionality. The book also covers the use of linseed in the textile sector and modified linseed oil products, animal feed products, cosmetics, and personal use products, along with their industrial significance. Food waste and the challenges of linseed crop production and processing into a number of industrial products are also discussed. This book acts as a comprehensive resource for food scientists, researchers, scholars, and industrial people related to food, nutraceutical, cosmetics, pharmaceuticals, textiles, and health practitioners, especially dietitians and nutritionists. - Provides a general overview of

linseed as a multipurpose-multisector crop for obtaining a number of valuable product - Covers the knowledge on the waste/by-products generated during the production and processing of linseed - Explores detection and identification of bioactive components from linseed
