Mammals: Animal Group

Science Book For Kids |

Children's Zoology Books

Edition Baby Professor

2017-02-15 What do you know about mammals? As the animal group that humans belong to, mammals have so many

similarities with us. It's time to learn what those similarities are in order to point out the differences, too. The use of pictures and select texts make learning so much fun and effective. This is an important book that your child should have. Grab a copy today!

[Seabirds in the North-East Atlantic](#) Henry Häkkinen

2023-08-08 This book was produced by the Zoological Society of London and the University of Cambridge with two aims: to assess seabirds' vulnerability to climate change in the North-East Atlantic, and to identify potential conservation actions that could reduce this vulnerability.

'Seabirds in the North-East Atlantic' collates information from the scientific literature, non-governmental organisations' reports, conservation practitioner input and online databases into a single volume, and provides a reference manual to assist conservation planning. It is intended to be used by anyone who wishes to identify climate change threats to seabirds; to

compare threats between different areas of the North-East Atlantic; to start a quantitative climate change vulnerability assessment for a local population; or to review options for conservation action in response to climate change. This book stems from research published in December 2022, but assessments may be updated based on feedback and newly available information. To check for updates to our assessments, please visit our website at: www.ZSL.org/seabird-guidelines.
